JOSEF TUMBRINCK, MAKS DERANJA, KARMELA ADŽIĆ, MARKO PAVLOVIĆ & JOSIP SKEJO (2020) Cockscomb-shaped twighopper, *Cladonotus bhaskari* sp. n., a new and rare pygmy grasshopper species from Sri Lanka (Orthoptera: Tetrigidae: Cladonotinae). *Zootaxa*, 4821: 333–342.

The holotype of *Cladonotus bhaskari*, described by Tumbrinck *et al.* (2020) is going to be deposited in the entomological collection of the National Museum of Natural History in Colombo (Sri Lanka), not in the Museum Koenig in Bonn (Germany), as stated originally in the paper.
