Abstract

An illustrated catalogue of the Palaearctic types of species and subspecies described by Walter Lisenmaier in the genus *Hedychridium* Abeille de Perrin, 1878 is given. Lisenmaier described 110 species and subspecies of *Hedychridium*, most of the holotypes are deposited in his collection, at the Natur-Museum (Luzern, Switzerland), with the exception of 25 holotypes which are deposited at the British Museum (London), at the Musée cantonal de zoologie (Lausanne) and in two private collections. *Hedychridium atratum* is here transferred to *Chamaeholopyga* Lisenmaier, 1987. *Hedychridium krajniki turceyense* Lisenmaier, 1968 **stat. nov.** is upgraded to species rank. The holotype of *Hedychridium caireanum* Lisenmaier, 1968 is considered lost. A list of the species described and a synthesis of his classification is given. Pictures of 83 primary and secondary types are presented.

Key words: Chrysidae, Elampini, subgenera, catalogue, synonym

Introduction

The present article is the third contribution dedicated to the Chrysidae collection of Walter Lisenmaier (1917–2000), currently housed at the Natur-Museum in Luzern (Switzerland, NMLU) (Rosa *et al.* 2015, 2020). This is the second catalogue on the Palaearctic types deposited in his collection and it focuses on the taxa of the genus *Hedychridium* Abeille de Perrin, 1878 (Chrysidae, Elampini). The first part was focused on the types described by the Swiss author in the subfamily Cleptinae, genus *Cleptes* Latreille, 1802 (Rosa *et al.* 2020).

Walter Lisenmaier described 16 new subgenera (including *Adscitis*, not mentioned in Rosa *et al.* 2015), including *Prochridium* Lisenmaier, 1968 in the genus *Hedychridium*, which is currently considered as a valid genus (Kimsey & Bohart 1991). He described more than 700 new species and subspecies, 110 of which belong to the genus *Hedychridium*.

Lisenmaier's studies were revolutionary, in his day, and his revision of the European and West Palaearctic species published in several parts (Lisenmaier 1959a, b, 1968, 1987, 1994, 1997, 1999) continues to be the most influential reference for all entomologists studying Chrysidae. Lisenmaier (1959a, b, 1968) was the first author to introduce the concept of species groups in the family and in the genus *Hedychridium*; he established thirteen *Hedychridium* species groups for the West Palaearctic fauna, all included in the subgenus *Hedychridium* s. str. In fact, Lisenmaier used a classification based on subgenera, and considered four Palaearctic subgenera: *Hedychridium* s. str., *Acrotoma* Mocsáry, 1902b, *Hexachridium* Bischoff, 1913 and *Prochridium* Lisenmaier, 1968 (see the discussion below).

Materials and methods

The Linsenmaier collection includes about 56,750 specimens, 4,700 of which are *Hedychridium*, and approximately 4,380 types (Rosa *et al.* 2015). It consists of specimens collected from all over the World, in more than 150 countries. The present catalogue is focused on the species described by Linsenmaier (1959a, b, 1968, 1987, 1994, 1997, 1999) in the genus *Hedychridium* Abeille de Perrin, 1878. We here follow the classification proposed by Linsenmaier (1959a and followings), with explanations on unavailable names (e.g., *Acrotoma*) and a final synthesis of his fragmented work. We provide two nomenclatorial changes only, because actually evident; nevertheless, other changes are expected in future revisional works, because a catalogue is not the appropriate publication for further morphological and molecular analyses or new descriptions and comparative diagnoses.

Linsenmaier's descriptions were often incomplete both on information provided on the type localities, type series, and on species diagnoses. In several cases, only the country of origin was provided, and the complete type series was not clearly mentioned. We here report all data observed for primary and secondary types deposited in the collection. Species are listed alphabetically, and the following data are given: type locality; category of the type; number and sex of specimens; complete label data, a single slash reveals the information handwritten on the reverse side of the label and labels are separated from each other by double slash.

As explained in Rosa *et al.* (2015), Linsenmaier often added a colour label (grey or light blue) between the transparent labels bearing the specimens and the locality labels. These labels bear a generic locality only (e.g., Helvetia, Mongolia, etc.) and were added by Linsenmaier for a decorative effect only. They do not provide any relevant information and therefore they are excluded from the list of labels.

We follow Linsenmaier (1968, 1987, 1997, 1999) for the definition of the geographic concept of Palestine, intended as the area currently composed by the modern State of Israel, the West Bank, and the Gaza Strip. In this sense, "Palestine" is considered as the geographical region in Western Asia without any reference to the current land claimed by the State of Palestine.

The type localities reported in the present article are listed without geographic coordinates. Most of the taxa described by Linsenmaier were collected before 1990 and usually report a general locality. These generic localities refer either (i) to the surroundings of a town or to the hills/mountains around it, (ii) a locality where the landscape has changed in the last decades due to urbanisation or agricultural activities. Therefore, we are unable to provide precise collecting coordinates as these may refer to areas with more than several kilometres in radius. The punctuation and dashes (instead of hyphens) of the collecting dates written on the labels are standardised in the text, respecting the historical value of the original labels made by Linsenmaier.

The definitions of holotype, neotype, lectotype, etc. are used according to the International Code for Zoological Nomenclature (ICZN 1999), fourth edition.

The following abbreviations are used: cat. (catalogue), descr. (description), design. (designation), diagn. (diagnosis), distr. (distribution), fig. (figure), pag. (page), s. str. (*sensu strictu*), tax. (taxonomic discussion). Translations from the German text are given in square parentheses [].

Photographs of the types were taken with a Nikon D3400 and D700 connected to the stereomicroscope Togal SCZ and stacked with the software Combine ZP. The white calibration of the photocamera was applied to reduce the blue effect of fluorescent light of the microscope.

Species and subspecies of *Hedychridium* described by Linsenmaier

Linsenmaier (1951–1999) described 110 species and subspecies of *Hedychridium*. In his collection there are primary and/or secondary types of almost all taxa described, excluding the holotypes of 25 taxa, which are deposited in the following collections and reported in parentheses in the list:

Taxonomic part

Genus *Hedychridium* Abeille de Perrin, 1878

Hedychridium Abeille de Perrin, 1878: 3. Type species: *Hedychrum minutum* Lepeletier, 1806 (= *Chrysis ardens* Coquebert, 1801), by subsequent designation of Ashmead 1902.

Hedychridium Abeille de Perrin, 1878 is the second largest genus within the family Chrysidae, after *Chrysis* Linnaeus, 1761, and the largest among the tribe Elampini, including more than 300 valid species. It is a heterogeneous genus of small to medium-sized cuckoo wasps (2.0–7.0 mm), distributed particularly in dry to arid areas of the Holarctic region. Semenov-Tian-Shanskij (1954) and Semenov-Tian-Shanskij & Nikol'skaya (1954) subdivided the genus *Hedychridium* into twelve genera, namely (besides *Hedychridium* s.str.): *Actineuchrum* Semenov-Tian-Shanskij, 1954; *Claudiola* Semenov-Tian-Shanskij, 1954; *Colpopyga* Semenov-Tian-Shanskij, 1954; *Cyrteuchridium* Semenov-Tian-Shanskij, 1954; *Cyrteuchrum* Semenov-Tian-Shanskij, 1954; *Euchridium* Semenov-Tian-Shanskij, 1954; *Euchrum* Semenov-Tian-Shanskij, 1954; *Homaleuchrum* Semenov-Tian-Shanskij, 1954; *Irenula* Semenov-Tian-Shanskij & Nikol'skaya, 1954; *Zarudnidium* Semenov-Tian-Shanskij, 1954; *Zarudnium* Semenov-Tian-Shanskij, 1954. Currently, only *Colpopyga* Semenov-Tian-Shanskij, 1954 is considered as a valid genus (Rosa 2017), as recently confirmed by means of molecular analyses (Pauli *et al.* 2019). All other Semenov-Tian-Shanskij's genera were synonymised with *Hedychridium* and treated as species groups by Lisenmaier (1968). The subgenus *Prochridium* Lisenmaier, 1968 was upgraded to genus rank by Kimsey & Bohart (1991), but we here follow Lisenmaier's (1994, 1999) classification and consider it with subgeneric status only for practical reasons, as already did in Rosa *et al.* (2015).

Catalogue of *Hedychridium* types described by Lisenmaier and deposited in his collection

Subgenus *Hedychridium* s. str.

Hedychridium (*Hedychridium*) *aheneum feritatum* Lisenmaier, 1959b
(Fig. 1A–1E)

Hedychridium aheneum feritatum Lisenmaier, 1959b: 235 (descr.); 1969: 352 (cat., *incrassatum* group).
Hedychridium feritatum: Rosa 2020: 462 (elevated to species rank), 473 (figs 1, 3, 5).

Type locality. Palestine: “Palästina, ♂ Type und Paratype Coll. m., Paratypen Coll. Bytinski-Salz (verschiedene Fundorte [=different locations], VII.-VIII.”).

Holotype, ♂: Ruhama Palestine 29.8.1949 leg. Bytinski-Salz // ♂ Type *Hedychridium* Ab. *aheneum feritatum* Lins. Lisenmaier det. 1959 // 183 // NML_ENT GBIF_Chr0010251 (ex type-collection).

Paratype, ♂: Palestine Kfor Ato [locality not found] 8.7. leg. Bytinski-Salz // ♂ Paratype *Hedychridium* Ab. *aheneum feritatum* Lins. Lisenmaier det. 1959 // NML_ENT GBIF_Chr0010243 (ex synoptic collection).

Remarks. In the type-collection, Lisenmaier labelled a female specimen as the allotype bearing the following labels: Israel Haifa 20.6.65 leg. Schlaefle // ♀ Allotype *Hedychridium aheneum feritatum* Lins. det. Lisenmaier 1965. This specimen was collected after the original description and does not belong to the type series. *Hedychridium feritatum* was upgraded to species rank by Rosa (2020).

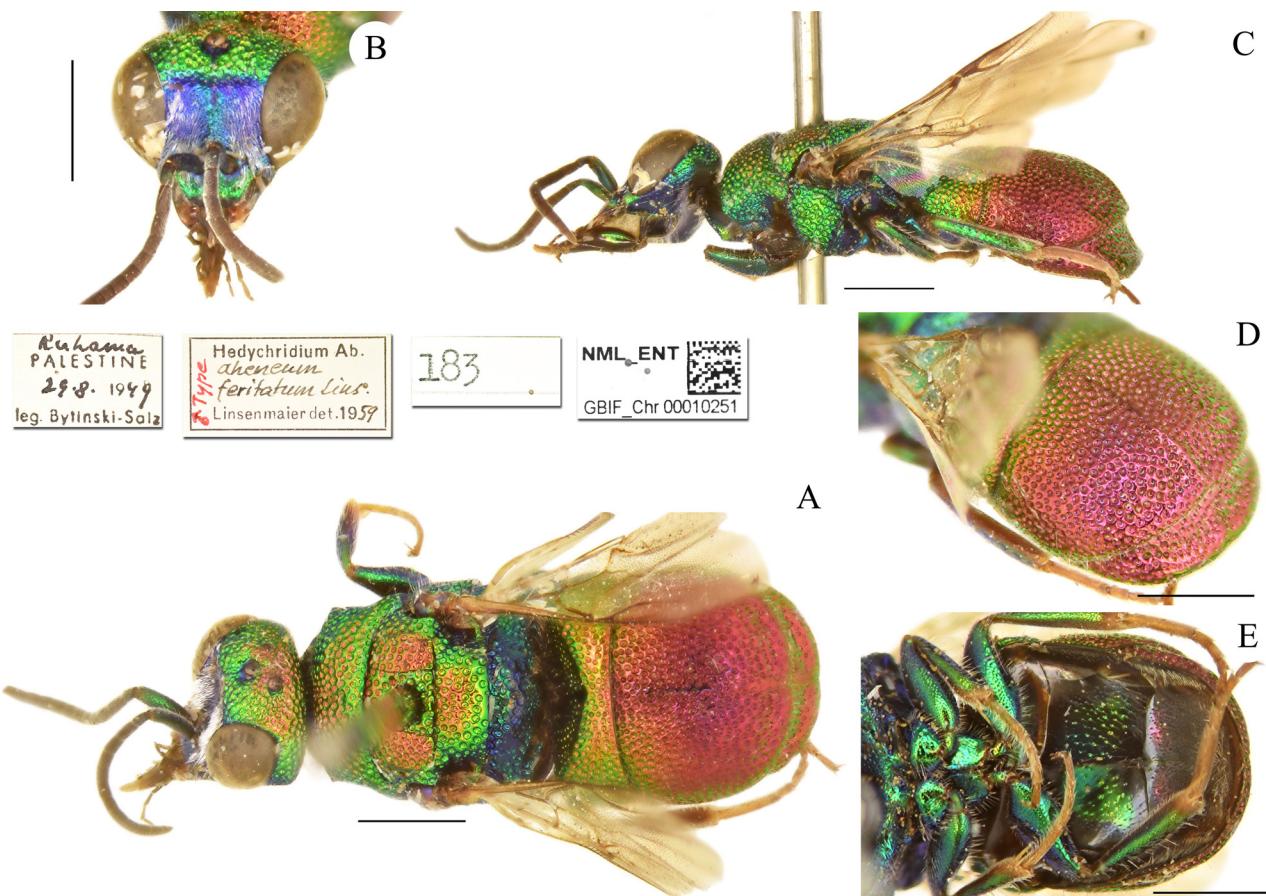

FIGURE 1. *Hedychridium aheneum feritatum* Linsenmaier, 1959b, holotype, male. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, postero-lateral view. E) Metasoma, ventral view. Scale bar 1 mm.

***Hedychridium atratum* Linsenmaier, 1968**

(Fig. 2A–2F)

Hedychridium (*Hedychridium*) *atratum* Linsenmaier, 1968: 129 (descr., *monochroum* group); 1987: 141 (allotype design., descr., diagn.).

Holopyga (*Chamaeholopyga*) *atrata*: present paper.

Type locality. Turkey: “Klein-Asien, Mut, V.67, leg. Schmidt, ♀ Type in Coll. m., ♀ Paratype in Coll. Schmidt”.

Holotype, ♀: Mut Asia minor 27.–30.V.1967 leg. Jos. Schmidt // ♀ Type *Hedychridium* Ab. *atratum* Lins. Linsenmaier det. 1968 // 299 // NML_ENT GBIF_Chr0009747 (ex type-collection).

Remarks. The allotype designation by Linsenmaier (1987) is invalid because it was based on a specimen not included in the original description. Linsenmaier (1968) described this species in the *Hedychridium monochroum* group, nevertheless it belongs to *Chamaeholopyga* Linsenmaier, 1987. This species is strictly related to *Chamaeholopyga rubrinigra* Linsenmaier, 1987 from Israel. It can be separated from the latter by mesosomal punctuation largely separated with polished intervals (vs. dense punctuation, with contiguous punctures and without interspaces in *C. rubrinigra*). The genus *Chamaeholopyga* deserves the generic status, but this will be discussed in a forecoming paper focused on Chrysididae genera.

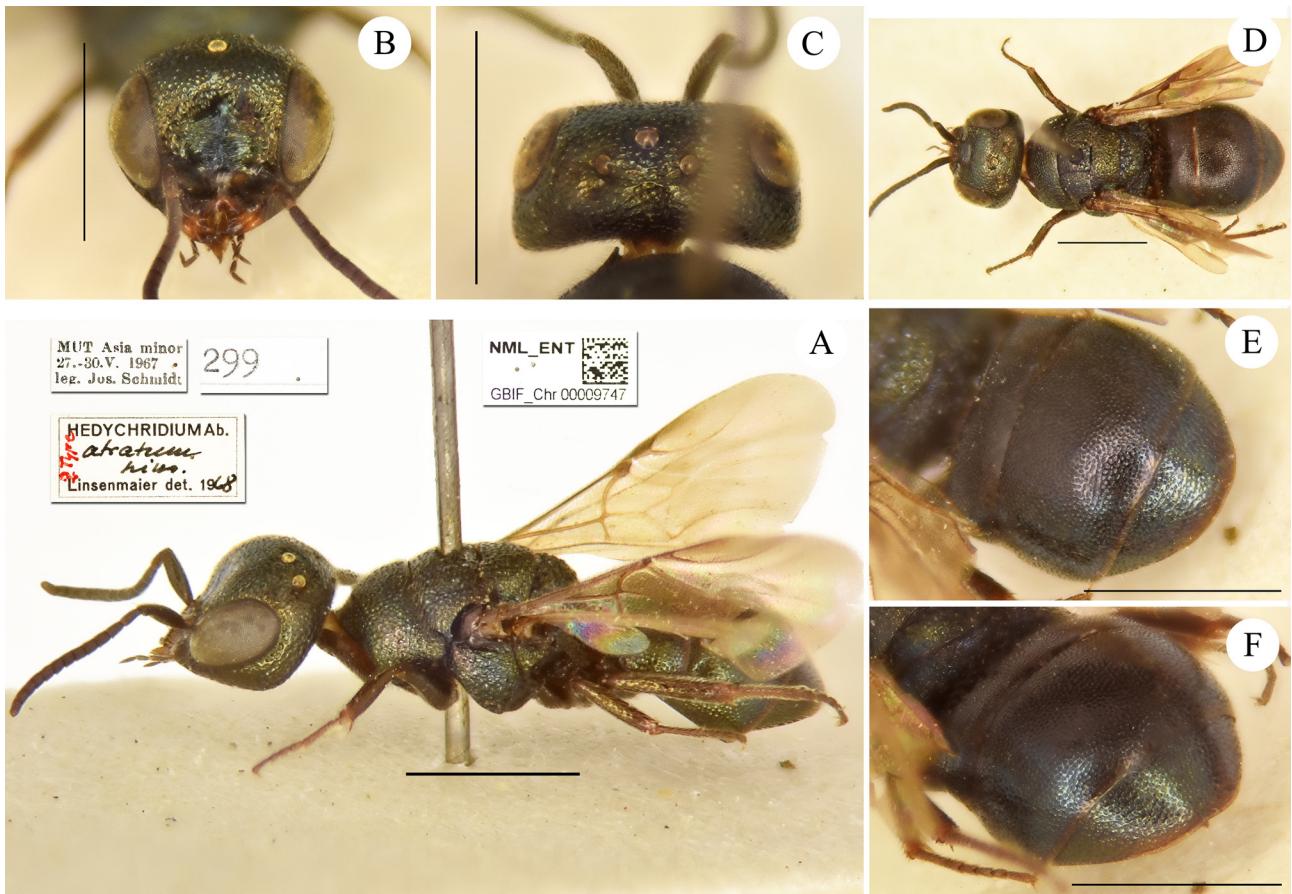

FIGURE 2. *Hedychridium atratum* Linsenmaier, 1968, holotype, female. A) Habitus, lateral view. B) Head, frontal view. C) Head, dorsal view. D) Habitus, dorsal view. E) Metasoma, postero-lateral view. F) Metasoma, postero-lateral view. Scale bar 1 mm.

***Hedychridium biskranum* Linsenmaier, 1999**

(Fig. 3A–3F)

Hedychridium (*Hedychridium*) *biskranum* Linsenmaier, 1999: 84 (key, *Hedychridium roseum-sculpturatum* group), 85 (descr.), 88 (fig. 144).

Type locality. Algeria: “Algerien, Biskra 25.V.1948, R.M. Näf, ♀ Type (Holotypus) Coll. m.”.

Holotype, ♀: Biskra, Algerie, 25.V.1948, collect. Naef // ♀ Type *Hedychridium* Ab. *biskranum* Lins. Linsenmaier det. 1998 // 513 // NML_ENT GBIF_Chr0011418 (ex type-collection).

***Hedychridium brevifronte* Linsenmaier, 1968**

(Fig. 4A–4E)

Hedychridium (*Hedychridium*) *brevifronte* Linsenmaier, 1968: 30 (descr., *ardens* group); 1969: 351 (cat.).

Type locality. Palestina: “Palästina, ♂ Type Jerusalem, leg. Houska, in Coll. m.”.

Holotype, ♂: Jerusalem 23.IV.44 Palestina Houska lgt. // ♂ Type *Hedychridium* Ab. *brevifronte* Lins. Linsenmaier det. 1963 // 218 // NML_ENT GBIF_Chr0009505 (ex type-collection).

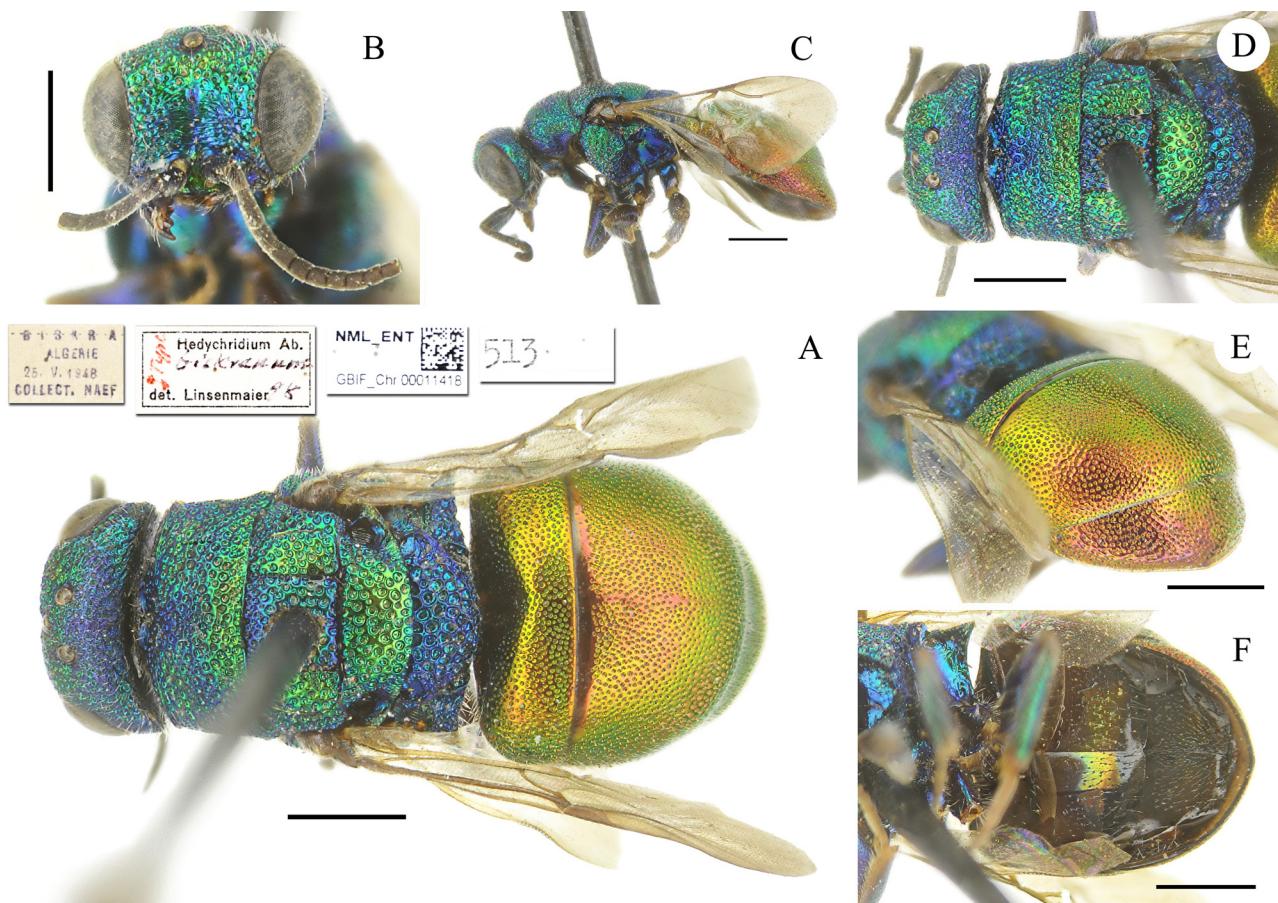

FIGURE 3. *Hedychridium biskranum* Linsenmaier, 1999, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Head and mesosoma, dorsal view. E) Metasoma, postero-lateral view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium buyssoni interrogatum Linsenmaier, 1959a

(Fig. 5A–5D)

Hedychridium (Hedychridium) buyssoni interrogatum Linsenmaier, 1959a: 50 (descr.), 187 (cat.).

