This successful series on mite ontogeny and morphological diversity has published three volumes (Zhang *et al.* 2018, 2019, 2020). I am happy to announce here the publication of another volume. This volume consists of seven papers: one on Mesostigmata (Ma *et al.* 2020), three on Oribatida (Seniczak *et al.* 2020a,b; Fan *et al.* 2020) and three on Trombidiformes (Gu *et al.* 2020; Wu *et al.* 2020; Xu *et al.* 2020).

I am grateful to my co-editors (Dr Marut Fuangarworn, Dr Qing-Hai Fan & Dr Tianci Yi) and the reviewers for their support. I also thank all the authors for their contributions.
