These special publications, below, present overviews of and papers presented during our triennial international symposia on aquatic oligochaete biology. Three similar names for our symposia have been used since we began as a group in 1979: International Symposium on Aquatic Oligochaete Biology (ISAOB), International Symposium on Aquatic Oligochaetes (ISAO), and International Symposium on Aquatic Oligochaeta (ISAO).

The proceedings of the first symposium were published in a hard-bound book (Brinkhurst and Cook 1980). The proceedings of the second through ninth symposia were published as part of the regular series of the journal, *Hydrobiologia*, and were also reprinted and bound for symposium participants (and the scientific community) in a regular series entitled *Developments in Hydrobiology*. The proceedings of the 10th symposium were published in a supplement to volume 31 of the journal, *Acta Hydrobiologica Sinica*; the proceedings of the 11th symposium were published in the *Turkish Journal of Zoology*; the proceedings of the 12th symposium were published in *Zoosymposia*; the proceedings of the 13th symposium were published in a special volume of the journal, *Biologia*, and the proceedings of the 14th symposium are presented in this current volume of *Zoosymposia*.