Hedychridium (Hedychridium) interrogatum: Linsenmaier 1968: 26 (raised to species rank, *ardens* group).

Type locality. Cyprus: “Cypern. ♀ Type, ♂ Allotype, ♀ Paratype Coll. m. (Akrotizi-Bay und Limassol, VIII.1951/54)”.

Holotype, ♀: Cypern 2.VIII.51 Akrotizi-Bay leg. Mavromoustakis Coll. Linsenmaier // ♀ Type *Hedychridium Ab. buyssoni* ssp. *interrogatum* Lins. Linsenmaier det. 1959 // 50 // *Hedychridium Ab. interrogatum* Lins. Linsenmaier det. 1966 // NML_ENT GBIF_Chr0008783 (ex type-collection).

Allotype, ♂: Cyprus nr. Limassol 19.8.1954 Mavromoustakis leg. // ♂ Allotype *Hedychridium Ab. buyssoni* Ab. *interrogatum* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chr0008784 (ex type-collection).

Paratype, 1♀: Yermasoya River Cyprus 5.8.1957 leg. Mavromoustakis // ♀ Paratype *Hedychridium Ab. buyssoni* Ab. ssp. *interrogatum* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chr0008785. // *Hedychridium Ab. interrogatum* Lins. Linsenmaier det. 1966.

Remarks. In the general collection there are other specimens collected by Mavromoustakis at the type locality (near Limassol and along the Yermasoya river in 1953 and 1957) which we exclude from the type series, because the identification label handwritten by Linsenmaier was placed in 1966 and there are no evidences that he examined other specimens than that cited in the original description.

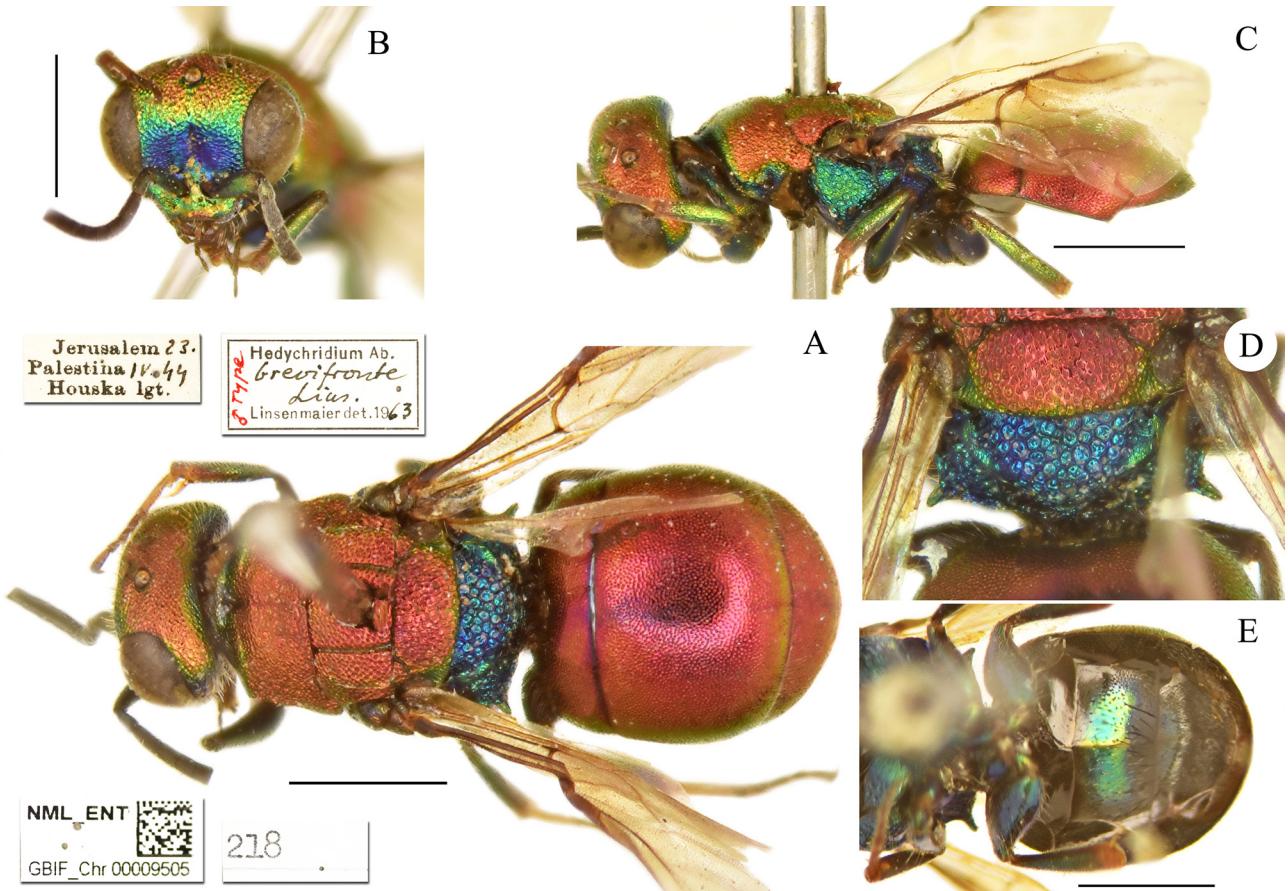

FIGURE 4. *Hedychridium brevifronte* Linsenmaier, 1968, holotype, male. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Scutellum, metanotum and propodeum, posterior view. E) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium buyssoni sparsapunctulatum Linsenmaier, 1959a

(Fig. 6A–6F)

Hedychridium (*Hedychridium*) *buyssoni* *sparsapunctulatum* Linsenmaier, 1959a: 50 (descr.), 187 (cat.); 1968: 26 (distr., *ardens* group).

Hedychridium (*Hedychridium*) *algirum* (Mocsáry, 1889): Linsenmaier 1999: 62 (synonymised).

Type locality. Algeria, Tunisia: “Algerien, Tunesien. ♀ Type ♂ Allotype (Algerien, El Kantara V.1954) und Paratypes Coll. m.”.

Holotype, ♀ and **allotype**, ♂ [glued on the same label]: Algerien El Kantara 15.5.54 leg. Linsenmaier // Type ♀ u. Allotype ♂ *Hedychridium* Ab. *buyssoni* ssp. *sparsapunctulatum* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chr0008762 (ex type-collection).

Paratypes, 17♂: Algerien El Kantara 6.54 leg. Mohammed [coll.] Linsenmaier // ♂ *Hedychridium* Ab. *buyssoni* ssp. *sparsapunctulatum* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chr0008766-8768; 3♂: Algerien 10.5.54 Les Tamarins leg. Linsenmaier // *Hedychridium* Ab. *buyssoni* ssp. *sparsapunctulatum* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chr0008769-8770; 4 exx.: Tunesien Kairouan Santschi X.16 Coll. Linsenmaier // *Hedychridium* Ab. *buyssoni* ssp. *sparsapunctulatum* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chr0008764-8765; 1 ex.: Tunesien Gabes IV.30 Dr. Meyer Coll. Linsenmaier // *Hedychridium* Ab. *buyssoni* ssp. *sparsapunctulatum* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chr0008763.

Remarks. Linsenmaier (1999) synonymised *Hedychridium buyssoni* *sparsapunctulatum* with *H. algirum* (Mocsáry, 1889).

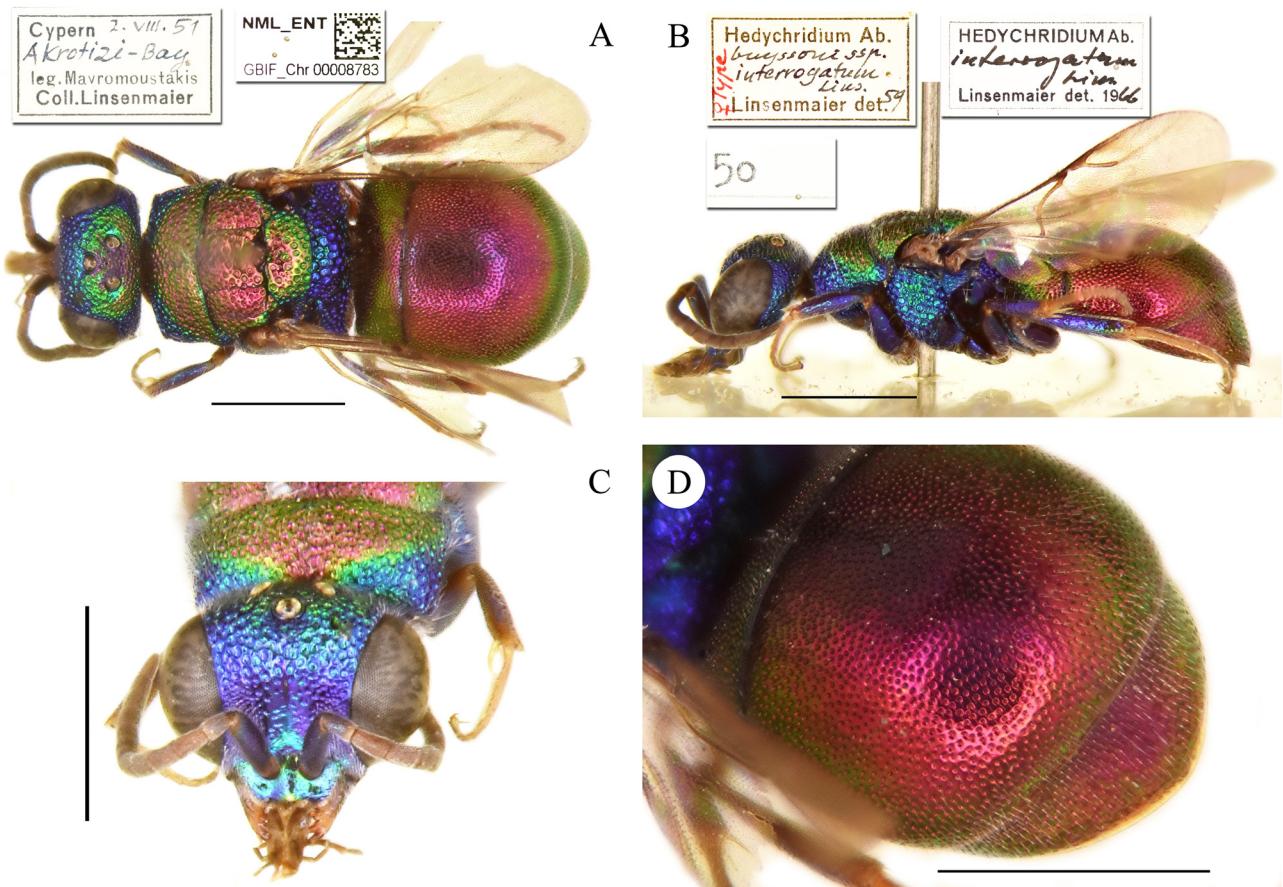

FIGURE 5. *Hedychridium buyssoni interrogatum* Lisenmaier, 1959a, holotype, female. A) Habitus, dorsal view. B) Habitus, lateral view. C) Head, frontal view. D) Metasoma, postero-lateral view. Scale bar 1 mm.

Hedychridium bytinskii Lisenmaier, 1959a

(Fig. 7A–7E)

Hedychridium (*Hedychridium*) *bytinskii* Lisenmaier, 1959a: 45 (key), 53 (descr.), 187 (cat.); 1968: 25 (descr., diagn., *ardens* group); 1969: 351 (cat.); 1999: 60 (key), 62 (diagn.).

Type locality. Palestine: “Palästina. ♀ Type Coll. m. (Bet Lid, IV., leg. Bytinski-Salz)”.

Holotype, ♀: Palestine Bet Lid 1.IV. leg. Bytinski-Salz // Type ♀ *Hedychridium* Ab. *bitinskii* Lins. Lisenmaier det. 1959 // 48 // NML_ENT GBIF_Ch0008571 (ex type-collection).

Remarks. Lisenmaier (1968: 25) added some diagnostic information, distributional data and synonymised *Hedychridium projucundum* Lisenmaier, 1959a with *Hedychridium bytinskii* Lisenmaier, 1959a.

Hedychridium caireanum Lisenmaier, 1968

Hedychridium (*Hedychridium*) *caireanum* Lisenmaier, 1968: 33 (descr., *incrassatum* group).

Type locality. Egypt: “Ägypten, Kairo, ♂ Type (Dahschour), V.58, leg Pulawski, in Coll. m.”.

Remarks. The type is apparently lost. In the type-collection was found a label printed by Lisenmaier with the information: “*caireanum* verschollen” [=caireanum is lost]. This species was not mentioned in the revision of the northern African species (Lisenmaier 1999).

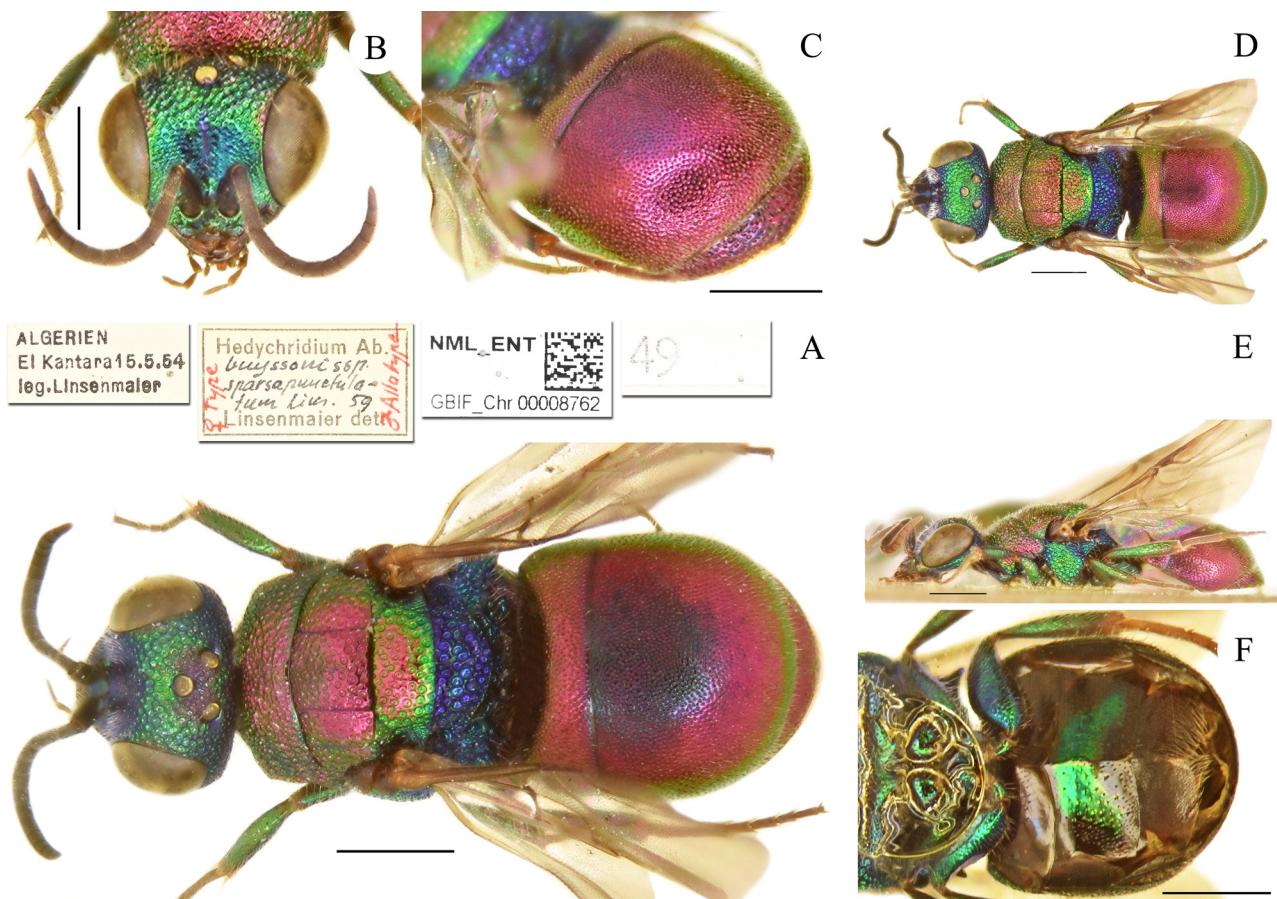

FIGURE 6. *Hedychridium buyssoni sparsapunctulatum* Linsenmaier, 1959a, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Metasoma, postero-lateral view. Allotype, male D) Habitus, lateral view. E) Habitus, lateral view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium canariense Linsenmaier, 1968

(Fig. 8A–8E)

Hedychridium (Hedychridium) canariense Linsenmaier, 1968: 29 (descr., *ardens* group), *nec* García Mercet 1915 (García Mercet's species was originally described as *Hedychridium canariensis*, not in accordance with the neuter gender of the genus *Hedychridium* Abeille de Perrin).

Hedychridium (Hedychridium) canarianum Linsenmaier, 1987: 140 (replacement name for *Hedychridium canariense* Linsenmaier, 1968, *nec* García Mercet 1915); 1993: 722 (diagn.).

Type locality. Canary Isl.: “Tenerife, Los Christianos, IV.64, leg. Guichard, ♀ Type in Brit. Mus., ♀ Paratype in Coll. m.”.

Paratype, ♀: Canaries: Tenerife Los Christianos 17.IV.1964 K.M. Guichard B.M. 1965-161 // ♀ Paratype *Hedychridium Ab. canariense* Lins. Linsenmaier det. 1966 // *Hedychridium Ab. canaricum* [!] nom. nov. det. Linsenmaier 77 // NML_ENT GBIF_Chr0009157 (ex synoptic collection).

Remarks. Linsenmaier (1987) replaced the name *Hedychridium canariense* Linsenmaier, 1968, *nec* García Mercet 1915 into *H. canarianum* Linsenmaier, 1987.

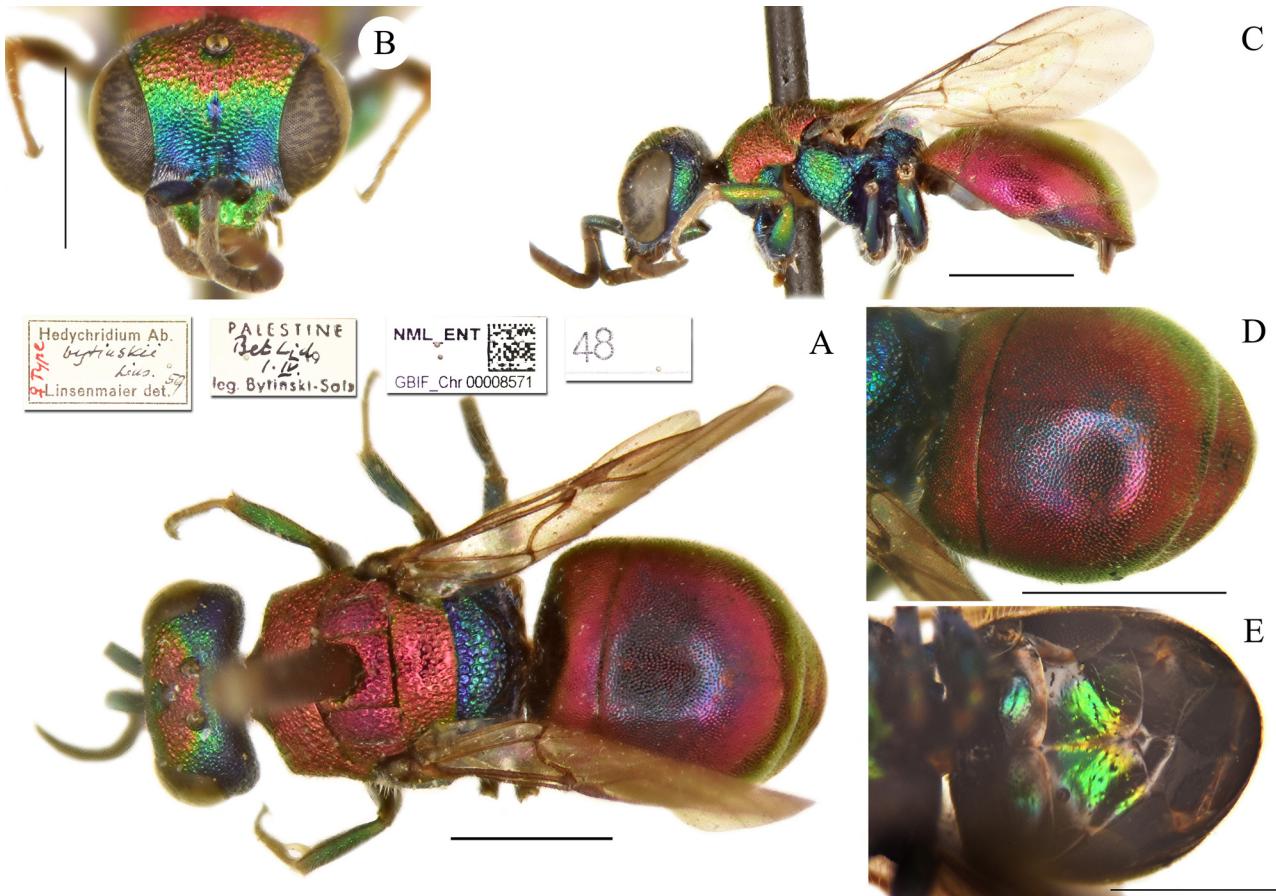

FIGURE 7. *Hedychridium bytinskii* Linsenmaier, 1959a, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, dorsal view. E) Metasoma, ventral view. Scale bar 1 mm.

***Hedychridium chloropygum berberiacum* Linsenmaier, 1959a**

(Fig. 9A–9B)

Hedychridium (Hedychridium) chloropygum berberiacum Linsenmaier, 1959a: 59 (descr., roseum group), 187 (cat.), 198 (fig. 116); 1999: 83 (key, roseum-sculpturatum group), 84 (diagn.).

Type locality. Algeria, Morocco: “Nord-Afrika. ♂ Type (Algerien) Coll. m., ♀ Allotype (Marocco) Coll. Naef, Paratypen Coll. Naef und Coll. m.”.

Holotype, ♂: Algerien Nemours Coll. Linsenmaier // ♂ Type *Hedychridium Ab. chloropygum* B.[Buysson] ssp. *berberiacum* Linsenmaier 1959 // 66 // NML_ENT GBIF_Chr0010982 (ex type-collection).

Allotype, ♀: Ifrane, Moyen Atlas, Maroc, 24.VI.1847[!], Collect. Naef // ♀ Allotype *Hedychridium Ab. chloropygum* B. ssp. *berberiacum* Linsenmaier 1957 // NML_ENT GBIF_Chr0010983 (ex type-collection).

Paratypes, 1♂: Ifrane, Moyen Atlas, Maroc, 24.VI.1947, Collect. Naef // ♂ Paratype *Hedychridium Ab. chloropygum* B. ssp. *berberiacum* Linsenmaier 1957 // NML_ENT GBIF_Chr0010986; 1♂: Maroc Ifrane VI.1949 Coll. Linsenmaier // ♂ Paratype *Hedychridium Ab. chloropygum* B. ssp. *berberiacum* Linsenmaier 1957 // NML_ENT GBIF_Chr0010987.

***Hedychridium chloropygum densus* Linsenmaier, 1959a**

(Fig. 10A–10D)

Hedychridium (Hedychridium) chloropygum densus Linsenmaier, 1959a: 59 (descr., roseum group), 187 (cat.).
Hedychridium caputaurum Trautmann & Trautmann, 1919: Arens 2010: 406 (synonymised).

