CESARE BELLO', GIUSEPPE OSELLA & COSIMO BAVIERA (2019) A taxonomic monograph of the genus *Solariola* Flach, 1908 (Coleoptera: Curculionidae: Entiminae). *Zootaxa*, 4676: 001–261.

In our recent revision of the genus *Solariola* Flach, we described a number of new species. Unfortunately however, two of the new species names each has two alternate spellings in the publication. This nomenclatural problem (see ICZN article 24.2.3) can be resolved by us acting as First Reviser (under ICZN article 24.2.4), and here selecting which of the two names is the valid name for each of the two species.

The species names are *Solariola gratiensis* and *S. graziaensis*, and *S. selinusia* and *S. selinuntina*.

We here select *Solariola gratiensis* and *Solariola selinusia* as the valid names for these two species. *Solariola graziaensis* and *S. selinuntina* are thus unavailable names.
