ANDRÉ MARSOLA GIROTI & ANTONIO DOMINGOS BRESCOVIT (2018) The taxonomy of the American *Ariadna* Audouin (Araneae: Synspermiata: Segestriidae). *Zootaxa*, 4400 (1): 001–114.

On page 58, the Figure 34 published is a duplicate of Figure 24, presenting erroneously the body of specimens of *Ariadna caerulea* Keyserling, 1877, instead of *Ariadna cephalotes* Simon, 1907. The correct Figure is presented below:

FIGURE 34. *Ariadna cephalotes* Simon, 1907. Male from Vale do Zongo (MCN 24097) (A–E): habitus, dorsal (A) and ventral (B); left leg I, prolateral (C) and retrolateral view (D); right metatarsus I, ventral view (E). Female from Laguna Viscachani (MCN 23865) (F–I): habitus, dorsal (F) and ventral view (G); right leg I, prolateral (H) and retrolateral view (I). Scale bar: 1mm.