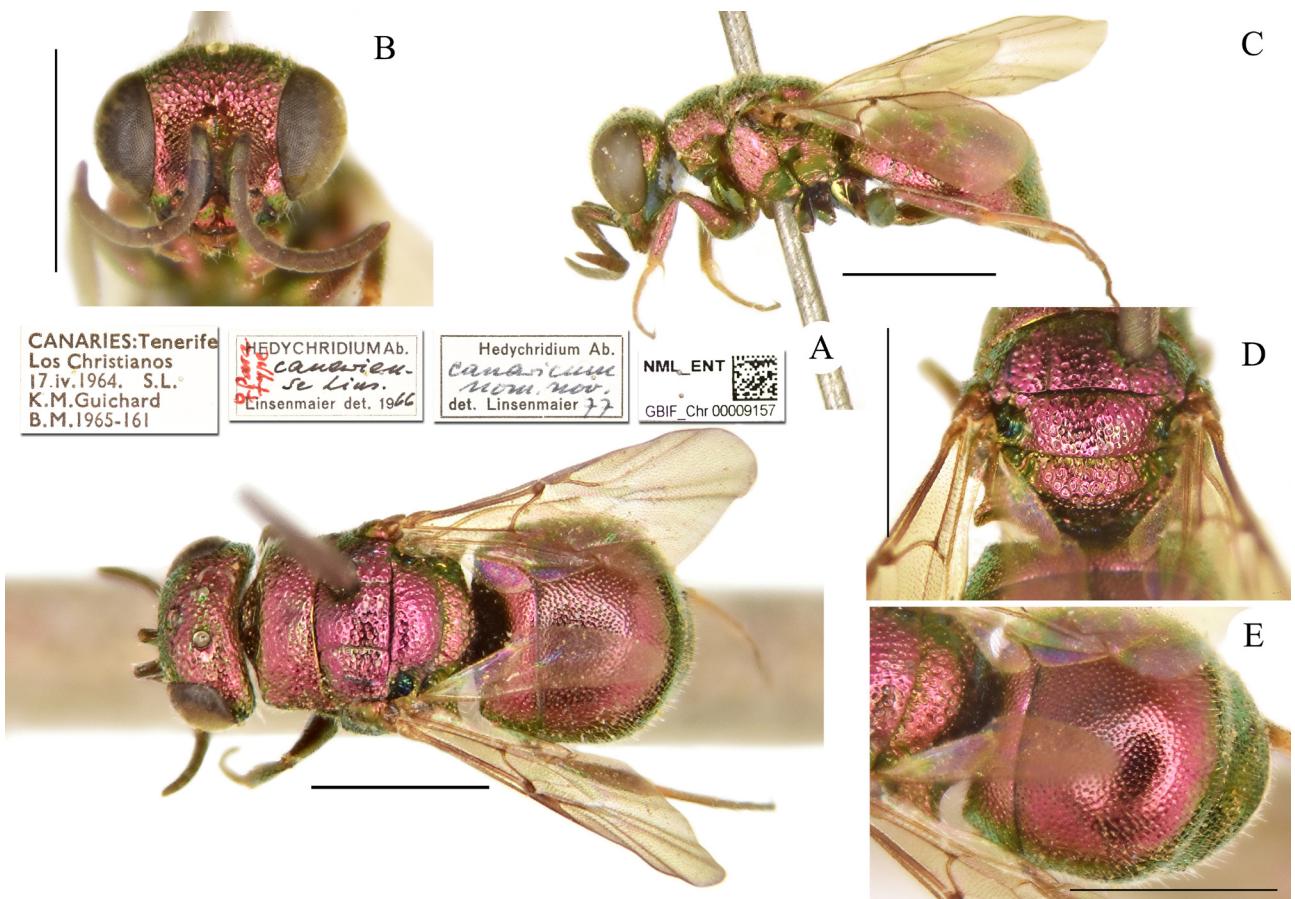

FIGURE 8. *Hedychridium canariense* Linsenmaier, 1968, paratype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Mesosoma, posterior view. E) Metasoma, lateral view. Scale bar 1 mm.

FIGURE 9. *Hedychridium chloropygum berberiacum* Linsenmaier, 1959a, holotype, male. A) Habitus, lateral view. B) Genital capsule. Scale bar 1 mm.

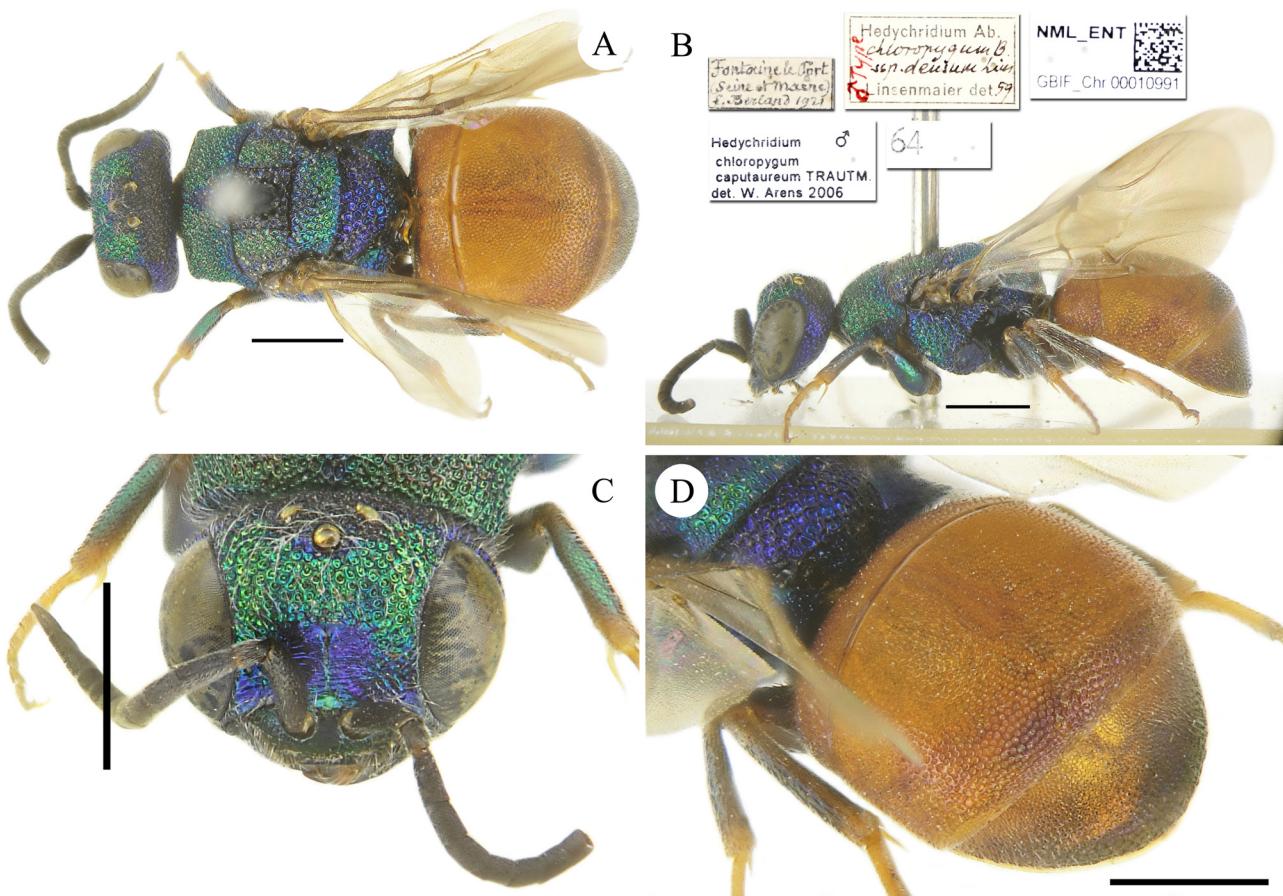

FIGURE 10. *Hedychridium chloropygum densum* Lisenmaier, 1959a, holotype, male. A) Habitus, dorsal view. B) Habitus, lateral view. C) Head, frontal view. D) Metasoma, postero-lateral view. Scale bar 1 mm.

Type locality. France: “Nord-Frankreich, ♂ Type (Seine-Marne) Coll. m.”.

Holotype, ♂: Fontaine le Port (Seine et Marne) F. Berland 1921 // ♂ Type *Hedychridium Ab. chloropygum* B. ssp. *densum* Lins. Lisenmaier det. 1959 // 64 // ♂ *Hedychridium chloropygum caputaureum* Traut. det. W. Arens 2006 // NML_ENT GBIF_Ch0010991 (ex type-collection).

Remarks. Arens (2010) synonymised *Hedychridium chloropygum densum* Lisenmaier 1959a and *H. chloropygum spatium* Lisenmaier 1959a with *Hedychridium caputaureum* Trautmann & Trautmann, 1919.

Hedychridium chloropygum spatium Lisenmaier, 1959a

(Fig. 11A–11F)

Hedychridium (Hedychridium) chloropygum spatium Lisenmaier, 1959a: 59 (descr., roseum group), 187 (cat.), 198 (fig. 107); 1968: 36 (diagn., distr.); 1987: 142 (distr.).

Hedychridium chloropygum caputaureum Trautmann & Trautmann, 1919: Arens 2010: 406 (synonymised).

Type locality. Hungary, Rhodes, Sweden: “Ungarn, Rhodos, Schweden. ♂ Type (Simontornya), ♀ Allotype (Rhodos) Coll. m., Paratypen Coll. m. und Museum Lund (Schweden)”.

Holotype, ♂: L. VII.15 Simontornya // 1924 Hung. occ. // ♂ Type *Hedychridium chloropygum* B. ssp. *spatium* Lins. Lisenmaier det. 1959 // 65 // NML_ENT GBIF_Ch0010961 (ex type-collection).

Allotype, ♀: Rodi Egeo Mai 1939 Dr. R. Meyer // ♀ Allotype *Hedychridium chloropygum* B. ssp. *spatium* Lins. Lisenmaier det. // NML_ENT GBIF_Ch0010962 (ex type-collection).

Paratype, 1 ex.: SH-Väster hejde Sigreips 11.8.31 CB Gaunitz // *Hedychridium chloropygum* B. ssp. *spatium* Lins. Lisenmaier det. 1959 // NML_ENT GBIF_Ch0010966.

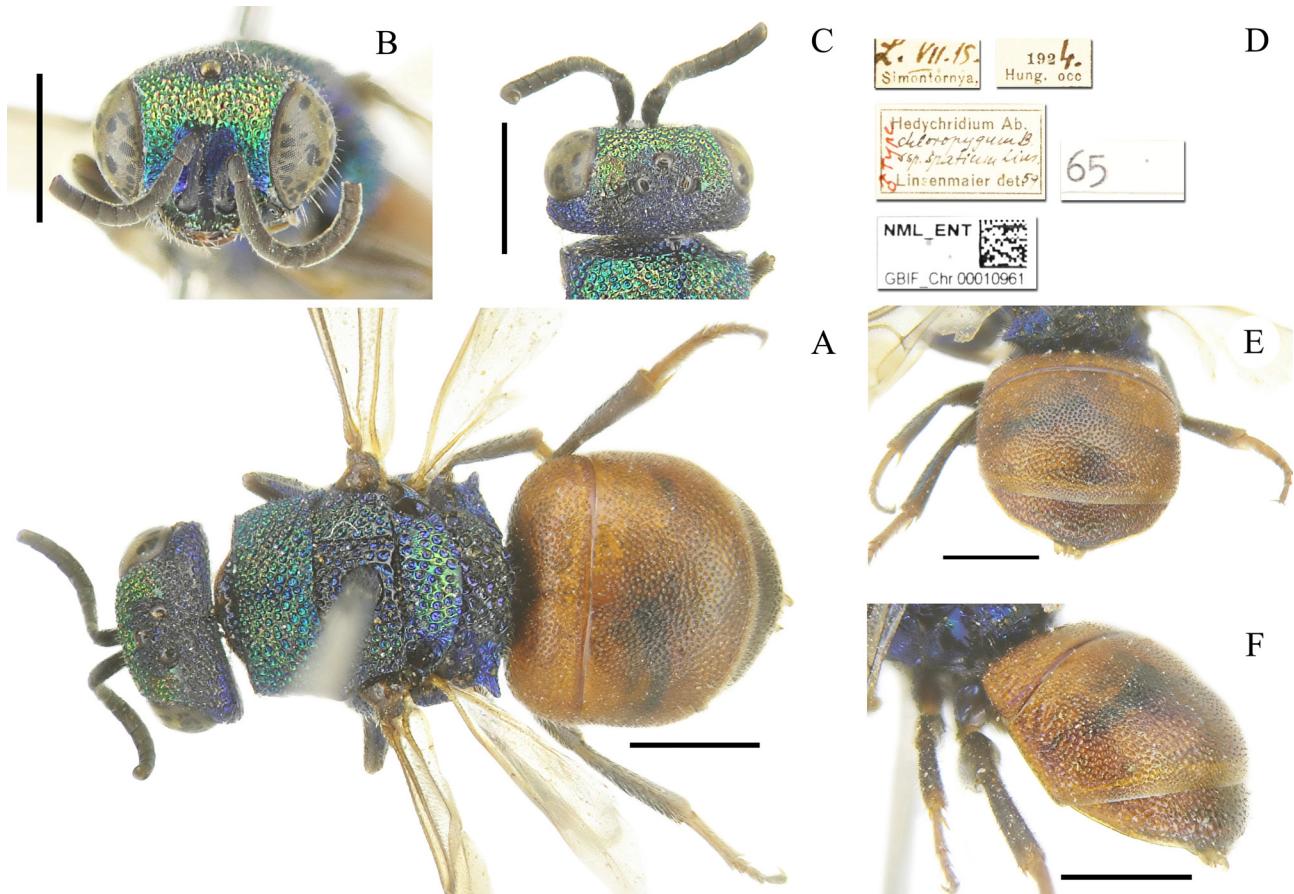

FIGURE 11. *Hedychridium chloropygum spatium* Linsenmaier, 1959a, holotype, male. A) Habitus, dorsal view. B) Head, frontal view. C) Head, dorsal view. D) Labels. E) Metasoma, posterior view. F) Metasoma, postero-lateral view. Scale bar 1 mm.

Remarks. Arens (2010) synonymised *Hedychridium chloropygum spatium* with *Hedychridium caputaureum* Trautmann & Trautmann, 1919.

Hedychridium coriaceum jendoubense Linsenmaier, 1987 (Fig. 12A–12E)

Hedychridium (*Hedychridium*) *coriaceum jendoubense* Linsenmaier, 1987: 140 (descr., *ardens* group); 1999: 80 (key, *coriaceum* group), 88 (fig. 143).

Type locality. Tunisia: “Tunesien, Jendouba, V. 1973 (Gusenleitner und Schmidt), ♀ Type ♂ Allotype Coll. m.”.

Holotype, ♀: Jendouba 10 km Nord Tunesia 15.5.1973 leg. J. Gusenleitner // ♀ Type *Hedychridium* Ab. *coriaceum jendoubense* Lins. Linsenmaier 1977 // 417 // NML_ENT GBIF_Chro0009320 (ex type-collection).

Allotype, ♂: Tunesien Jendouba 10 km n. 15.V.1973 leg. Jos. Schmidt // ♂ Allotype *Hedychridium* Ab. *coriaceum jendoubense* Lins. Linsenmaier 1977 // NML_ENT GBIF_Chro0009321 (ex type-collection).

Hedychridium cupritibiale Linsenmaier, 1987 (Fig. 13A–13E)

Hedychridium (*Hedychridium*) *cupritibiale* Linsenmaier, 1987: 139 (descr., *ardens* group); 1997: 254 (diagn., allotype desig.), 255 (tab.), 288 (figs 27, 28).

Type locality. Spain: “Spanien, Granada, Sierra Chaparral 1100 m, ♀ Type leg. und Coll. Perraudin”.

Holotype, ♀: Carro del Chupa [sic] 14.VI.1986 1100m coll. W. Perraudin Prov Granada coll. W. Perraudin // ♀ Type *Hedychridium Ab. cupritibiale* Lins. Lisenmaier det. 1987 // 415 // NML_ENT GBIF_Ch0009006 (ex type-collection)

Remarks. The holotype is described from Cerro del Chupa, a small locality in Sierra del Chaparral, in Granada Province, Spain. Lisenmaier's (1997) designation of the allotype is invalid, since based on a male collected in 1988, not belonging to the original type series, bearing the following information: Granada Sierra D. Chaparral 1100m 16.6.88 leg. Lisenmaier // ♂ Paratype *Hedychridium Ab. cupritibiale* Lins. Lisenmaier 1991.

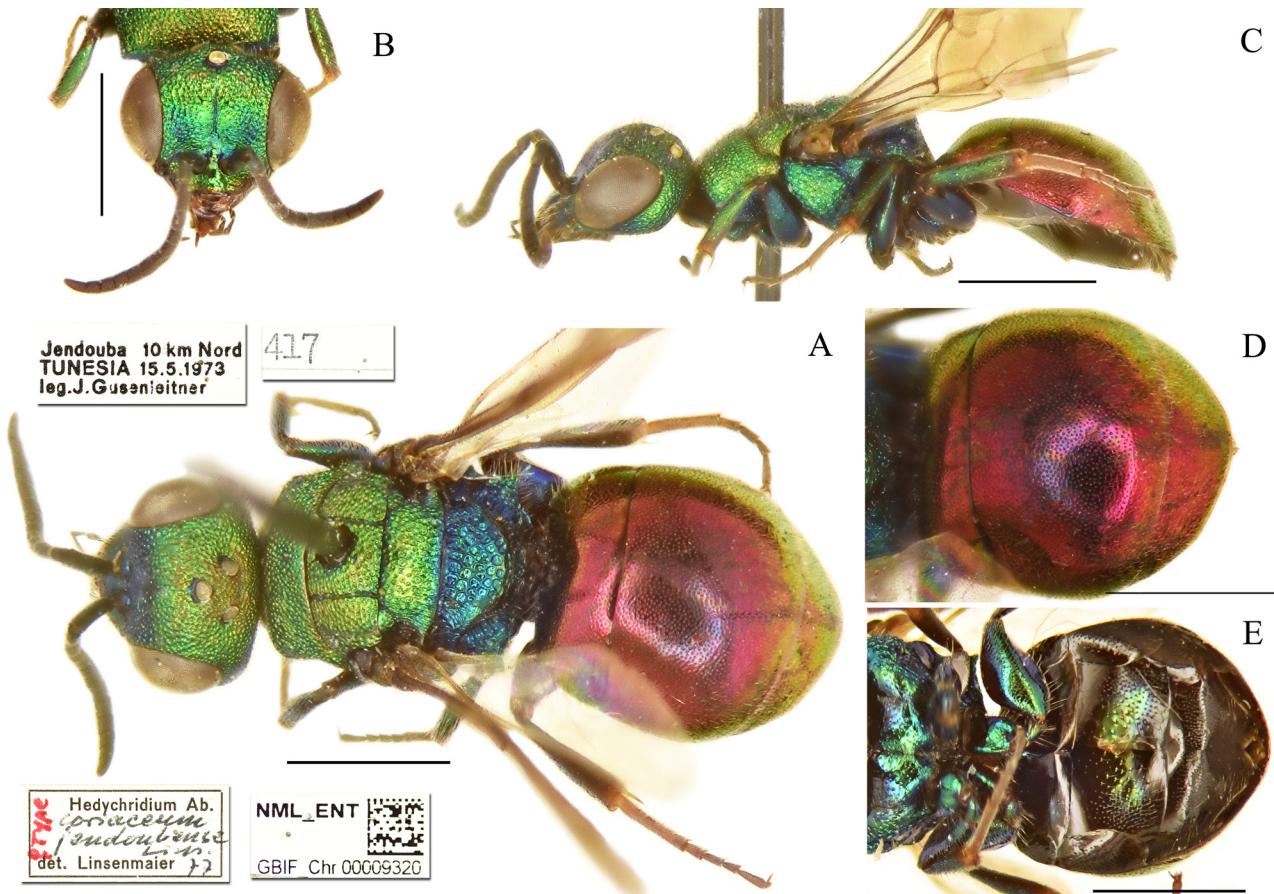

FIGURE 12. *Hedychridium coriaceum jendoubense* Lisenmaier, 1987, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, dorsal view. E) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium discordum Lisenmaier, 1959a

(Fig. 14A–14E)

Hedychridium (Hedychridium) discordum Lisenmaier, 1959a: 45 (key), 50 (descr.), 187 (cat.); 1968: 26 (distr.); 1999: 60 (key), 62 (diagn.).

Type locality. Morocco: “Marocco, ♀ Type Coll. m. (Plateau de Oukaimeden 2500m, V.1953, leg. Teunissen)”.

Holotype, ♀: Maroc Plateau de Oukaimeden 2500m 29.V.1953 Teunissen // ♀ Type *Hedychridium discordum* Lins. Lisenmaier det. 1959 // 54 // NML_ENT GBIF_Ch0008632 (ex type-collection).

Hedychridium dismorphum Lisenmaier, 1959a

(Fig. 15A–15F)

Hedychridium (Hedychridium) dismorphum Lisenmaier, 1959a: 44 (key); 52 (descr.); 187 (cat.); 216 (fig. 675); 1968: 33 (diagn., monochrom group).

Hedychridium (Hedychridium) parkanense dismorphum: Linsenmaier 1999: 80 (key, *coriaceum* group); 81 (diagn., distr.).

Type locality. Algeria: “Algerien. ♀ Type (Biskra, III.1931, leg. Meyer) Coll. m.”.

Holotype, ♀: Biskra S Algérie III.1931 Dr. R. Meyer // ♀ Type *Hedychridium Ab. dismorphum* Lins. Linsenmaier det. 1959 // 57 // NML_ENT GBIF_Ch0009807 (ex type-collection).

Remarks. Linsenmaier in the type-collection labelled a male specimen as the allotype, with the following labels: Tunesien Jendouba 10 km N. 15.V.1978 leg. Jos. Schmidt // ♂ Allotype *Hedychridium dismorphum* Lins. det. Linsenmaier 1977. This specimen has no type status since it was collected after the description and does not belong to the original type series.

