**PAUL OLIVER, RAINER GÜNTHER, BURHAN TJATURADI & STEPHEN J. RICHARDS (2021) A new species of large green treefrog (*Litoria*, Pelodryadidae) from Papua, Indonesia. *Zootaxa*, 4903 (1): 117–126.**

Page 121, Figure 3: due to an error introduced during final production, Figure 3 was partially obscured by text. It is presented in full here.

**FIGURE 3.** Calls of *Litoria lubisi* sp. nov.: A) oscillogram (top) and spectrogram (bottom) of fifteen consecutive calls of *L. lubisi* recorded at an air temperature of 26.5°C, illustrating clumped pattern of call production in a long series; B) expanded view of the last three calls of the series illustrated in A, showing pattern of energy distribution within each call.
