MARIANA ROCHA DE SOUZA & MICHAEL N DAWSON (2018) Redescription of *Mastigias papua* (Scyphozoa, Rhizostomeae) with designation of a neotype and recognition of two additional species. *Zootaxa*, 4457 (4): 520–536

An error in the location of a specimen reported by Swift *et al.* (2016) and Rocha de Souza & Dawson (2018) has recently been brought to our attention. The specimen #M0D000156Z used for morphological analysis and 6 samples used for molecular analysis (GenBank Accession #s KU901066, KU901067 in both papers, and additionally in Swift et al. (2016) #s KU900916, KU900944, KU900972, KU901036) were reported as being from "Enewetak" in the Marshall Islands, whereas they are from "Enewetak Pinnacle" in Kwajalein Atoll, the Marshall Islands (collector: Scott Johnson). We thank Patrick L. Colin of the Coral Reef Research Foundation, Palau, for bringing our attention to our transcriptional error.
