CORNELIO ANDRÉS BOTA-SIERRA (2014) A brief look at the Odonata from the Páramo ecosystems in Colombia, with the descriptions of *Oxyallagma colombianum* sp. nov. and *Rhionaeschna caligo* sp. nov. (Odonata: Coenagrionidae, Aeshnidae, Libellulidae). *Zootaxa*, 3856 (2): 192–210.

There were no holotypes specified in this paper for the two new species, and this note corrects that omission.

Oxyallagma colombianum sp. nov., holotype Farm El Paraiso, Corregimiento Labores, Municipality Belmira, Departament Antioquia, N 6°40' O 75°38', 2800 m. 6.iv.2012, Leg. C. Bota and C. Moreno. For description, see *Zootaxa* 3856 (2): 197.

Rhionaeschna caligo sp. nov., holotype *Rhionaeschna caligo*, Páramo El Congo, Municipality San Jose de la Montaña, Departament Antioquia, N 6°45'37.3" O 75°35'24", 3200 m, 11.ix.2011, Leg. L. Ríos and J. Zapata. For description, see *Zootaxa* 3856 (2): 199.

Both are deposited in the Colección de Entomología de la Universidad de Antioquia, Medellin, Colombia.