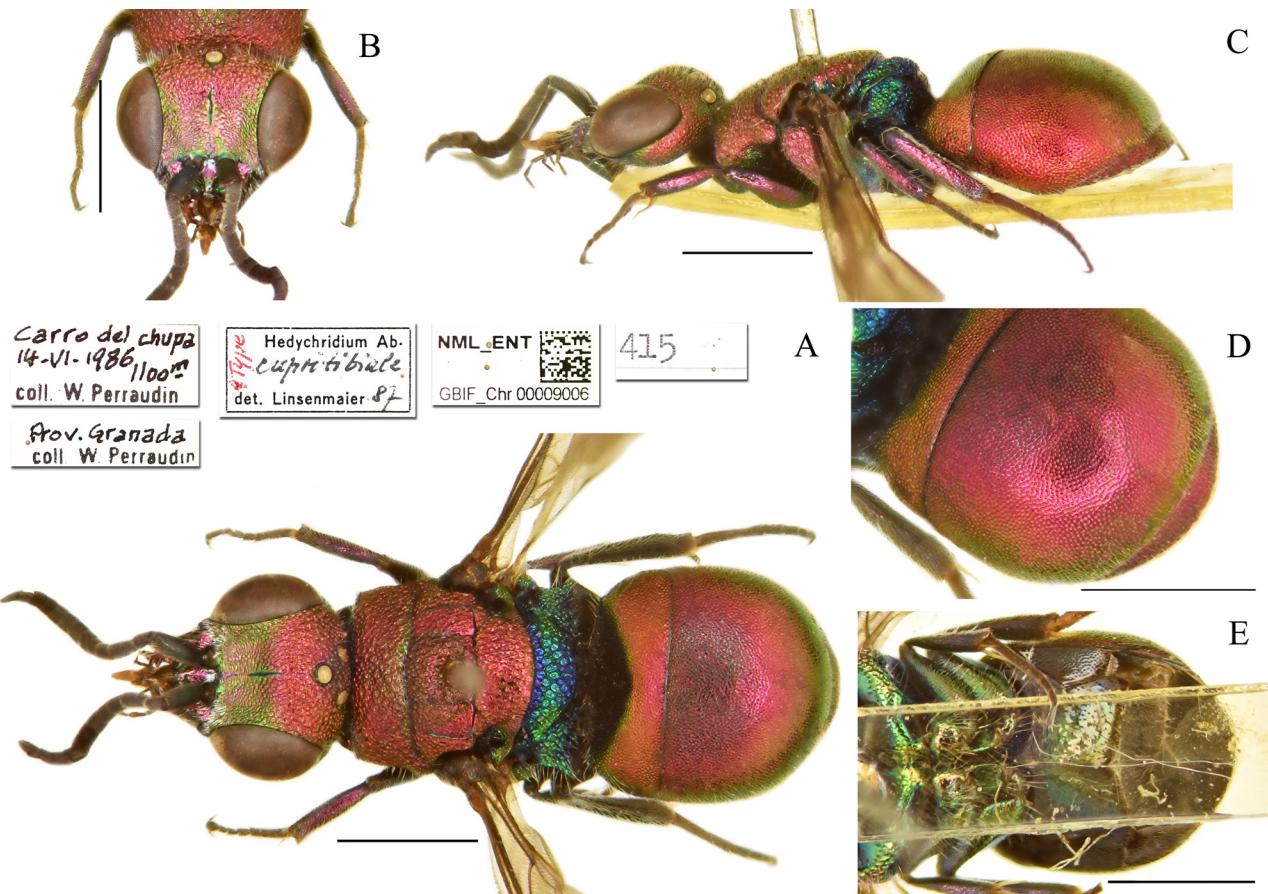

FIGURE 13. *Hedychridium cupritibiale* Linsenmaier, 1987, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, postero-lateral view. E) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium duplicatum Linsenmaier, 1999

(Fig. 16A–16E)

Hedychridium (Hedychridium) duplicatum Linsenmaier, 1999: 60 (key, *ardens* group), 67 (descr.).

Type locality. Lybia, Morocco, Tunisia: “Tunesien, Libyen, Marokko. Tunesien Gabes (30 km NW) 4.V.1973 J. Gusenleitner, ♀ Type (Holotypus), und Kasserine 14.V.1973 J. Schmidt; ♂ Allotype Coll. m., Paratype Coll. Schmidt; Paratypen Tunesien: Jendouba 11.IV.1981, leg. u. Coll. M. Schwarz; Bizerte 26.VI.1994, leg. u. Coll. Ch. Schmid-Egger; Djerba 9.II.1994, F. Hedychridium etnaense Lisenmaier, 1968

(Fig. 18A–18E)

Hedychridium (Hedychridium) etnaense Lisenmaier, 1968: 26 (descr., *ardens* group).

Type locality. Italy, Sicily: “Sizilien, ♂ Type vom Etna, leg. Bytinski-Salz, in Coll. m.”.

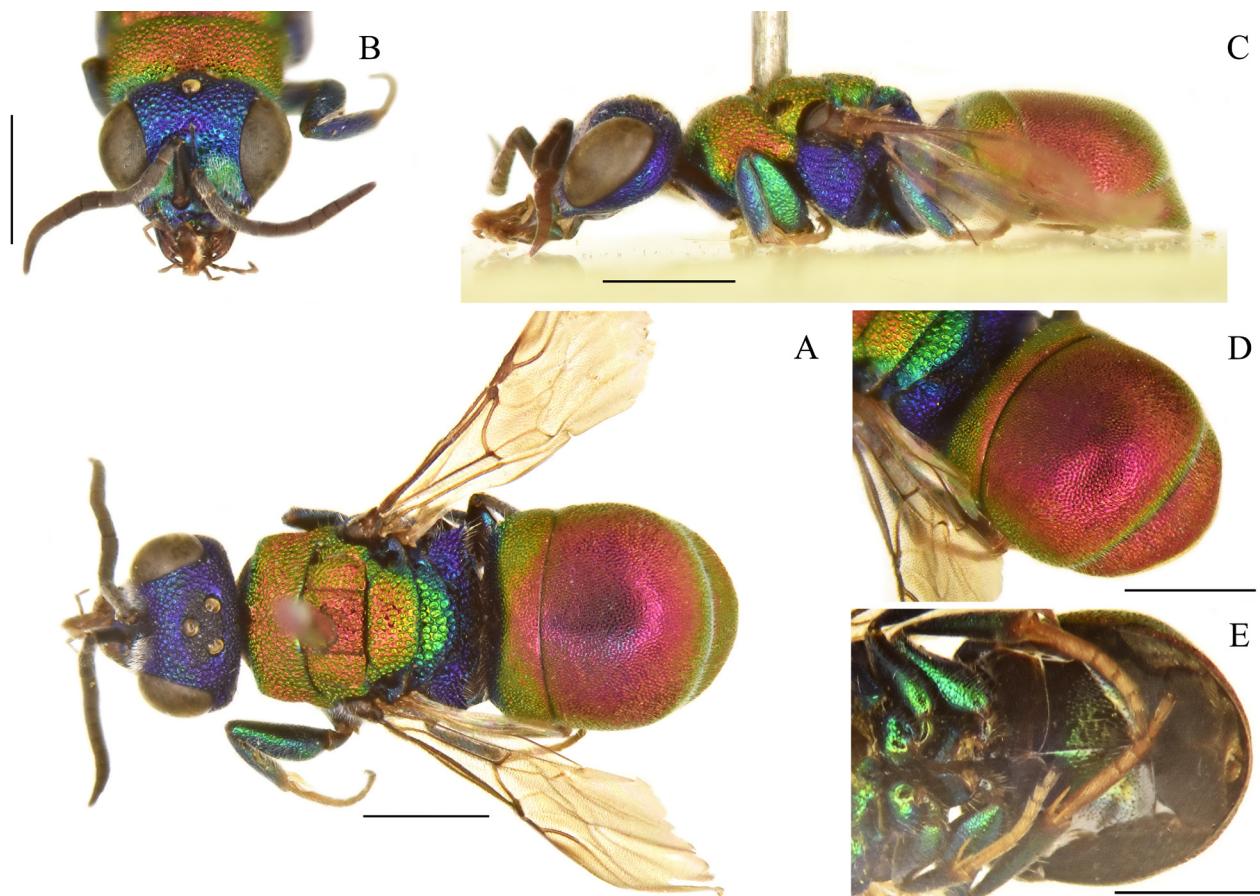

FIGURE 18. *Hedychrnidium etnaense* Linsenmaier, 1959a, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, postero-lateral view. E) Metasoma, ventral view. Scale bar 1 mm.

Holotype, ♂: Sicilia Etna 29.7.1956 1900m leg. Bytinski-Salz // ♂ Type *Hedychrnidium* Ab. *etnaense* Lins. Linsenmaier det. 1963 // 213 // NML_ENT GBIF_Chr0009032 (ex type-collection).

Hedychrnidium flavipes rugulosum Linsenmaier, 1959a

(Fig. 19A–19F)

Hedychrnidium (Hedychrnidium) flavipes rugulosum Linsenmaier, 1959a: 57 (descr.), 187 (cat.); 1968: 36 (distr., *flavipes* group); 1969: 353 (cat., *flavipes* group); 1999: 80 (diagn., distr.).
Colpopyga flavipes rugulosa: Rosa 2017: 300.

Type locality. Cyprus, Iran: “Cyprus, Iran. ♀ Type ♂ Allotype (Limassol und Eudhimon River, V., leg. Mavromoustakis), und ♂ Paratype (Kamal Abad) Coll. m.”.

Holotype, ♀: Cyprus 26.V.49 Limassol leg. Mavromoustakis Coll. Linsenmaier // ♀ Type *Hedychrnidium flavipes* Ev. *rugulosum* Lins. Linsenmaier det. 1959 (ex type-collection).

Allotype, ♂: Cyprus 9.V.51 Eudhimon River leg. Mavromoustakis Coll. Linsenmaier // ♂ Allotype *Hedychrnidium flavipes* Ev. *rugulosum* Lins. Linsenmaier det. 1959 (ex type-collection).

Paratype, 1♂: Kamal Abad 28.8.55 Coll. Linsenmaier // Paratype *Hedychrnidium flavipes* Ev. *rugulosum* Lins. Linsenmaier det. 1959.

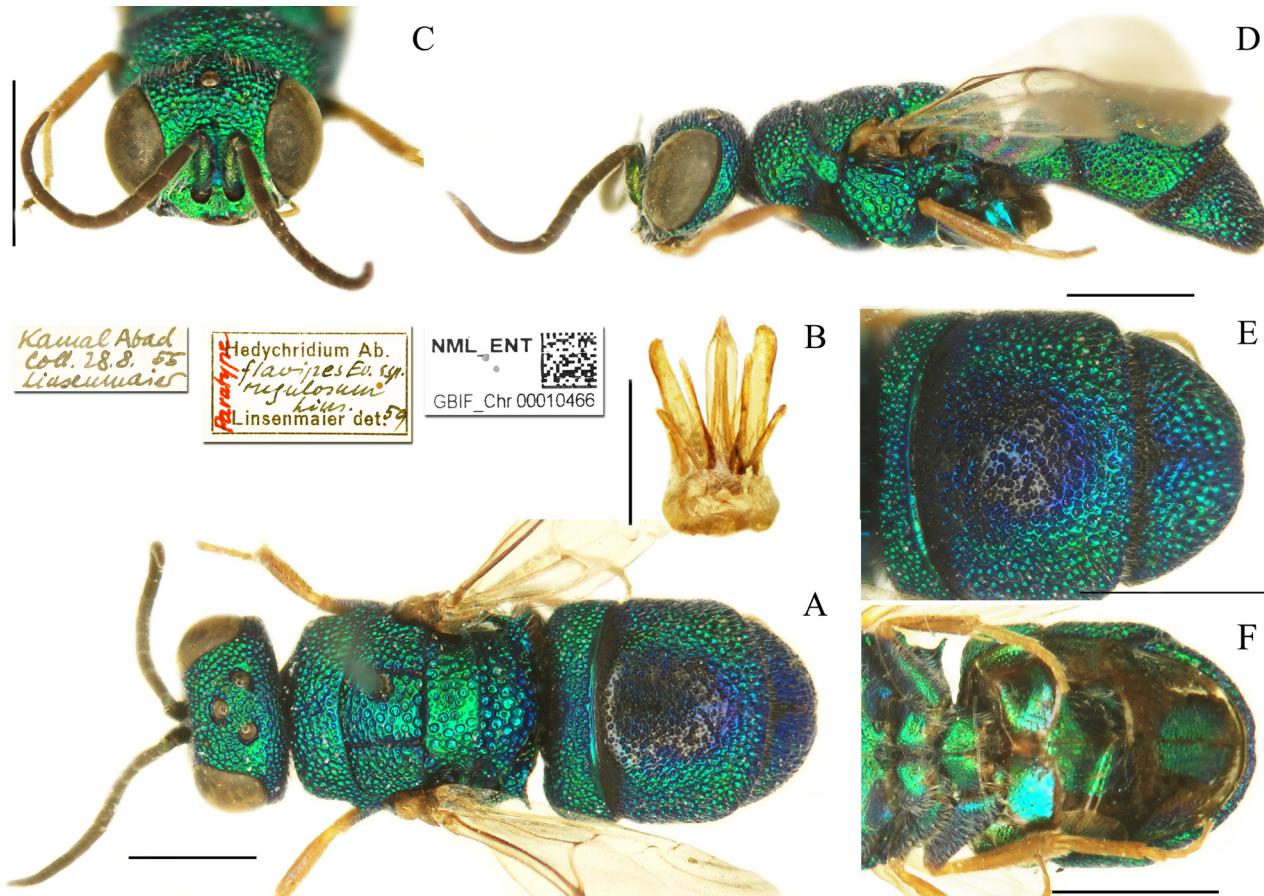

FIGURE 19. *Hedychridium flavipes rugulosum* Linsenmaier, 1959a, paratype, male. A) Habitus, dorsal view. B) Genital capsule. C) Head, frontal view. D) Habitus, lateral view. E) Metasoma, dorsal view. F) Metasoma, ventral view. Scale bar 1 mm.

***Hedychridium flavipes temperatum* Linsenmaier, 1959a**

(Fig. 20A–20E)

Hedychridium (Hedychridium) flavipes ssp. *temperatum* Linsenmaier, 1959a: 57 (descr.), 187 (cat.); 1969: 353 (cat., *flavipes* group); 1987: 142 (distr.); 1999: 79 (diagn.).
Colpopoga temperata: Rosa 2017: 300.

Type locality. Morocco, Tunisia, Palestina: “Marocco, Tunesien, Palästina; selten. ♀ Type (Marocco) Coll. de Beaumont, ♂ Allotype (Marocco) Coll. Naef, ♂, ♀ Paratypen Coll. m.”.

Allotype, ♂: Ifrane, Moyen Atlas, Maroc, 24.VI.1947, Collect. Naef // ♂ Allotype *Hedychridium flavipes* Ev. *temperatum* Lins. det. Linsenmaier 1957 // NML_ENT GBIF_Chr0010447 (ex type-collection).

Paratypes, ♂: Maroc Azemmour 28. 30.V.1950 PMF Verhoeff // ♂ Paratype *Hedychridium Ab. flavipes* Ev. ssp. *temperatum* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chr0010442 (ex synoptic collection); 1♀: Jericho Palestine 26.4.1942 leg. Bytinski-Salz // ♀ Paratype *Hedychridium Ab. flavipes* Ev. ssp. *temperatum* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chr0010443 (ex synoptic collection); 1♀: Kairouan VI.1917 // ♀ Paratype *Hedychridium flavipes* Ev. *temperatum* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chr0010444.

Remarks. Rosa (2017) elevated *Hedychridium flavipes temperatum* to species rank and transferred it to the genus *Colpopoga* Semenov-Tian-Shanskij, 1954.

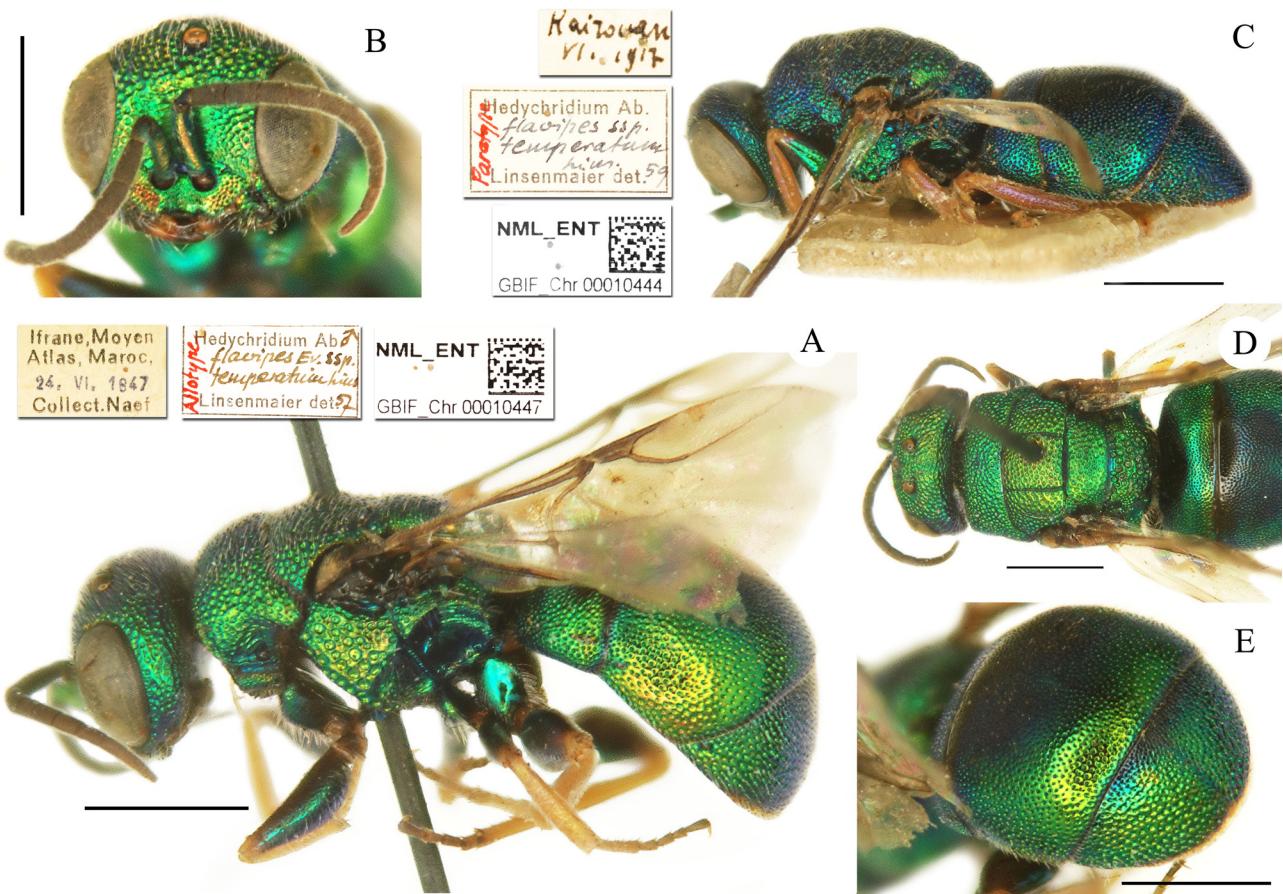

FIGURE 20. *Hedychridium flavipes temperatum* Linsenmaier, 1959a, allotype, male. A) Habitus, lateral view. B) Head, frontal view. D) Habitus, dorsal view. E) Metasoma, postero-lateral view. *Hedychridium flavipes temperatum* Linsenmaier, 1959a, paratype, female. C) Habitus, lateral view. Scale bar 1 mm.

Hedychridium franciscanum Linsenmaier, 1987

(Fig. 21A–21F)

Hedychridium (Hedychridium) franciscanum Linsenmaier, 1987: 138 (figs 2–5), 140 (descr., *ardens* group); 1997: 255 (distr.).

Type locality. Spain: “Spanien, östlich Madrid (Loeches-Campo Real) 15.VI.1985, von meiner Frau gefangen [=collected by my wife], ♀ Type Coll. m.”.

Holotype, ♀: Madrid Loeches Campo Real 15.6.85 Linsenmaier // ♀ Type *Hedychridium Ab. franciscanum* Linsenmaier det. 1985 // 416 // NML_ENT GBIF_Ch0009668 (ex type-collection).

Hedychridium franciscanum heminigrum Linsenmaier, 1997

(Fig. 22A–22F)

Hedychridium (Hedychridium) franciscanum heminigrum Linsenmaier, 1997: 255 (descr.).

Type locality. Turkey: “Turkey, ♂ Type (Holotypus) Ürgüp 9.VI.70, Kusdas; ♀ Allotype Van, 2200 m, 23.VII. 86, Ebmer, Coll. m.”.

Holotype, ♂: Ürgüp As. Türk. 9.VI.1970 leg. K. Kusdas // ♂ Type *Hedychridium Ab. franciscanum heminigrum* Lins. Linsenmaier det. 1990 // 465 // NML_ENT GBIF_Ch0009671 (ex type-collection).

Allotype, ♀: Türkei, Pass 10 km S Van, Steppe 2200m 23. Juli 1986 leg. A. W. Ebmer // ♀ Allotype *Hedychridium Ab. franciscanum heminigrum* Lins. Linsenmaier det. 1990 // NML_ENT GBIF_Ch0009672 (ex type-collection).

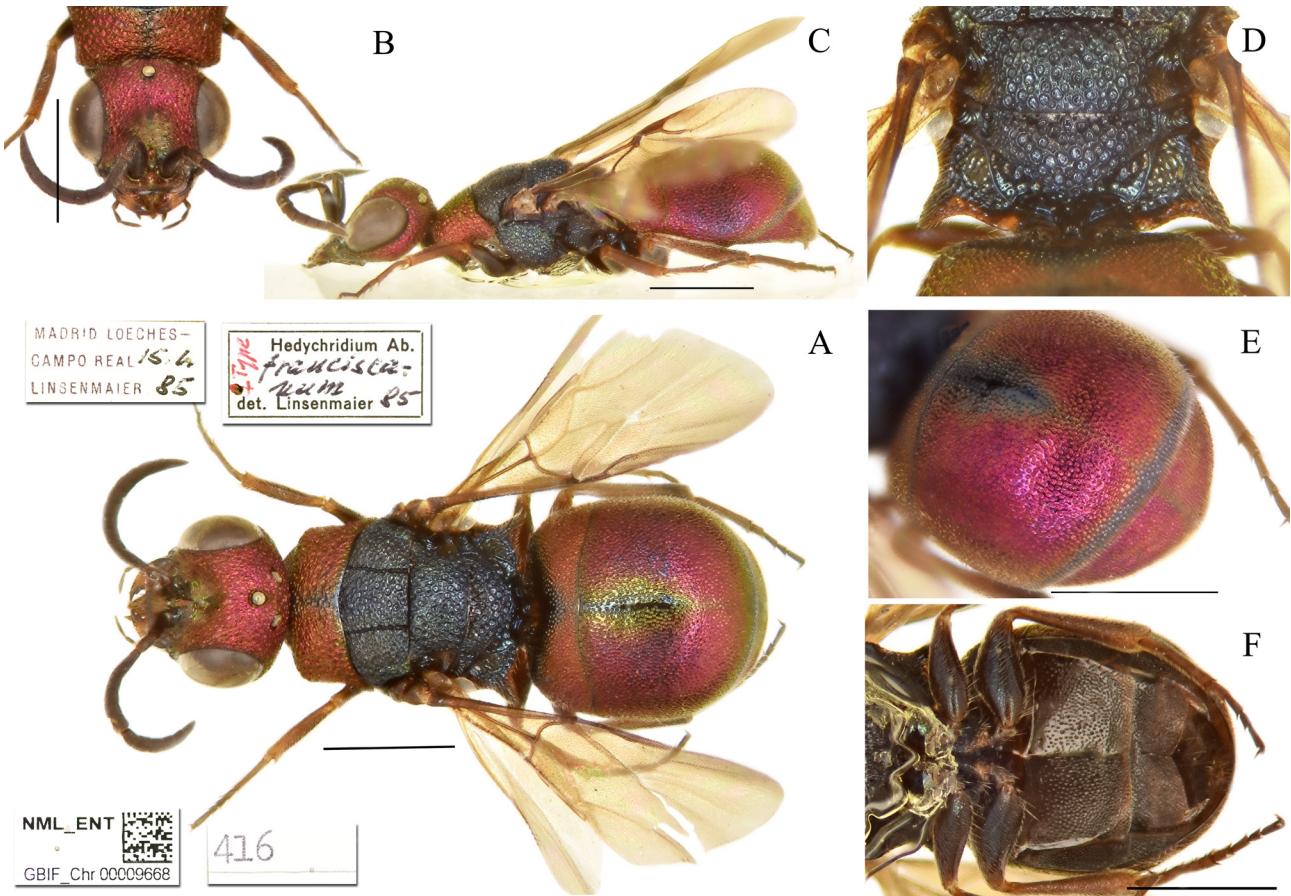

FIGURE 21. *Hedychridium franciscanum* Linsenmaier, 1987, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Scutellum, metanotum and propodeum, posterior view. E) Metasoma, postero-lateral view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium garianum Linsenmaier, 1968

Hedychridium (Hedychridium) garianum Linsenmaier, 1968: 24 (descr., *postthoracicum* group); 1999: 71 (key, *anale* group), 72 (diagn., allotype design.), 88 (fig. 122).

Type locality. Lybia: “Tripolitanien, bei Garian, V.51, leg. K.M. Guichard, ♀ Type in Brit. Museum”.

