**MARCELY VALOIS, FERNANDO Z. VAZ-DE-MELLO & FERNANDO A. B. SILVA (2015) A taxonomic review of the Neotropical genus *Hansreia* Halffter & Martínez, 1977 (Coleoptera: Scarabaeidae, Scarabaeinae). *Zootaxa*, 4027: 205–226.**

In reviewing the taxonomy of the genus *Hansreia* Halffter & Martínez, 1977 three new species were described: *H. krinskii*, *H. grossii* and *H. peugeoti*. However, the collection where the holotype of *H. peugeoti* is deposited was not indicated (Valois, Vaz-de-Mello & Silva, 2015). According with ICZN (1999), this information is necessary to availability of a new specific and subspecific name published after 1999 (Article 16.4.2). Therefore, here we address the necessary information on the collection data of the holotype of *H. peugeoti*, currently deposited in the CEMT (Seção de Entomologia da Coleção Zoológica, Departamento de Biologia e Zoologia, Universidade Federal de Mato Grosso, Cuiabá, Brazil):

On page 212: *Hansreia peugeoti* Valois, Vaz-de-Mello & Silva sp. nov.

**Material studied. Holotype: BRAZIL:** MATO GROSSO, Cotriguaçu, Margem do Rio Juruena, (09°52'47.67"S, 58°14'7.09"O), X.2010, R. V. Nunes & M. S. Gliotti—1 ♂ (CEMT).
