PEDRO ROSSO & LUIZ ALEXANDRE CAMPOS (2017) *Nigrisagitta distichus*, a new genus and species of Discocephalini from Venezuela (Hemiptera, Pentatomidae, Discocephalinae) *Zootaxa*, 4303: 427–436.

According to Article 30.1.2 of the International Code of Zoological Nomenclature (1999) the gender of the name *Nigrisagitta* is feminine. In order to fulfill the provisions of Article 31.2 of the International Code of Zoological Nomenclature, *Nigrisagitta distichus* should be replaced by *Nigrisagitta disticha* in title, abstract, main text, captions of figures 1–5, and short title in footnotes.

We are thankful to Dr. Petr Kment, Czech Republic National Museum, for alerting us to the proper gender agreement of the species name.