Remarks. The holotype is conserved at NHMUK. Linsenmaier (1999) designated a male as the allotype, bearing the following labels: Egypte Dahschour Rég du Cairo 2.V.1958 leg. W.J. Puławski // ♂ Allotype *Hedychridium Ab. garianum* Lins. Linsenmaier det. 1991. Although the specimen was collected before the date of the original description, it does not belong to the type series because it was not included in the original description, identified in 1991 and designated in 1999.

Hedychridium hauseri Linsenmaier, 1999

(Fig. 23A–23F)

Hedychridium (Hedychridium) hauseri Linsenmaier, 1999: 59 (key, *ardens* group), 61 (descr.), 251 (figs 316, 317).

Type locality. Morocco: “Marokko, Antiatlas, Taliouine (11 km NW) 15.III.1997, M. Hauser, ♀ Type (Holotypus) Coll. m.”.

Holotype, ♀: Marokko, 11 km NW Taliouine, 15.III.97, 30°34' N – 8°00' W, leg. M. Hauser // ♀ Type *Hedychridium Ab. hauseri* Lins. Linsenmaier det. 1998 // 500 // NML_ENT GBIF_Chr0008240 (ex type-collection).

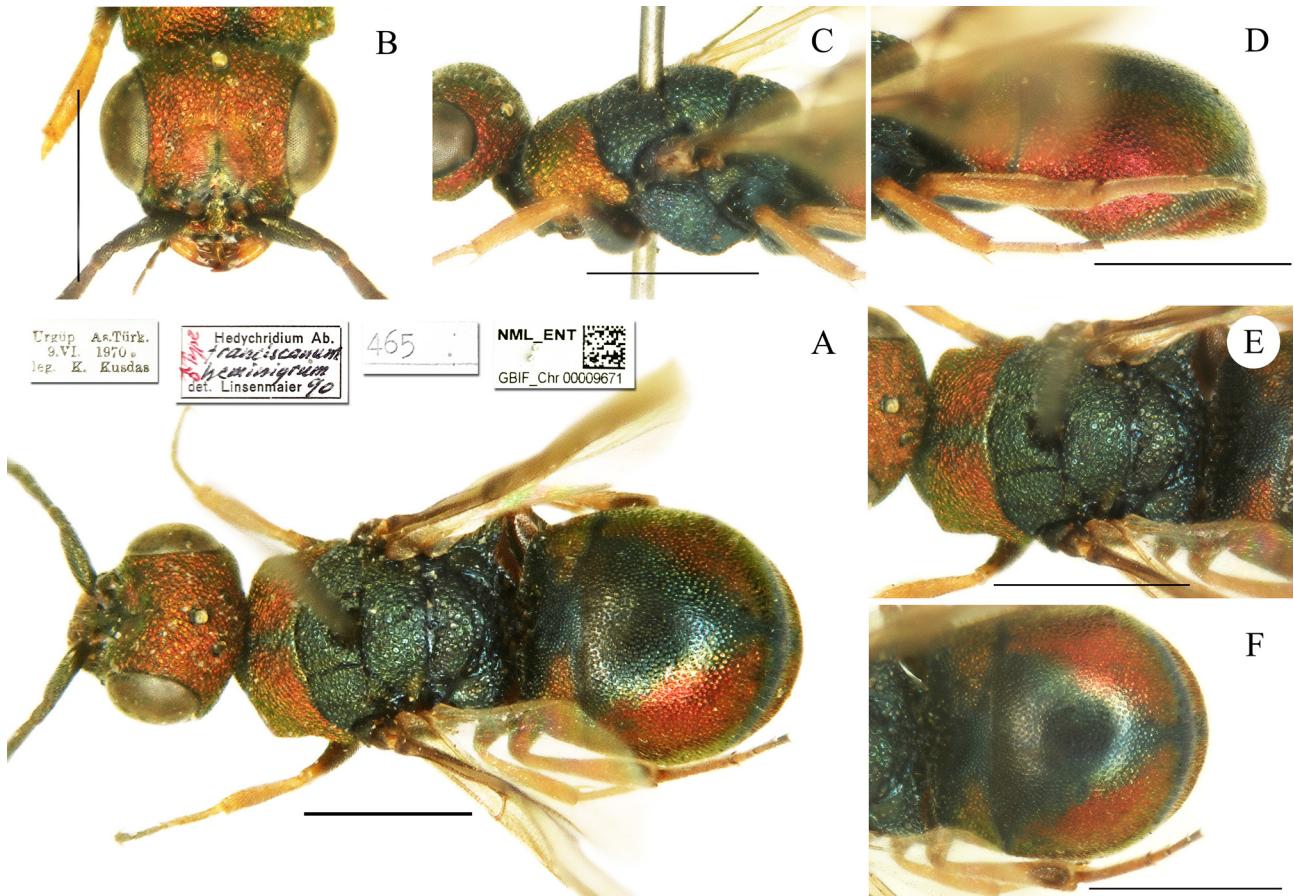

FIGURE 22. *Hedychridium franciscanum heminigrum* Linsenmaier, 1997, holotype, male. A) Habitus, dorsal view. B) Head, frontal view. C) Mesosoma, lateral view. D) Metasoma, lateral view. E) Mesosoma, dorsal view. F) Metasoma, dorsal view. Scale bar 1 mm.

Hedychridium hybridum Linsenmaier, 1959a

(Fig. 24A–24E)

Hedychridium (Hedychridium) hybridum Linsenmaier, 1959a: 44 (key), 53 (descr.), 187 (cat.), 200 (fig. 188); 1968: 30 (cat. *ardens* group); 1997: 255 (diagn.).

Hedychridium hybridum: Kimsey & Bohart 1991: 196 (incorrect subsequent spelling).

Hedychridium elegantulum du Buysson, 1887: Rosa *et al.* 2015: 525 (synonymised).

Type locality. France: “Süd-Frankreich, ♀ Type (Fréjus, VII.1956) und Paratype (Banyuls s.M., VI.1948, leg. Verhoeff) Coll. m., ♀ Paratype Coll. Verhoeff”.

Holotype, ♂ [not ♀]: France Var 56 St. Aygulf A. Juli leg. Linsenmaier // ♀ Type *Hedychridium Ab. hybridum* Lins. Linsenmaier det. 1959 // ♂ *Hedychridium Ab. elegantulum* Buysson det. Linsenmaier 1997 (ex type-collection) // NML_ENT GBIF_Chr0009290.

Paratype, 1♂: France - Pyr. or. Banyuls s. Mer 14. –17.VI.1948 PMF Verhoeff // Paratype ♀ *Hedychridium Ab. hybridum* Lins. Linsenmaier det. 1959 // ♀ *Hedychridium Ab. elegantulum* Buysson det. Linsenmaier 1997.

Remarks. The type is a male, not a female. Based on the information found in his collection, Linsenmaier considered *Hedychridium hybridum* a synonym of *H. elegantulum* du Buysson, but he never published this information. The type locality is not Fréjus, as given in the original description, but Saint-Aygulf, a small village close to Fréjus.

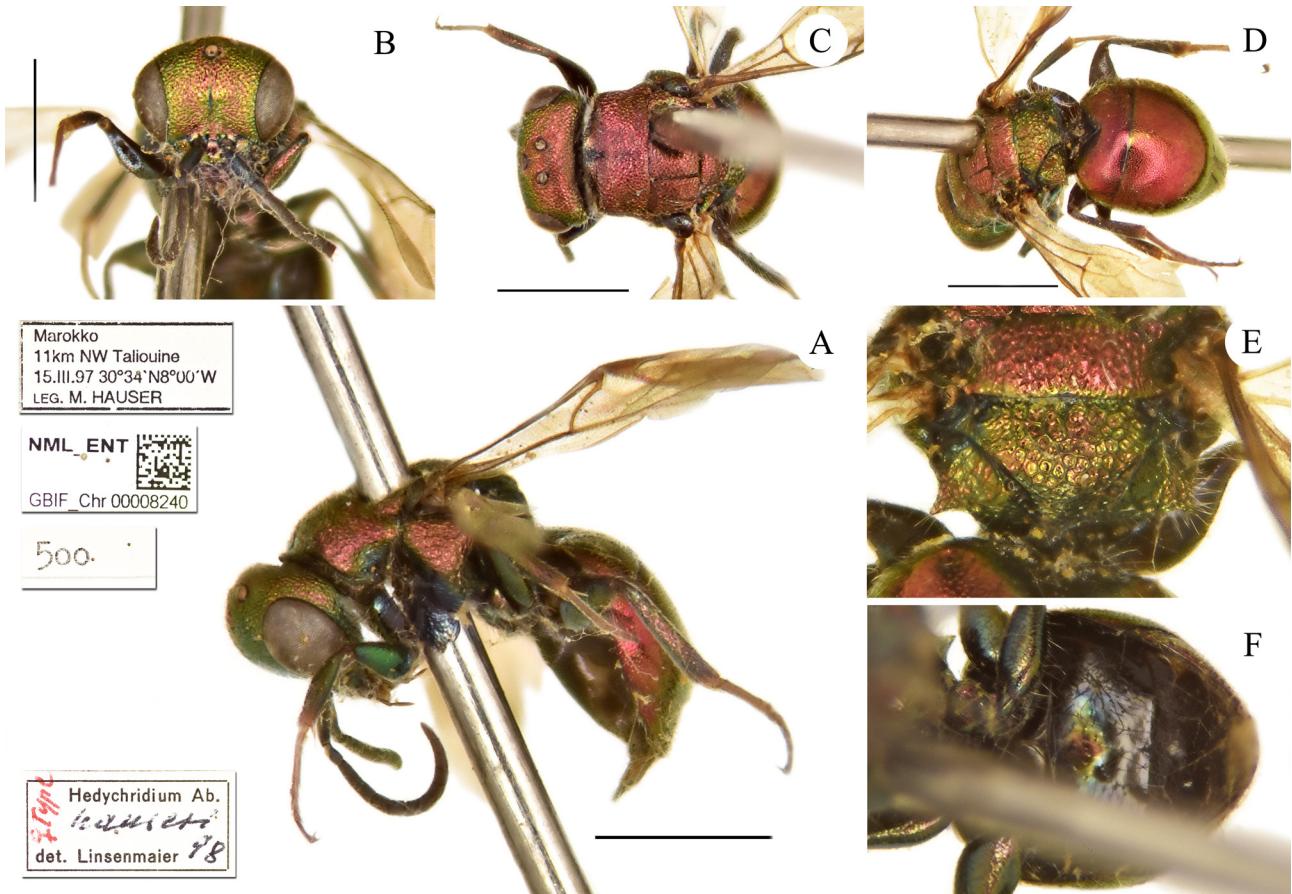

FIGURE 23. *Hedychridium hauseri* Lisenmaier, 1999, holotype, female. A) Habitus, lateral view. B) Head, frontal view. C) Head and mesosoma, dorsal view. D) Habitus, posterior view. E) Scutellum, metanotum and propodeum, posterior view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium hybridum creteense Lisenmaier, 1959b

(Fig. 25A–25E)

Hedychridium hybridum creteense Lisenmaier, 1959b: 234 (descr.); 1968: 30 (cat., *ardens* group).

Type locality. Crete: “Kreta, ♀ Type, ♂ Allotype und Paratypen Coll. m. (verschiedene Fundorte [=different locations], leg. Mavromoustakis)”.

Holotype, ♀: Kreta 7.VII.59 near Knossos Mavromoustakis Coll. Lisenmaier // ♀ Type *Hedychridium* Ab. *hybridum creteense* Lins. Lisenmaier det. 1959 // 181 // NML_ENT GBIF_Chr0009218 (ex type-collection).

Allotype, ♂ and paratypes 2♂: Kreta 9.VII.59 near Knossos Mavromoustakis Coll. Lisenmaier // ♂ Allotype vorne Paratypen *Hedychridium hybridum creteense* Lins. Lisenmaier det. 1959 // NML_ENT GBIF_Chr0009219 (ex type-collection).

Paratypes, 2♂: Kreta 26.VI.59 Ayios Gheorghios Mavromoustakis Coll. Lisenmaier // ♂ Paratypen *Hedychridium* Ab. *hybridum creteense* Lins. Lisenmaier det. 1959 // NML_ENT GBIF_Chr0009209 (ex synoptic collection); 1♀: Kreta 20.VI.59 near Knossos Mavromoustakis Coll. Lisenmaier // ♀ Paratype *Hedychridium* Ab. *hybridum creteense* Lins. Lisenmaier det. 1959 // NML_ENT GBIF_Chr0009210 (ex synoptic collection); 2♀: Kreta 9.VII.59 near Knossos Mavromoustakis Coll. Lisenmaier // ♀ Paratypen *Hedychridium* Ab. *hybridum creteense* Lins. Lisenmaier det. 1959 // NML_ENT GBIF_Chr0009211; 3♀: Kreta 16.VI.59 near Knossos Mavromoustakis Coll. Lisenmaier // ♀ Paratypen *Hedychridium* Ab. *hybridum creteense* Lins. Lisenmaier det. 1959 // NML_ENT GBIF_Chr0009212; 1♀: Kreta 21.VI.59 near Knossos Mavromoustakis Coll. Lisenmaier // ♀ Paratype *Hedychridium* Ab. *hybridum creteense* Lins. Lisenmaier det. 1959 // NML_ENT GBIF_Chr0009213; 4♀: Kreta 26.VI.59 Ayios Gheorghios Mavromoustakis Coll. Lisenmaier // ♀ Paratypen *Hedychridium* Ab. *hybridum*

creteense Lins. Lisenmaier det. 1959 // NML_ENT GBIF_Chro0009214 (2 ♀) and NML_ENT GBIF_Chro0009215 (2 ♀); 1♀: Kreta 15.VI.59 Karteros Mavromoustakis Coll. Lisenmaier // ♀ Paratype *Hedychridium hybridum creteense* Lins. Lisenmaier det. 1959 // NML_ENT GBIF_Chro0009216; 3♀: Kreta 4.VII.59 near Knossos Mavromoustakis Coll. Lisenmaier // ♀ Paratypen *Hedychridium Ab. hybridum creteense* Lins. Lisenmaier det. 1959 // NML_ENT GBIF_Chro0009217 (ex Perraudin-collection).

Remarks. *Hedychridium creteense* can be considered as a valid species, recognisable by the elongate last flagellomere of both sexes and the colour of the propodeum, not distinctly contrasting the colour of scutellum and metanotum.

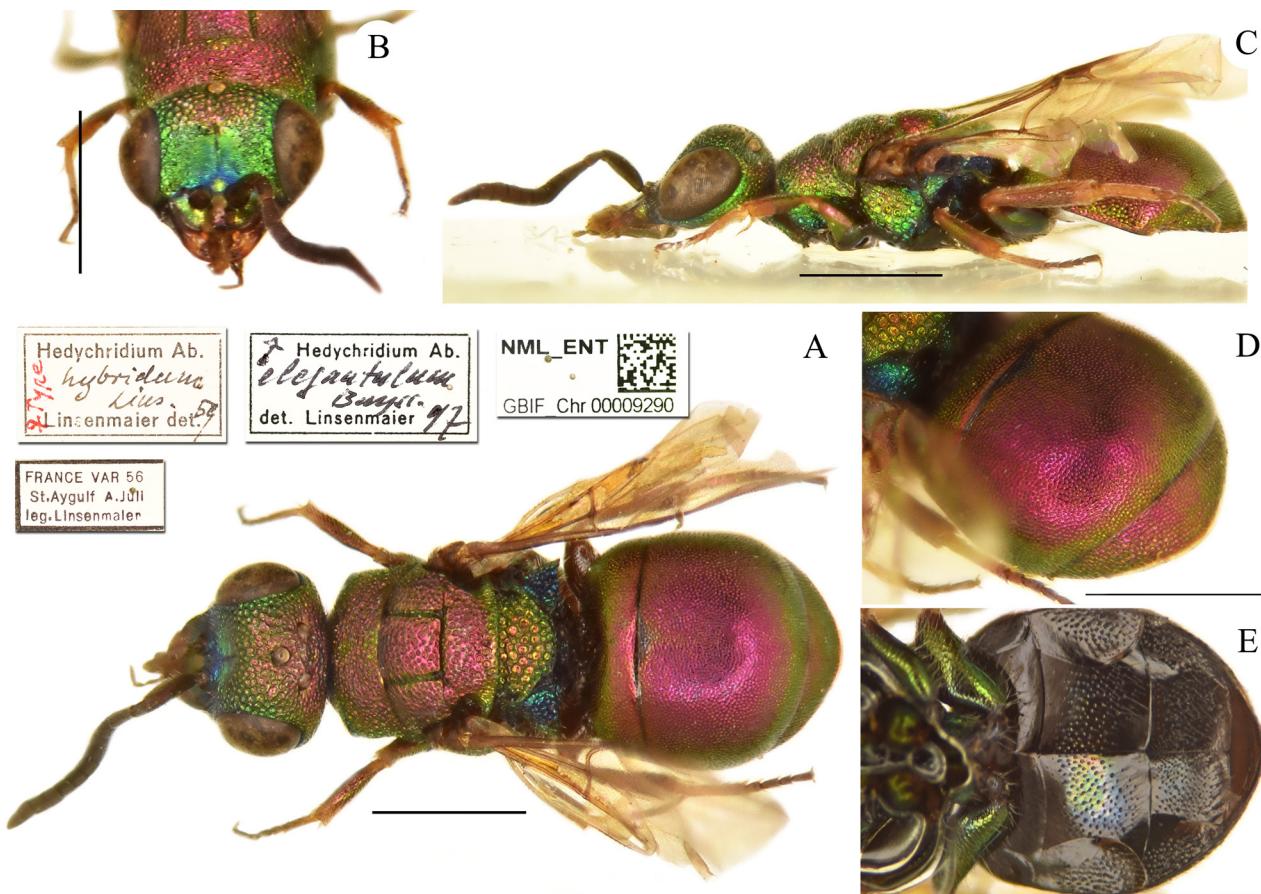

FIGURE 24. *Hedychridium hybridum* Lisenmaier, 1959a, holotype, male (not female). A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, postero-lateral view. E) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium ibericum Lisenmaier, 1959a

(Fig. 26A–26F)

Hedychridium (Hedychridium) ibericum Lisenmaier, 1959a: 45 (key), 52 (descr.), 187 (cat.), 200 (figs 183–186); 1968: 28 (diagn., *ardens* group), 126 (diagn., allotype desig.); 1987: 139 (distr., tax., footnote); 1997: 253 (cat.), 255 (tax.).

Type locality. Portugal, Spain: “Portugal, Spanien. ♂ Type (Spanien, Ronda, VII.1950, leg. Verhoeff) Coll. m., ♂ Paratypen Coll. Verhoeff”.

Holotype, ♂: España Ronda 30.VII.1950 PMF Verhoeff // ♂ Type *Hedychridium Ab. ibericum* Lins. Lisenmaier det. 1959 // 55 // NML_ENT GBIF_Chro0009815 (ex type-collection).

Remarks. Lisenmaier (1968) designated the allotype of *Hedychridium ibericum*, which bears the following labels: España – Toledo Toledo 25.–27.VII.1967 PMF Verhoeff // ♀ Allotype *Hedychridium Ab. ibericum* Lins. det. Lisenmaier 1968. This specimen cannot be considered as the allotype because it was not included in the original type series, and it was collected after the original description. In the same paper, Lisenmaier (1968) designated other paratypes which cannot be considered part of the type series as well.

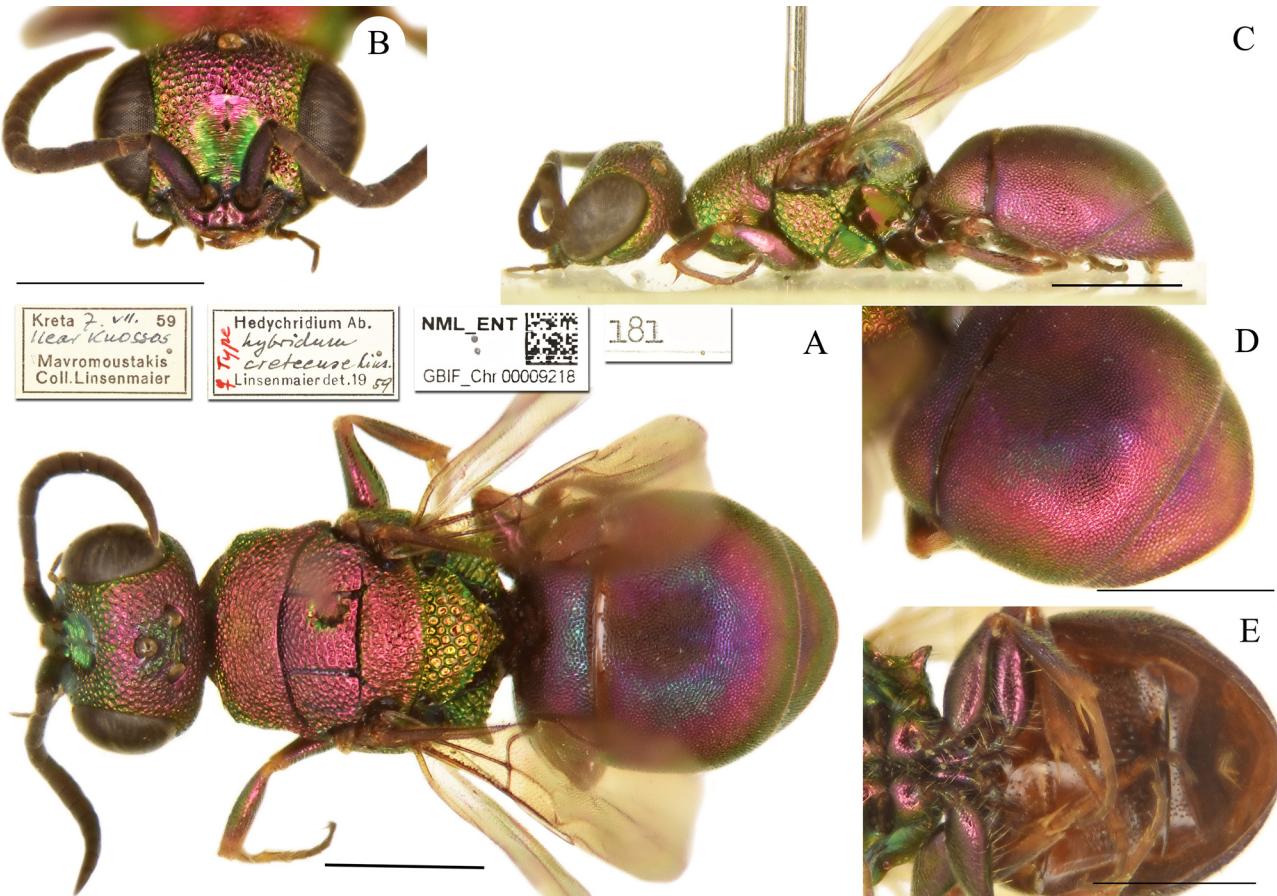

FIGURE 25. *Hedychridium hybridum creteense* Lisenmaier, 1959b, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, postero-lateral view. E) Metasoma, ventral view. Scale bar 1 mm.

***Hedychridium incrassatum subaheneum* Lisenmaier, 1959a**

(Fig. 27A–27F)

Hedychridium (Hedychridium) incrassatum subaheneum Lisenmaier, 1959a: 55 (descr.), 187 (cat.).

Hedychridium (Hedychridium) subaheneum: Lisenmaier 1987: 141 (diagn., elevated to species rank, *incrassatum* group); 1999: 75 (key), 76 (diagn.), 88 (figs 129, 130).

Type locality. Morocco: “Marocco, ♀ Type Coll. de Beaumont, ♀ Paratype Coll. m. (Tafraout V.1947, leg. de Beaumont”).

Paratype, 1♀: Marocco 1.V.47 Ant. Atlas Tafraout de Beaumont Coll. Lisenmaier // ♀ Type *Hedychridium incrassatum* ssp. *subaheneum* Lins. Lisenmaier det. 1959 // NML_ENT GBIF_Chr0010200.

