MATHEUS VIEIRA VOLCAN, CRISLAINE BARBOSA, LIZANDRA JAQUELINE ROBE & LUIS ESTEBAN KRAUSE LANÉS (2021) Molecular phylogeny of the *Austrolebias adloffii* group (Cyprinodontiformes, Rivulidae), with description of two new endangered and highly endemic species of annual killifishes from the Laguna dos Patos system, southern Brazil. *Zootaxa*, 4965: 087–113.

The catalog number for the holotype of *Austrolebias lourenciano* was incorrect, and the respective paragraph in page 95 should be read as:

Holotype. MCP 54440, male, 36.9 mm SL, Brazil, Rio Grande do Sul State, São Lourenço do Sul municipality, temporary pool in the floodplains of Arroio Pinto (tributary of Arroio São Lourenço), close to the BR-116 highway, Laguna dos Patos system, 31°20'50"S 52°03'53"W, M. V. Volcan & Â.C. Gonçalves, 30 September 2013.
