

**COLIN L. McLAY & TOHRU NARUSE (2019) Revision of the shell-carrying crab genus *Conchoecetes* Stimpson, 1858 (Crustacea: Brachyura: Dromiidae). *Zootaxa*, 4706: 001–047.**

Two errors were made in the naming of shells carried by *Conchoecetes pectenicola* (Adams in Belcher, 1848). The bivalve shell accompanying the type BMNH 44.106 should be *Mimachlamys sanguinea* (Linnaeus, 1758) the name accepted by WORMS. Not *Mimachlamys senatoria* (Gmelin, 1791) as given. The bivalve shell carried by the ovig. female ZMUC-CR-10111 should be *Marcia recens* (Holten, 1802), not *Mimachlamys senatoria* (Gmelin, 1791).

**Text Changes:**

Page 34: **Conchoecetes pectenicola** (Adams in Belcher, 1848)

**Type:** BMNH 44.106, holotype, ovig. female 6.2 × 6.2, chelae missing, dry collection, Sunda Strait, Java, 24 m, carrying bivalve shell *Mimachlamys sanguinea* (Linnaeus, 1758), coll. Capt. E. Belcher, ca. 13 Jun. 1843.

**Material Examined:**

**Singapore:** ZMUC-CR-10111, shallow water, ovig. female 19.8 x 19.4 mm carrying a bivalve shell (*Marcia recens* (Holten, 1802), coll. Sven Gad (forwarded to Copenhagen Museum by Swedish Consul in Singapore, 4 Jun. 1903); ZRC1984.6309, male 17.3 × 16.9 mm, South China Sea near Singapore, coll. Hee Huat 27 Sep. 1983.