Remarks. Lisenmaier (1987: 141) elevated *Hedychridium incrassatum subaheneum* to species rank and provided a few more details on its morphological description.

***Hedychridium infantum* Lisenmaier, 1997**

(Fig. 28A–28E)

Hedychridium (Hedychridium) infantum Lisenmaier, 1997: 254 (descr., *ardens* group), 255 (diagn.); 1999: 59 (key, *ardens-monochroum* group), 69 (fig. 117), 70 (diagn., distr.).

Type locality. Portugal, Spain: “Spanien, Portugal. ♂ Type (Holotypus) Granada 1100 m, 28.VI.89, ♀ Allotype Soria, 26.7.63 leg. und Coll. m. Paratypen: Granada, Soria, Segovia VI., VII., Portugal, Lisboa VIII., Verhoeff, Coll. m. (3♂ 3♀).“

Holotype, ♂: Granada Sierra d. Chaparral 1100m Lisenmaier 28.6.89 // ♂ Type *Hedychridium Ab. infantum* Lisenmaier det. 1995 // 464 // NML_ENT GBIF_Chro0009143 (ex type-collection).

Allotype, ♀: Spanien, Soria, C, 26.7.63, leg. Lisenmaier // ♀ Allotype *Hedychridium Ab. infantum* det. Lisenmaier 1995 // NML_ENT GBIF_Chro0009144 (ex type-collection).

Paratypes, 2♂: Spanien Soria T. 7.7.94 Lisenmaier // ♂ Paratype *Hedychridium Ab. infantum* det. Lisenmaier 1995 // NML_ENT GBIF_Chro0009141 (ex synoptic collection); 1♀: Portugal – Lisboa Lagoa de Albufeira 1.VIII.1967 PMF Verhoeff // ♀ Paratype *Hedychridium Ab. infantum* Lisenmaier det. 1995 // NML_ENT GBIF_Chro0009142 (ex synoptic collection); 1♂: Portugal – Lisboa Lagoa de Albufeira 1.VIII.1967 PMF Verhoeff // ♂ Paratype *Hedychridium Ab. infantum* Lisenmaier det. 1995 // NML_ENT GBIF_Chro0009145; 1♂: Granada Sierra d. Chaparral 1100m Lisenmaier 27.6.89 // ♂ Paratype *Hedychridium Ab. infantum* Lisenmaier det. 1995 // NML_ENT GBIF_Chro0009146.

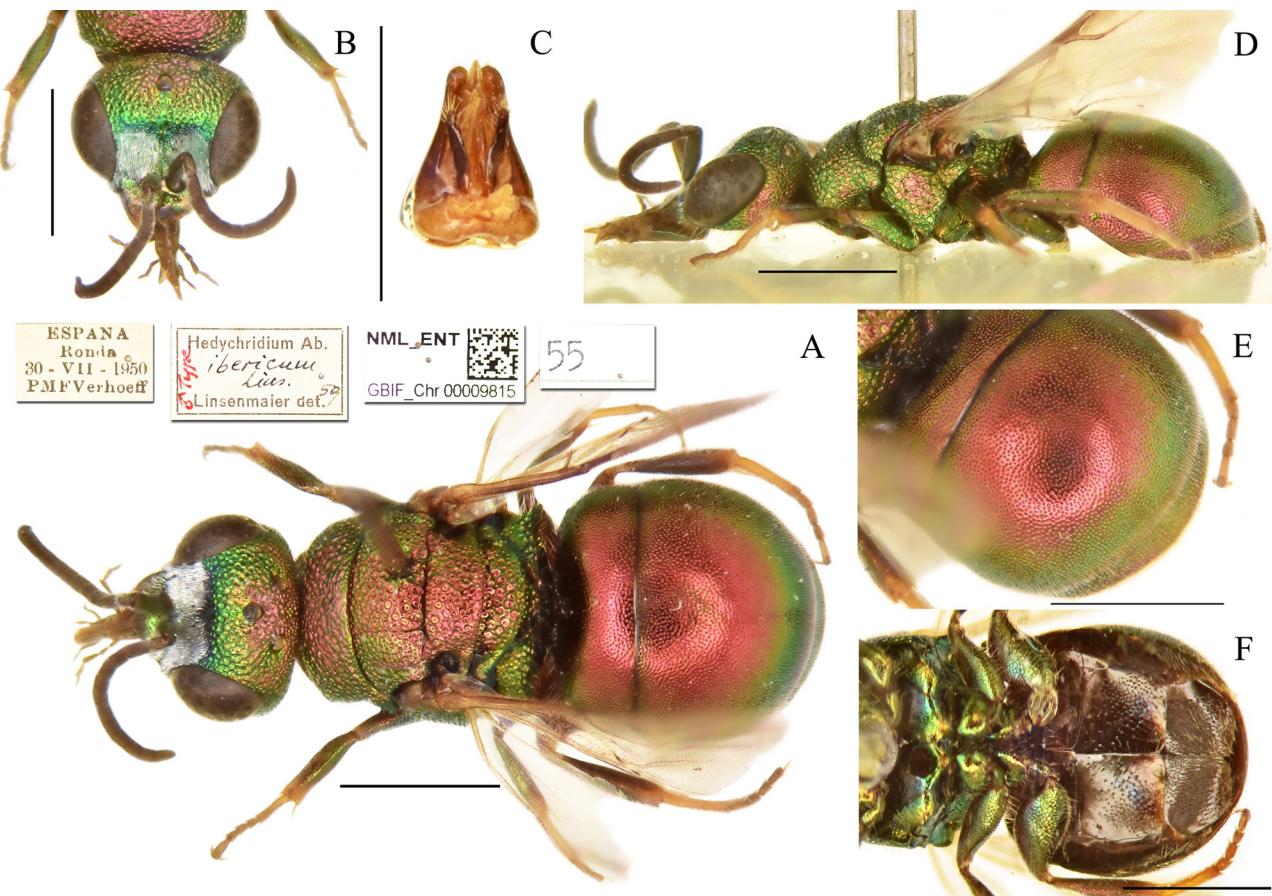

FIGURE 26. *Hedychridium ibericum* Lisenmaier, 1959a, holotype, male. A) Habitus, dorsal view. B) Head, frontal view. C) Genital capsule. D) Habitus, lateral view. E) Metasoma, postero-lateral view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium insequosum Lisenmaier, 1959a

(Fig. 29A–29E)

Hedychridium (*Hedychridium*) *insequosum* Lisenmaier, 1959a: 46 (key), 56 (descr.), 187 (cat.); 1968: 35 (diagn., distr., *incrassatum* group).

Hedychridium (*Hedychridium*) *perpunctatum* Balthasar, 1953: Lisenmaier 1969: 352 (synonymised).

Type locality. Palestine: “Palästina. ♀ Type Coll. m. (Jericho, 30.VII.1942, leg. Bytinski-Salz)”.

Holotype, ♀: Jericho Palestine 30.7.1942 leg. Bytinski-Salz // ♀ Type *Hedychridium Ab. insequosum* Lins. Lisenmaier det. 1959 // *Hedychridium Ab. perpunctatum* B. det. Lisenmaier 1970 // NML_ENT GBIF_Chro0009976 (ex type-collection).

Remarks. Kimsey & Bohart (1991) overlooked Lisenmaier's (1969) synonymisation and listed *Hedychridium insequosum* as a valid species.

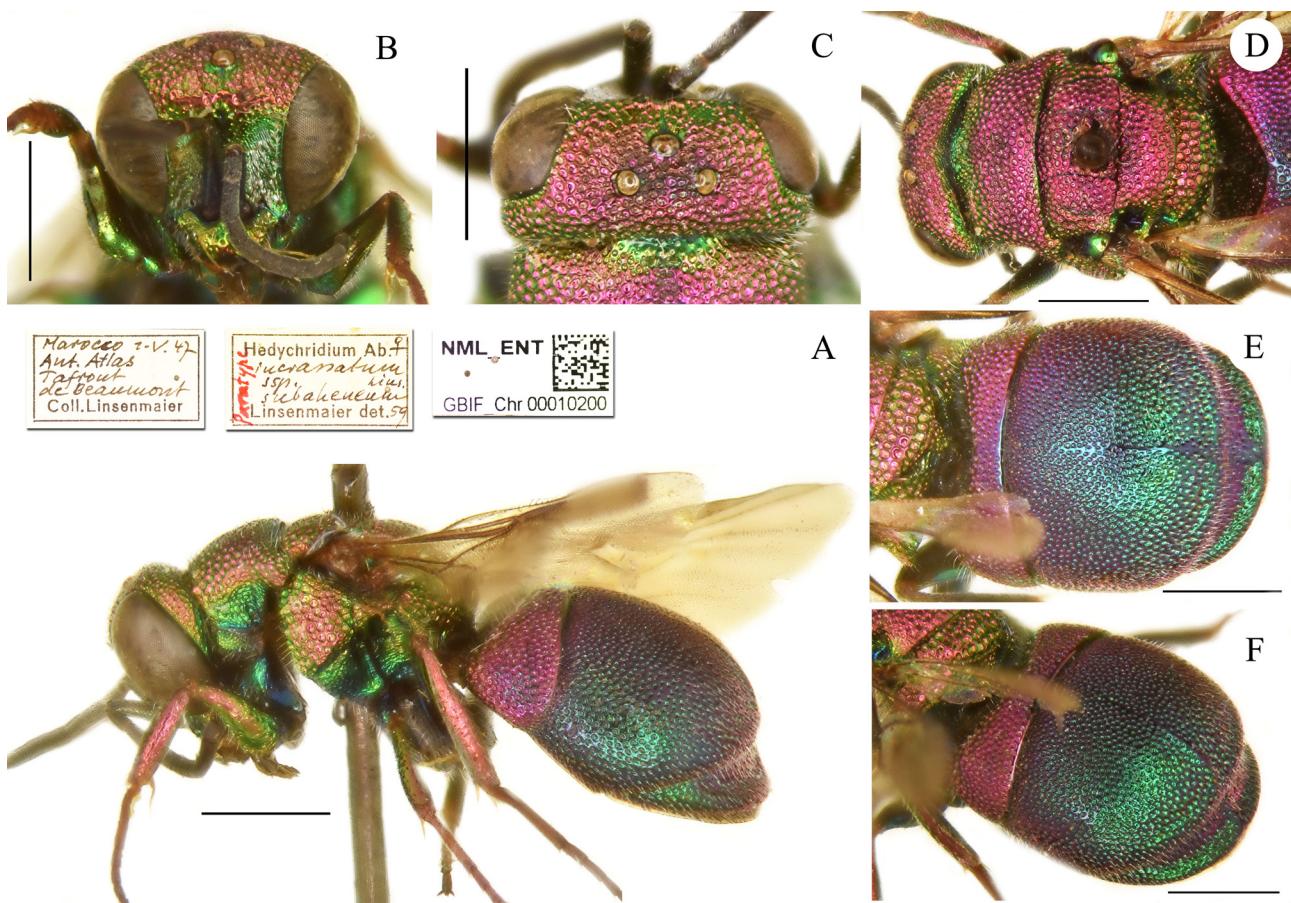

FIGURE 27. *Hedychridium incrassatum subaheneum* Linsenmaier, 1959a, paratype, male. A) Habitus, lateral view. B) Head, frontal view. C) Head, dorsal view. D) Mesosoma, dorsal view. E) Metasoma, dorsal view. F) Metasoma, postero-lateral view. Scale bar 1 mm.

Hedychridium integrum asianum Linsenmaier, 1997

(Fig. 30A–30D)

Hedychridium (Hedychridium) integrum asianum Linsenmaier, 1997: 254 (descr., *ardens* group).
Hedychridium asianum: Rosa et al. 2017b: 31 (raised to species rank).

Type locality. China, Mongolia: “Mongolei, China. - Mongolei, Zentral Aimag, Ulan Bator 1900 m, VI. und VII.89, P. Salk, ♂ Type (Holotypus) und ♂ Paratype Coll. Koschwitz. - China, Gansu, Xiahe (Labhran) 3000-3500 m, VII.91, P. Salk, ♀ Allotype Coll. Koschwitz, ♂ Paratype Coll. m.”

Paratypes, 1♂, Asia centr. Mongolische Volksrepublik Zentral – Aimag Ulan Bator 16.07.1989 1900m leg. Peter Salk Berlin // ♂ Paratype *Hedychridium* Ab. *integrum asianum* Linsenmaier det. 1995 // NML_ENT GBIF_Chr0008172 (ex synoptic collection); 1♀, China – Gansu Xiahe (Labhran) 3000–3500m 13.–23.7.91 P. Salk // ♀ Paratype *Hedychridium* Ab. *integrum asianum* Linsenmaier det. 1995 // NML_ENT GBIF_Chr0008173 (ex synoptic collection).

Remarks. *Hedychridium integrum asianum* was raised to species rank by Rosa et al. (2017b).

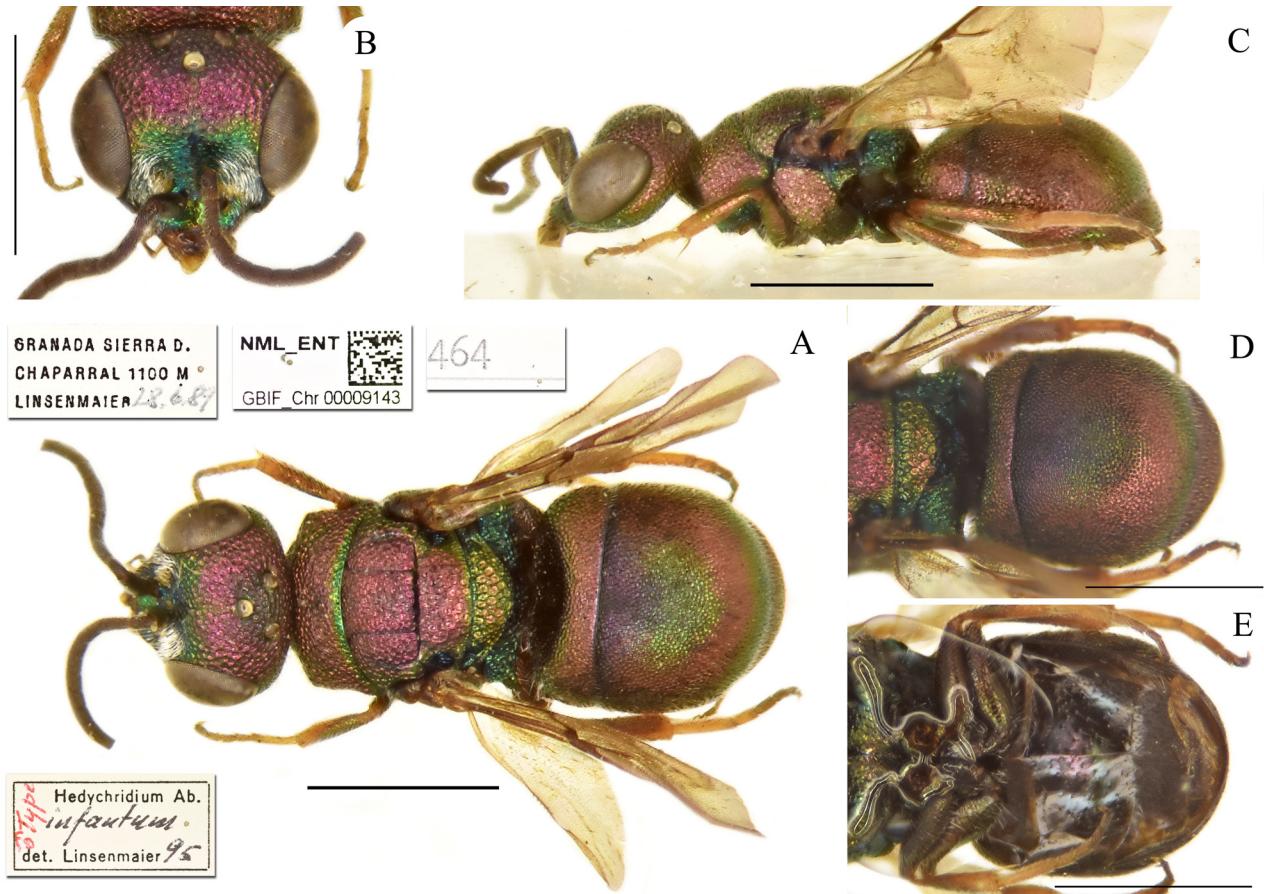

FIGURE 28. *Hedychridium infantum* Lisenmaier, 1997, holotype, male. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, dorsal view. E) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium inusitatum Lisenmaier, 1959a

(Fig. 31A–31F)

Hedychridium (*Hedychridium*) *inusitatum* Lisenmaier, 1959a: 46 (key), 56 (descr.), 187 (cat.), 216 (fig. 676); 1968: 35 (cat., *incrassatum* group); 1999: 73 (key, *heliophilum* group), 74 (diagn.), 88 (figs 124, 125).

Type locality. Morocco: “Marocco. ♂ Type Coll. m. (Ksar es Souk, V.1949)”.

Holotype, ♂: Marocco Ksar es Souk 5.VI.49 Coll. Lisenmaier // ♂ Type *Hedychridium Ab. inusitatum* Lins. Lisenmaier det. 1959 // 60 // NML_ENT GBIF_Ch 0009962 (ex type-collection).

Hedychridium irregulare Lisenmaier, 1959a

(Fig. 32A–32E)

Hedychridium (*Hedychridium*) *irregulare* Lisenmaier, 1959a: 62 (key, descr., *sculpturatum* group), 187 (cat.), 198 (figs 124–126); 1968: 37 (tax., *sculpturatum* group); 1969: 353 (cat.).

Hedychridium (*Hedychridium*) *caucasicum irregulare*: Lisenmaier 1997: 258 (downgraded to subspecific rank); Arens 2010: 407 (cat., distr.), 415 (diagn., tax.), 452 (cat., distr.).

Type locality. Greece: “Griechenland, ♂ Type Coll. m. (Athen, V.1936, leg. Enslin)”.

Holotype, ♂: Graecia 20.5.1936 dr. Enslin / Athens // ♂ Type *Hedychridium irregulare* Lins., Lisenmaier det. 1959 // *Hedychridium Ab. caucasicum irregulare* det. Lisenmaier 1995 / *Hedychridium* ♂ *caucasicum irregulare* Lins det. W. Arens 2006 // 73 // NML_ENT GBIF_Ch 0011551 (ex type-collection).

Remarks. Lisenmaier (1997: 258) considered *Hedychridium irregularare* as a subspecies of *H. caucasicum* Trautmann, 1926 and *H. irregularare insulare* Lisenmaier, 1959 as a synonym of *H. caucasicum* Trautmann, 1926.

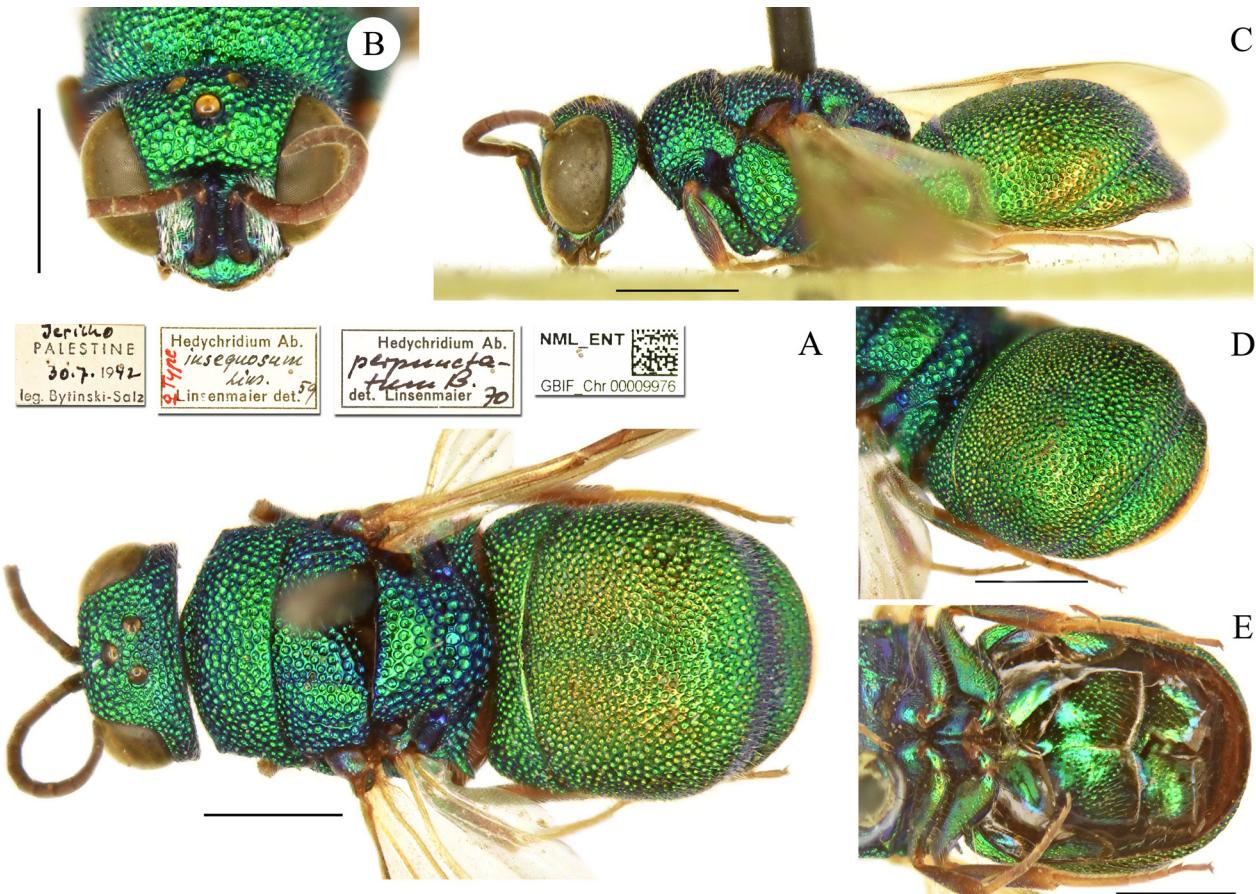

FIGURE 29. *Hedychridium insequosum* Lisenmaier, 1959a, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, postero-lateral view. E) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium irregularare insulare Lisenmaier, 1959a

Hedychridium (Hedychridium) irregularare insulare Lisenmaier, 1959a: 62 (descr., *sculpturatum* group), 187 (cat.); 1968: 37 (distr.); 1969: 353 (diagn.).

Hedychridium (Hedychridium) caucasicum Trautmann, 1926: Lisenmaier 1997: 258 (synonymised).

Hedychridium insulare Balthasar, 1953: Arens 2010: 410 (synonymised).

Type locality. Cyprus, Rhodes: “Cyprn, Rhodos. ♂ Type (Cyprn, Limassol, V.1949, leg. Mavromoustakisi) und ♂ Paratypen Coll. m.”.

Holotype, ♂: Cyprn 14.V.49 Limassol leg. Mavromoustakis coll. Lisenmaier // ♂ Type *Hedychridium irregularare* ssp. *insulare* Lins Lisenmaier 1959 // *Hedychridium Ab. caucasicum* Tr. det Lisenmaier 1959 // *Hedychridium* ♂ *insulare* Balth. det. W. Arens 2005 // NML_ENT GBIF_Ch0011515 (ex type-collection).

Paratypes, 16 ♂: Cyprn 14.V.49 Limassol leg. Mavromoustakis coll. Lisenmaier // ♂ Paratypen *Hedychridium irregularare* ssp. *insulare* Lins det. Lisenmaier 1959 // *Hedychridium Ab. caucasicum* Tr det Lisenmaier 1959 // *Hedychridium insulare insulare* Balth. det. W. Arens 2005 // NML_ENT GBIF_Ch0011490–11493 (4 ♂ glued on four labels).

Possible paratypes, 2 ♂: Rodi, Egeo Mai 1939 Dr. R. Meyer // Rhodos Coll. Enslin Coll. Lisenmaier // *Hedychridium Ab.* Paratype *irregularare* ssp. *insulare* ♂ Lins. Lisenmaier det. 1956 // *Hedychridium Ab. caucasicum* Tr. Lisenmaier 1995 // *Hedychridium caucasicum caucasicum* Trautm. det. W. Arens 2005 // NML_ENT GBIF_Ch0011505–11506.

Remarks. Lisenmaier (1997: 258) synonymised *Hedychridium insulare* with *H. caucasicum* Trautmann, 1926. Two males collected by R. Meyer at Rhodes should be the paratypes listed in the original description, yet they bear an identification label handwritten by Lisenmaier in 1995 without any further note on their type status.

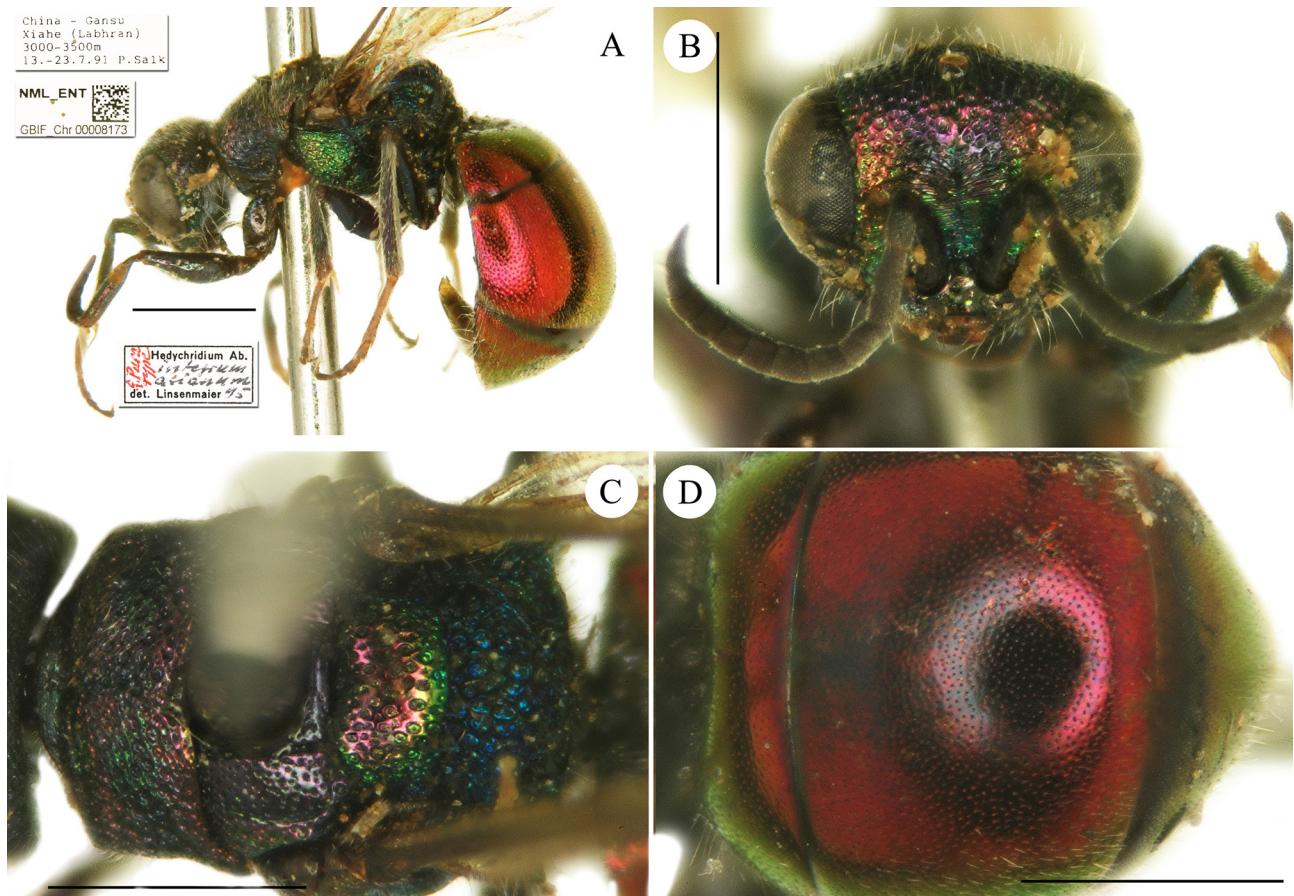

FIGURE 30. *Hedychridium integrum asianum* Lisenmaier, 1997, paratype, female. A) Habitus, lateral view. B) Head, frontal view. C) Mesosoma, dorsal view. D) Metasoma, dorsal view. Scale bar 1 mm.

Hedychridium israelicum Lisenmaier, 1968

(Fig. 33A–33F)

Hedychridium (Hedychridium) israelicum Lisenmaier, 1968: 27 (descr., *ardens* group); 1969: 351 (cat.).

Type locality. Palestine: “Palästina, Khan Chadrur, 18.IV.1943, leg. Bytinski-Salz, ♀ Type in Coll. m.”.

Holotype, ♀: Khan Chadrur Palestine 18.IV.1943 leg. Bytinski-Salz // ♀ Type *Hedychridium Ab. israelicum* Lins. Lisenmaier det. 1967 // 215 // NML_ENT GBIF_Chro0008634 (ex type-collection).

Hedychridium jordanense Lisenmaier, 1968

(Fig. 34A–34D)

Hedychridium (Hedychridium) jordanense Lisenmaier, 1968: 27 (descr., *ardens* group); 1969: 351 (cat.).

Type locality. Palestine: “Palästina, Jericho, 7.IV.1964, leg. Verhoeff, ♀ Type in Coll. m.”.

Holotype, ♀: Jordan Plains betw. Jericho and the Dead Sea 7.IV.1964 PMF Verhoeff // ♀ Type *Hedychridium Ab. jordanense* Lins. Lisenmaier det. 1967 // 214 // NML_ENT GBIF_Chro0009156 (ex type-collection).

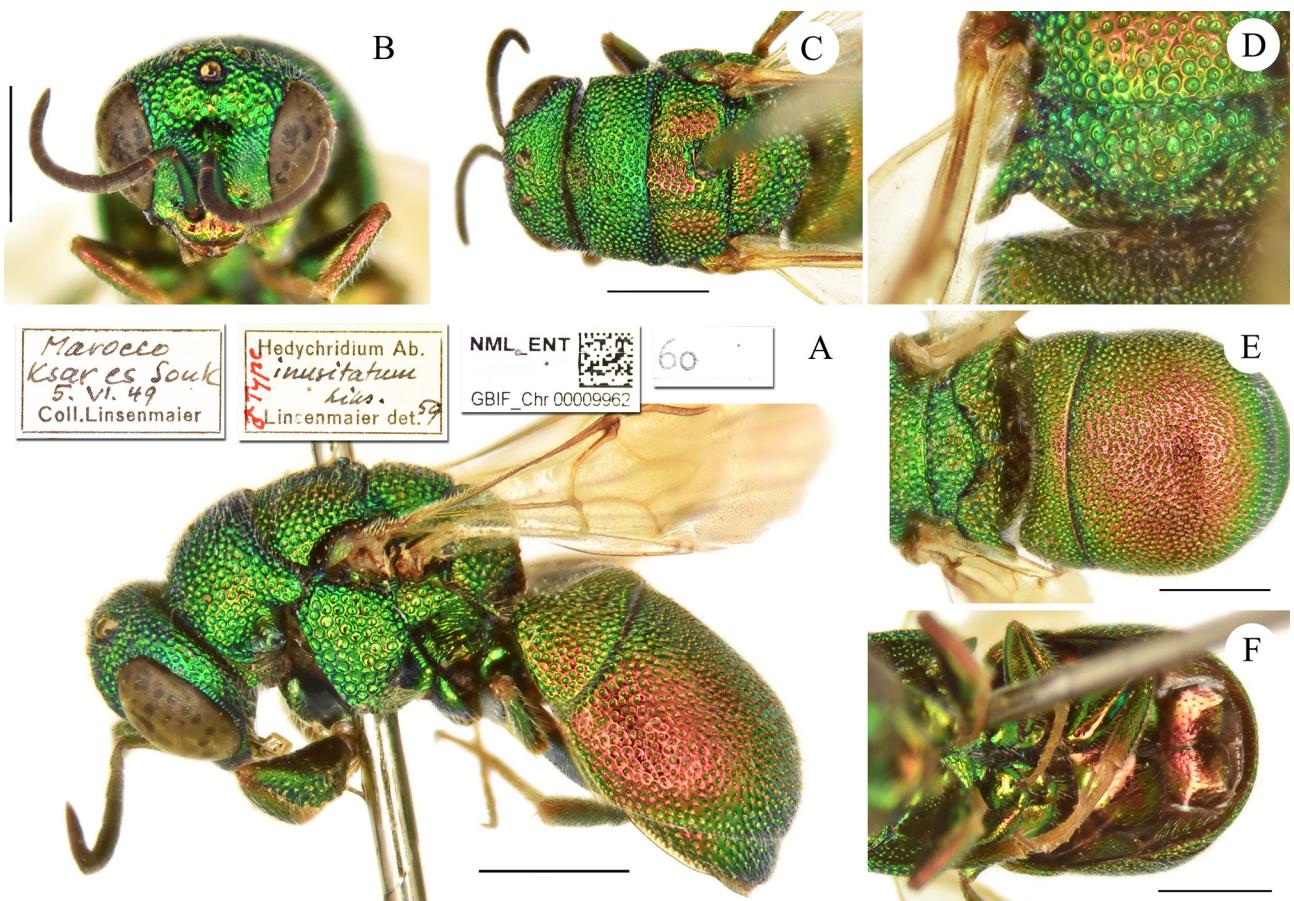

FIGURE 31. *Hedychridium inusitatum* Lisenmaier, 1959a, holotype, male. A) Habitus, lateral view. B) Head, frontal view. C) Head and mesosoma, dorsal view. D) Scutellum, metanotum and propodeum, posterior view. E) Metasoma, dorsal view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium kenitranum Lisenmaier, 1999

(Fig. 35A–35D)

Hedychridium (Hedychridium) kenitranum Lisenmaier, 1999: 59 (key, *ardens-monochroum* group), 64 (descr.).

Type locality. Morocco: “Marokko, Kenitra 27.IV.1965, ♀ Type (Holotypus) und Paratype leg. u. Coll. m.; Kenitra 5.V.1981, ♀ Paratype leg. u. Coll. H. Tussac”.

Holotype, ♀: Maroc Kenitra 27.IV.65 leg. Lisenmaier // ♀ Type *Hedychridium Ab. kenitranum* Lins. Lisenmaier det. 1990 // 502 // NML_ENT GBIF_Chro0008668 (ex type-collection).

Hedychridium krajniki turceyense Lisenmaier, 1968

(Fig. 36A–36E)

Hedychridium (Hedychridium) krajniki turceyense Lisenmaier, 1968: 30 (descr., *ardens* group).
Hedychridium turceyense Lisenmaier, 1968 **stat. nov.**: here upgraded to species rank.

Type locality. Turkey: “Klein-Asien, Ulu Dag 1500 m, ♀ Type leg. Bytinski-Salz (an *Oxybelus*-Kolonie) in Coll. m.”.

Holotype, ♀: Uludag 1500m Turkey 12.8.1951 leg. Bytinski-Salz // ♀ Type *Hedychridium Ab. krajniki turceyanus* Lins. Lisenmaier det. 1963 // 217 // NML_ENT GBIF_Chro0009504 (ex type-collection).

Remarks. *Hedychridium krajniki turceyense* Lisenmaier, 1968 stat. nov. is here upgraded to species rank

because the size is constantly larger, the sculpture of mesonotum is distinctly smaller, and the colour pattern is different, with fully red pronotum and scutellum, and golden metanotum. It is a member of a Turanic species distributed from Anatolia to Central Asia (data unpubl.) which only superficially resemble the European *H. krajniki* Balthasar, 1946.

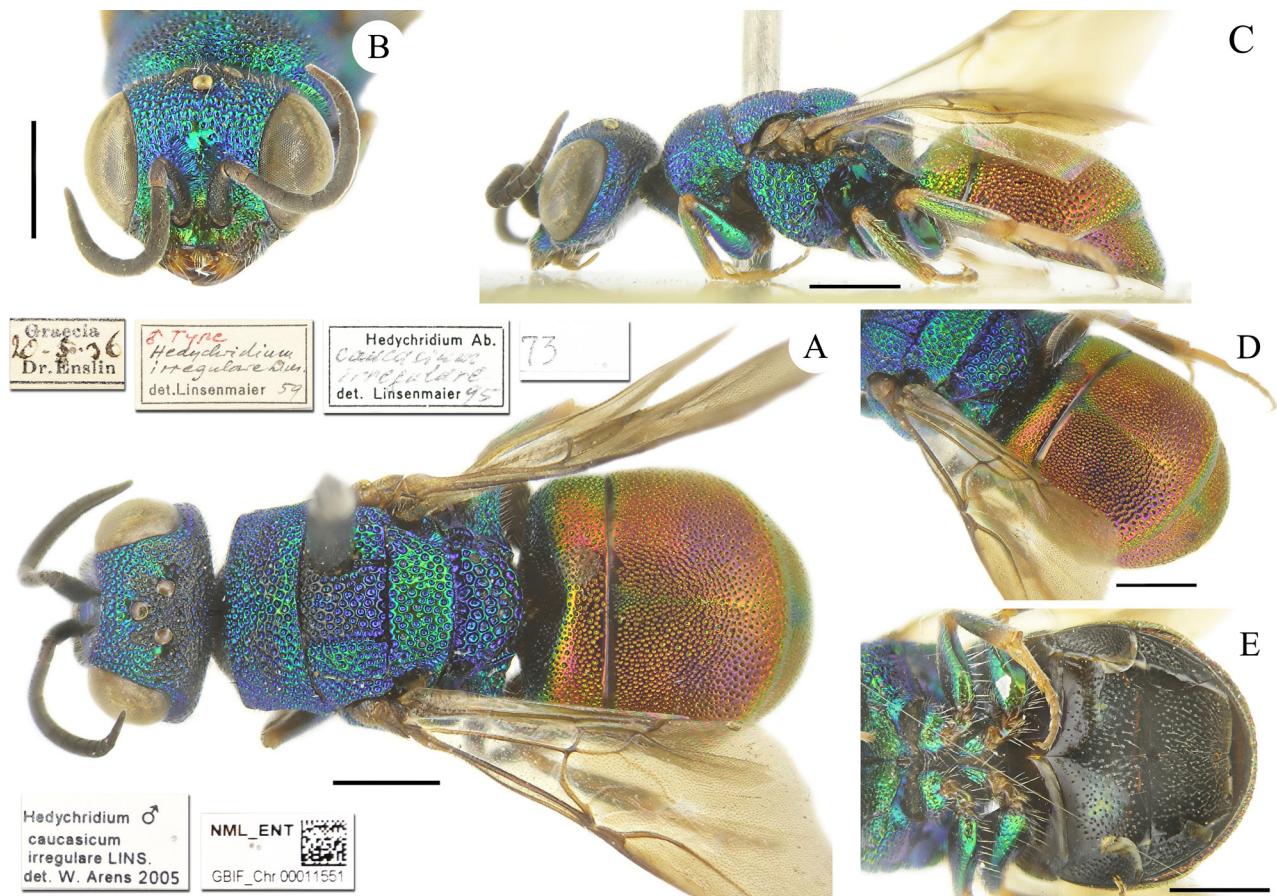

FIGURE 32. *Hedychridium irregulare* Lisenmaier, 1959a, holotype, male. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, postero-lateral view. E) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium laeviclypeatum Lisenmaier, 1999

(Fig. 37A–37E)

Hedychridium (*Hedychridium*) *laeviclypeatum* Lisenmaier, 1999: 75 (key, *incrassatum* group), 77 (descr.), 88 (fig. 133).

Type locality. Tunisia: “Tunesien Kasserine V.1973, J. Guseleinleitner, ♀ Type (Holotypus) Coll. m.”.

Holotype, ♀: Kasserine 10 km Ost Tunisia 10.5.1973 leg. J. Guseleinleitner // ♀ Type *Hedychridium* Ab. *brevifaciale* Lins. Lisenmaier det. 1977 // 510 // NML_ENT GBIF_Ch00011551

Remarks. The holotype is still bearing on the identification label the first name chosen by Lisenmaier, yet not published (Rosa *et al.* 2015).

Hedychridium lampadum austerritatum Lisenmaier, 1997

(Fig. 38A–38D)

Hedychridium (*Hedychridium*) *lampadum austerritatum* Lisenmaier, 1997: 258 (descr., *roseum* group).

Hedychridium *sculpturatum* *sculpturatum* (Abeille de Perrin, 1877): Arens 2010: 407 (synonymised).

Type locality. France, Corsica: “Korsika, Porto Pollo und Aléria, zahlreich [=numerous], Perraudin; ♀ Type (Holotypus), ♂ Allotype Porto Pollo 21.VIII.75, Coll. m., Paratypen Coll. Perraudin und Coll. m.”.

Holotype, ♀: Porto Pollo Corse littoral 21.VIII.1975 W. Perraudin // ♀ Type *Hedychridium Ab. lampadum austerritatum* Linsenmaier 1991 // *Hedychridium* ♀ *sculpturatum sculpturatum* Ab. det. W. Arens 2006 // 466 // NML_ENT GBIF_Chro0010792 (ex type-collection).

Allotype, ♂: F20 Porto Pollo Corse 21.VIII.1975 W. Perraudin // ♂ Allotype *Hedychridium Ab. lampadum austerritatum* Lins. Linsenmaier 1991 // *Hedychridium* ♂ *roseum* (Rossi) det. W. Arens 2006 // NML_ENT GBIF_Chro0010793 (ex type-collection).

Paratypes, 1♀: Porto Pollo Corse 16.VIII.1975 W. Perraudin // ♀ Paratype *Hedychridium Ab. lampadum austerritatum* Linsenmaier 1991 // *Hedychridium* ♀ *roseum* (Rossi) det. W. Arens 2006 // NML_ENT GBIF_Chro0010766; 1♂: Porto Pollo Corse 21.VIII.1975 W. Perraudin // ♂ Paratype *Hedychridium Ab. lampadum austerritatum* Lins. Arens 2006 // NML_ENT GBIF_Chro0010770–Chr0010771 (1♂ ex type-collection and 1♂ Perraudin-collection); 1♀: Aléria Corse 12.VIII.1966 W. Perraudin // ♀ Paratype *Hedychridium Ab. lampadum austerritatum* Linsenmaier 1991 // *Hedychridium* ♀ *sculpturatum sculpturatum* Ab. det. W. Arens 2006 // NML_ENT GBIF_Chro0010769 (ex Perraudin-collection).

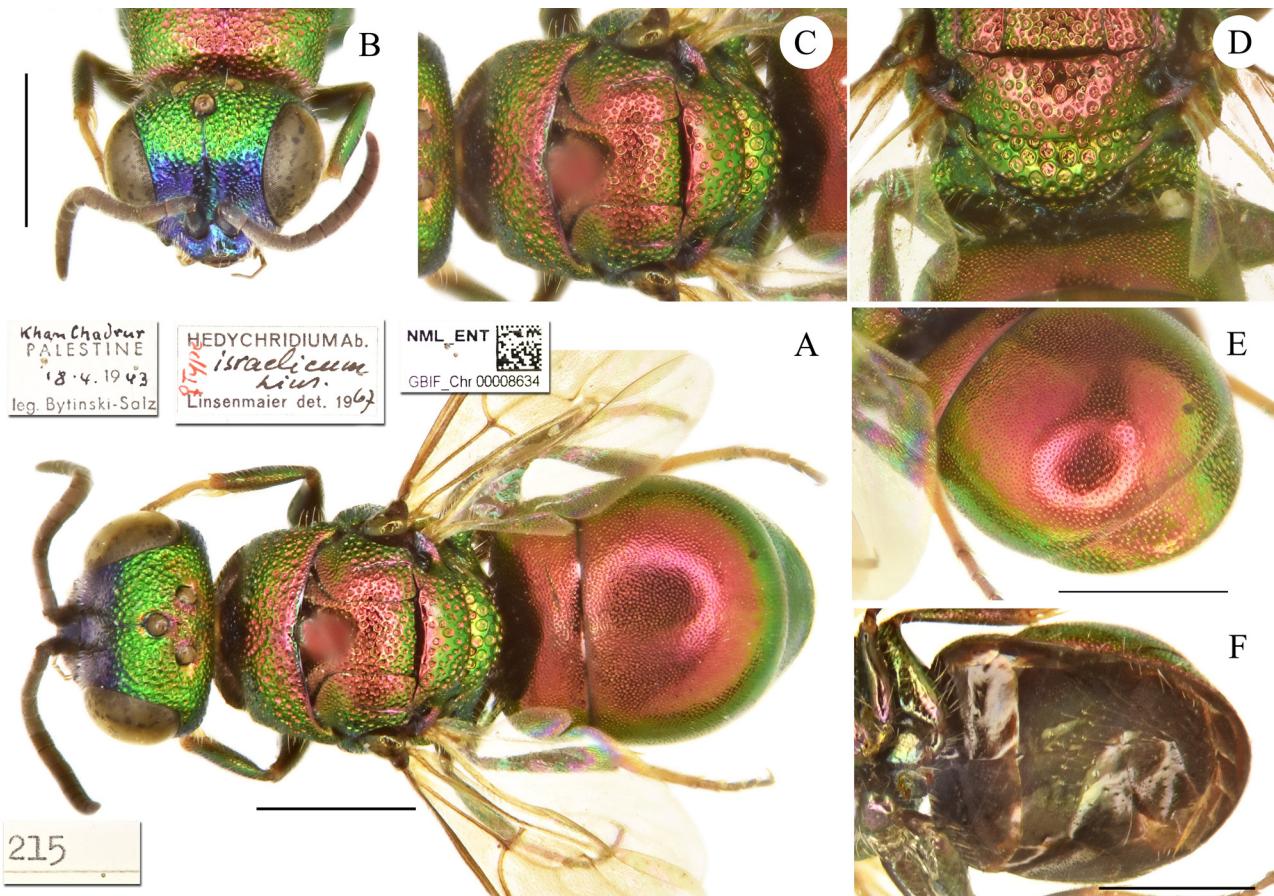

FIGURE 33. *Hedychridium israelicum* Linsenmaier, 1968, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Mesosoma, dorsal view. D) Scutellum, metanotum, propodeum, posterior view. E) Metasoma, postero-lateral view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium lampadum sorianum Linsenmaier, 1959a (Fig. 39A–39F)

Hedychridium (*Hedychridium*) *lampadum sorianum* Linsenmaier, 1959a: 59 (descr., *roseum* group); 187 (cat.); 1968: 36 (distr.); 1997: 257 (tax.).

Type locality. Spain: “Spanien, Marocco. ♂ Type (Soria) und ♂ Paratypen Coll. m., ♂ Paratype (Marocco) Coll. Naef”.

Holotype, ♂: Spanien Soria 1100m VII.44 leg Dr. Marten Coll. Linsenmaier // ♂ Type *Hedychridium Ab. lampadum sorianum* Lins. Linsenmaier det. 1959 // ♂ *Hedychridium Ab. lampadum* Lins. det Linsenmaier 1991 // ♂ *Hedychridium roseum* (Rossi) det. W. Arens 20069 (ex type-collection) // NML_ENT GBIF_Chr0010732.

Paratypes, 1♂: Beni Mellal, Moy. Atlas, Maroc, 26.V.1937 Collect. Naef // ♂ Paratype *Hedychridium Ab. lampadum sorianum* Lins Linsenmaier det. 1959 // ♂ *Hedychridium Ab. lampadum* Lins. det. Linsenmaier 1991 // NML_ENT GBIF_Chr0010645; 1♂: Iframe, Moyen Atlas, Maroc, 24.VI.1947 Collect. Naef // ♂ Paratype *Hedychridium Ab. lampadum* Lins. ssp. *sorianum* Lins. det. Linsenmaier 19579 // ♂ *Hedychridium Ab. lampadum* Lins. det. Linsenmaier 1991 // NML_ENT GBIF_Chr0010646.

Remarks. Linsenmaier selected in the type-collection one female specimen from the type locality as the allotype of *H. lampadum sorianum* bearing the following labels: Spanien Soria 15.–20.VII.1979 leg. Linsenmaier // vorne Allotype ♀ *Hedychridium lampadum sorianum* Lins. det. Linsenmaier 1979 // *Hedychridium insulare mediocrum* Lins. det. W. Arens 2009. This specimen cannot be considered as a type, since it was collected after the original description. Linsenmaier (1997: 257) synonymised *sorianum* Linsenmaier with *lampadum* Linsenmaier: “Lässt sich nicht immer begrenzen und wird von mir nicht weiter geführt”.

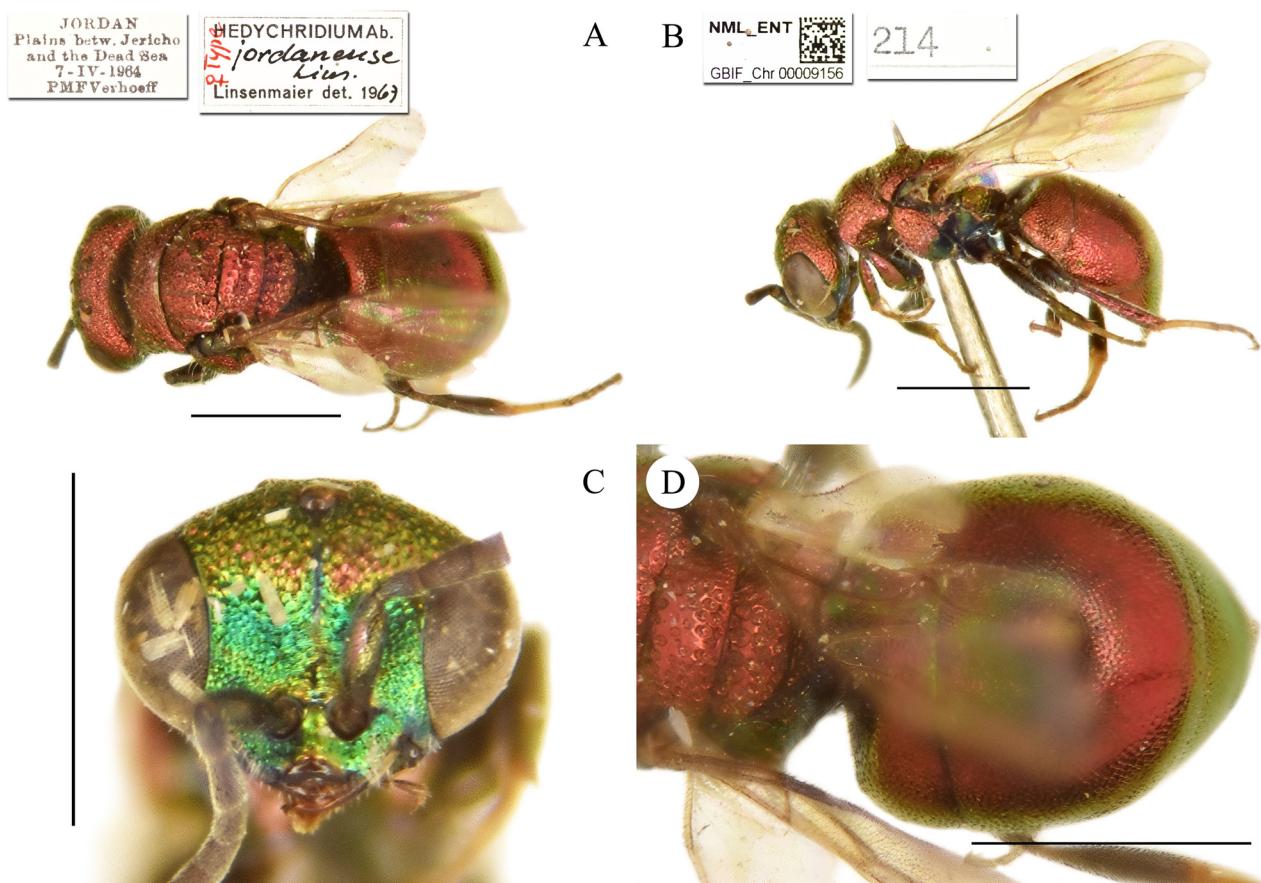

FIGURE 34. *Hedychridium jordanense* Linsenmaier, 1968, holotype, female. A) Habitus, dorsal view. B) Habitus, lateral view. C) Head, frontal view. D) Metasoma, dorsal view. Scale bar 1 mm.

Hedychridium luteipenne Linsenmaier, 1968 (Fig. 40A–40E)

Hedychridium (*Hedychridium*) *luteipenne* Linsenmaier, 1968: 22 (descr., *luteipenne* group); 1999: 55 (key, diagn., *modestum* group), 69 (figs 89, 90).

Type locality. Egypt: “Ägypten, ♂ Type von Kairo (Dahschour), V.58, leg. Pulawski, in Coll. m., ♂ Paratype, Fayum, in Coll Nadig”.

Holotype, ♂: Egypte Dahschour Rég. du Caire 8.V.1958 leg. W.J. Puławski // ♂ Type *Hedychridium* Ab. *luteipenne* Lins. Lisenmaier det. 1963 // 211 // NML_ENT GBIF_Chr0008113 (ex type-collection).

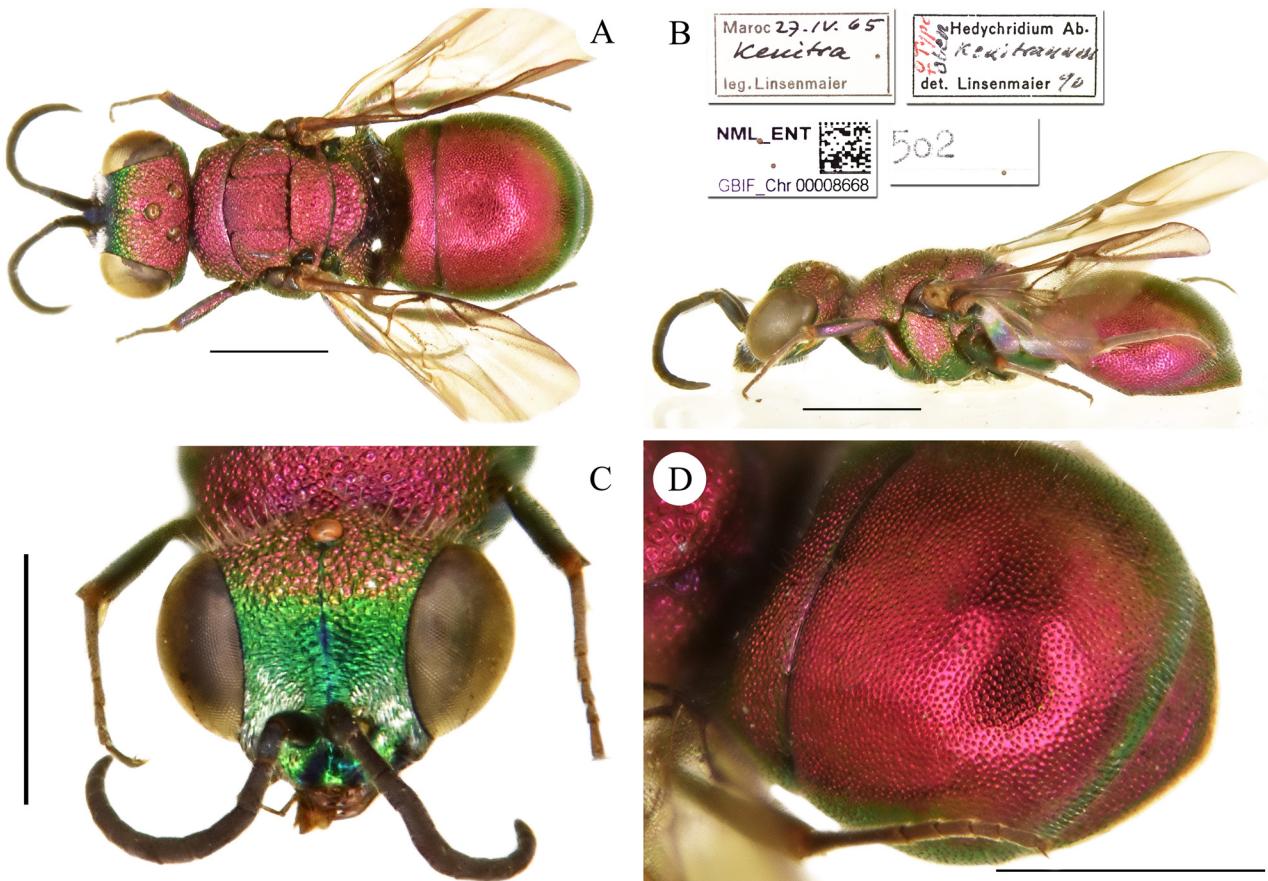

FIGURE 35. *Hedychridium kenitratum* Lisenmaier, 1999, holotype, female. A) Habitus, dorsal view. B) Habitus, lateral view. C) Head, frontal view. D) Metasoma, postero-lateral view. Scale bar 1 mm.

Hedychridium maculiventre raucum Lisenmaier, 1997

(Fig. 41A–41F)

Hedychridium (*Hedychridium*) *maculiventre raucum* Lisenmaier, 1997: 258 (descr., *sculpturatum* group), 289 (fig. 40).
Hedychridium scutellare palestinense Balthasar, 1953: Arens 2010: 407 (synonymised).

Type locality. Turkey: “Turkey, ♂ Type (Holotypus), ♀ Allotype und 2 ♂ Paratypen Konya 22.VI.69, leg. und Coll. m. Paratypen: 2 ♂ Konya, Alti Napa 18.VII.72, Schmidt; 1 ♂ Konya Madensch 23.6.84, Schmidt; 1 ♂ Hakkari Sat Dag 1700 m 8.VII.83, Schacht; - Coll. m.”.

Holotype, ♂: Turkey Konya 22.VI.69 leg. Lisenmaier // ♂ Type *Hedychridium* Ab. *maculiventre raucum* Lisenmaier det. 1995 // *Hedychridium* ♂ *scutellare palestinense* Balth. W. Arens 2005 // 467 // NML_ENT GBIF_Chr0011475 (ex type-collection).

Allotype, ♀: Turkey Denizli 3.VII.69 leg. Lisenmaier // ♀ Allotype *Hedychridium* Ab. *maculiventre raucum* Lisenmaier det. 1995 // *Hedychridium* ♀ *scutellare palestinense* W. Arens 2005 // NML_ENT GBIF_Chr0011476 (ex type-collection).

Paratypes, 2 ♂: Konya As. Türk. Altı Napa Barai 18.VII.1972 leg. Jos. Schmidt // ♂ Paratype *Hedychridium* Ab. *maculiventre raucum* Lisenmaier det. 1995 // *Hedychridium* ♂ *scutellare palestinense* Balth. W. Arens 2005 // NML_ENT GBIF_Chr0011451, Chr0011452; 2 ♂: Turkey Konya 24.VI.69 leg. Lisenmaier // ♂ Paratypen *Hedychridium* Ab. *maculiventre raucum* Lisenmaier det. 1995 // *Hedychridium* ♂ *scutellare palestinense* W. Arens 2005 // NML_ENT GBIF_Chr0011453; 1 ♂: Tk Madenşehir Konya 23.VI.84 1300m Warncke // ♂ Paratype *Hedychridium* Ab. *maculiventre raucum* Lisenmaier det. 1995 // *Hedychridium* ♂ *scutellare palestinense* Balth.

W. Arens 2005 // NML_ENT GBIF_Chro0011454; 1♂: Turkey, Pr. Hakkari Sat Dag. Varegős SW Yüksekova 1700m 4.–8.8.1983 leg. W. Schacht // ♂ Paratype *Hedychridium* Ab. *maculiventre raicum* Linsenmaier det. 1995// *Hedychridium* ♂ *scutellare palestinense* Balth. W. Arens 2005 // NML_ENT GBIF_Chro0011455.

Remarks. According to the original description, the allotype locality is Konya and not Denizli. We consider this a case of *lapsus calami*. Arens (2010) synonymised *H. maculiventre raicum* with *H. palestinense* Balthasar, 1953.

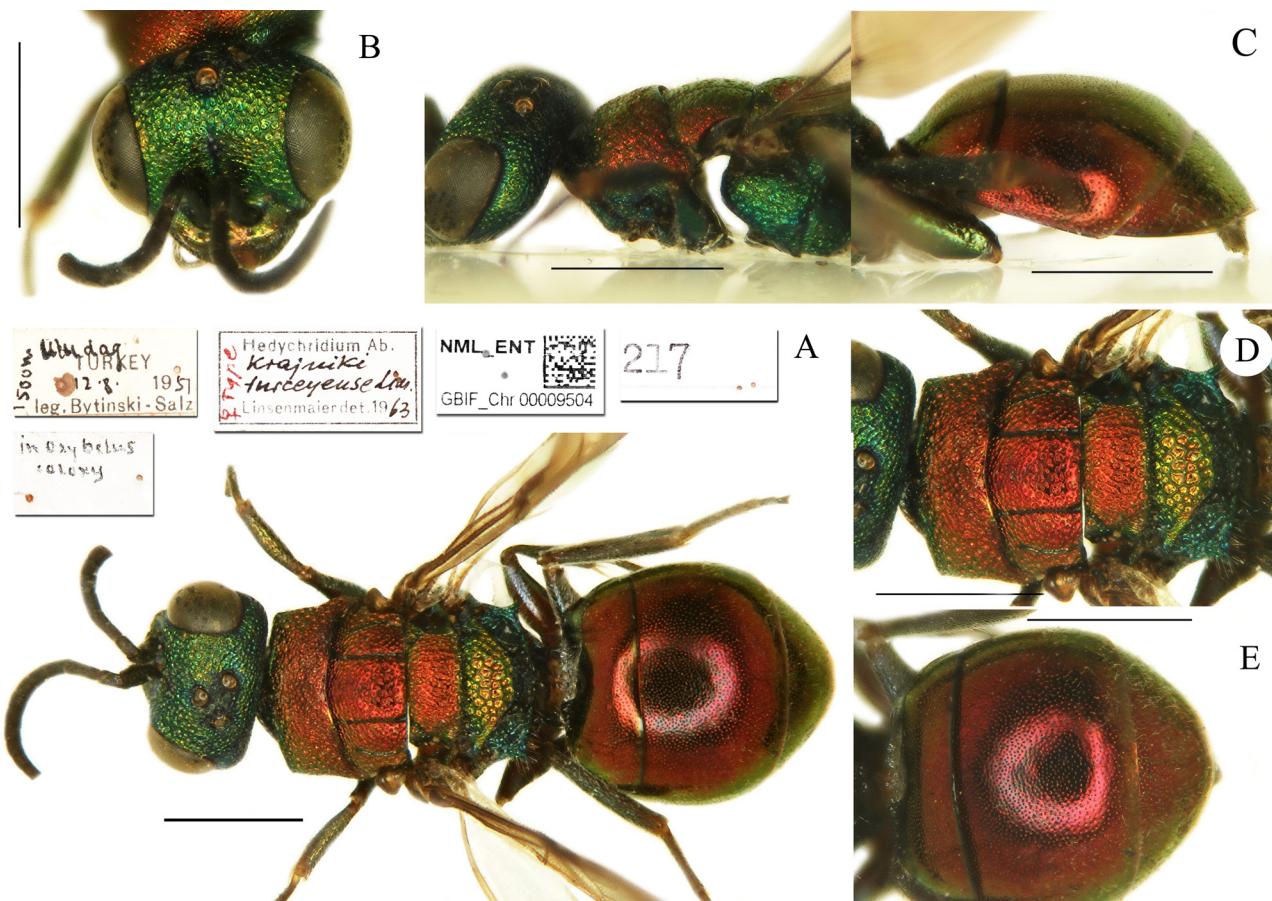

FIGURE 36. *Hedychridium krajniki turceyense* Linsenmaier, 1968, holotype, female. A) Habitus, dorsal view. B) Head frontal view. C) Habitus, lateral view. D) Mesosoma, dorsal view. E) Metasoma, dorsal view. Scale bar 1 mm.

Hedychridium maculiventre maculiventre Linsenmaier, 1959b

Hedychridium (*Hedychridium*) *maculiventre* Linsenmaier, 1959b: 235 (descr., *sculpturatum* group), nec Linsenmaier, 1959a: 63.

Hedychridium scutellare maculisternum Arens, 2011: 316, Replacement name for *Hedychridium maculiventre* Linsenmaier, 1959b, nom. praeocc., nec Linsenmaier, 1959a (*roseum* group).

Type locality. Croatia: “Jugoslawien, ♂ Type, ♀ Allotype Coll. m. (Dalmatien, Omis, VIII. 1952, leg. Verhoeff)”.

Holotype, ♂ and **allotype**, ♀ [glued on the same label]: Yugoslavia Omis (Dalm.) 12.–18.VIII.1952 PMF Verhoeff // *Hedychridium* Ab. *maculiventre* Lins. Linsenmaier det. 1959 // 74 // NML_ENT GBIF_Chro0011450 (ex type-collection).

Remarks. We (Arens and Rosa in Arens 2011) considered *Hedychridium maculiventre* Linsenmaier, 1959b a junior homonym of *H. maculiventre* Linsenmaier, 1959a (unnecessary replacement name for *H. palestinense* Balthasar, 1953) and Arens (2011) proposed the replacement name *H. maculisternum* pro *H. maculiventre* Linsenmaier, 1959b.

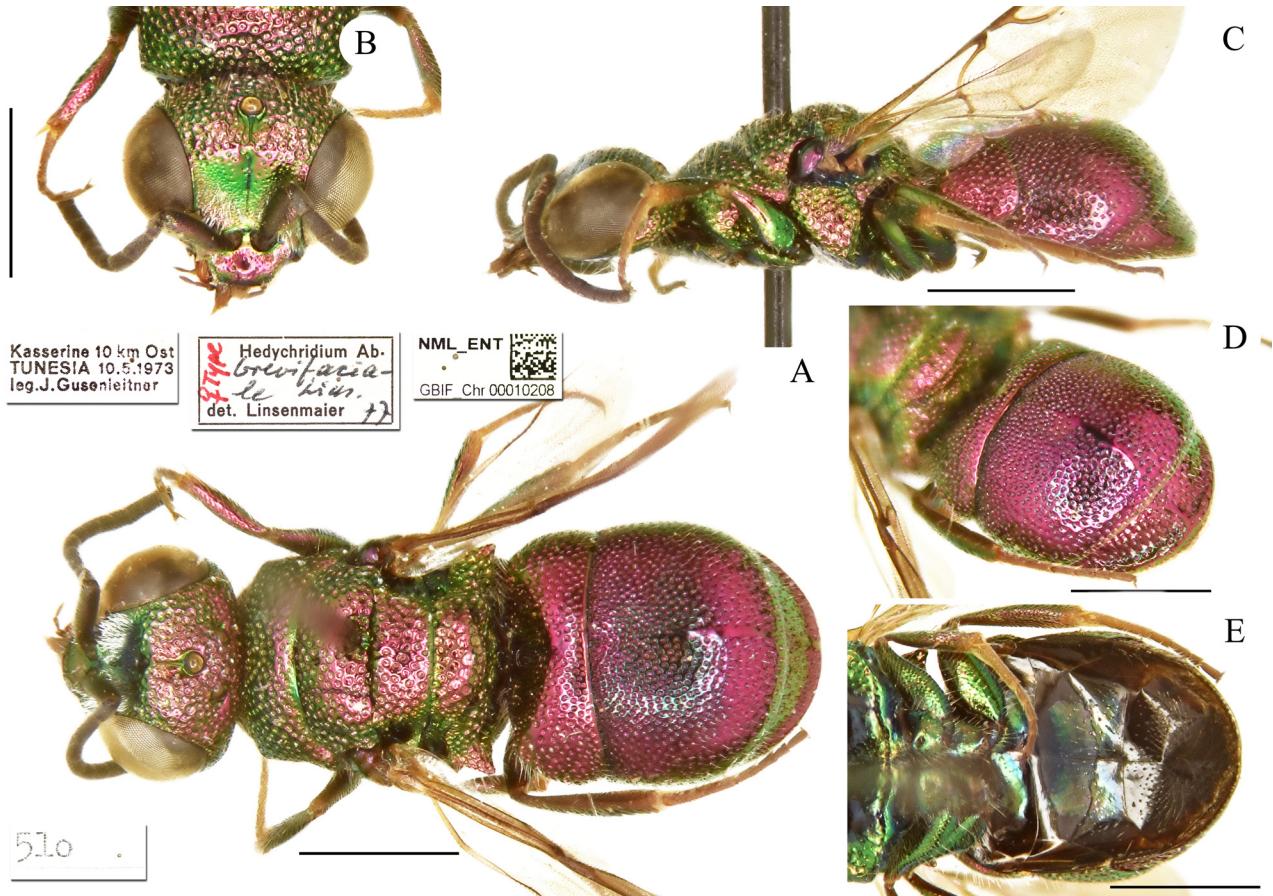

FIGURE 37. *Hedychridium laeviclypeatum* Linsenmaier, 1999, holotype, female. A) Habitus, dorsal view. B) Head frontal view. C) Habitus, lateral view. D) Metasoma, postero-lateral view. E) Metasoma, ventral view. Scale bar 1 mm.

***Hedychridium maculiventre sculpturatissimum* Linsenmaier, 1959a**

(Fig. 42A–42F)

Hedychridium (Hedychridium) maculiventre sculpturatissimum Linsenmaier, 1959a: 63 (descr.), 187 (cat.).
Hedychridium scutellare sculpturatissimum Linsenmaier, 1959a: Arens 2010: 407 (roseum group).

Type locality. Cyprus: “Cypern. ♂ Type, ♀ Allotype (Zakaki, VI.1950 und VII.1955, leg. Mavromoustakis) und Paratypen Coll. m.”.

Holotype, ♂: Cypern 12.VI.1950 Zakaki leg. Mavromoustakis Coll. Linsenmaier // ♂ Type // *Hedychridium maculiventre sculpturatissimum* Lins. det. Linsenmaier // 75 // NML_ENT GBIF_Ch0011560 (ex type-collection).

Allotype, ♀: Zakaki 25.7.55 [Mavromoustakis] // ♀ Allotype *Hedychridium maculiventre sculpturatissimum* Lins. det. Linsenmaier // NML_ENT GBIF_Ch0011561 (ex type-collection).

Paratypes, ♂: Cypern 1.6.50 near Zakaki Mavromoustakis // ♂ Paratype *Hedychridium maculiventre* Lins. ssp. *sculpturatissimum* Lins. det. Linsenmaier // ♂ *Hedychridium palestinense sculpturatissimum* Lins det. W. Arens 2005 // NML_ENT GBIF_Ch0011554; 1♂: Zakaki Cyprus 19.6.36 leg. Mavromoustakis // ♂ Paratype *Hedychridium maculiventre* Lins. ssp. *sculpturatissimum* Lins. det. Linsenmaier // NML_ENT GBIF_Ch0011555; 1♂: Cypern 4.8.49 Yermasoyia River Mavromoustakis // ♂ Paratype *Hedychridium maculiventre* Lins. ssp. *sculpturatissimum* Lins. det. Linsenmaier // NML_ENT GBIF_Ch0011557.

Remarks. More specimens labelled as paratypes are found in collection, but to be excluded from the type series because they have been collected by Mavromoustakis in 1961 (Yermasoyia River and Lania) and 1963 (Limassol), after the original description.

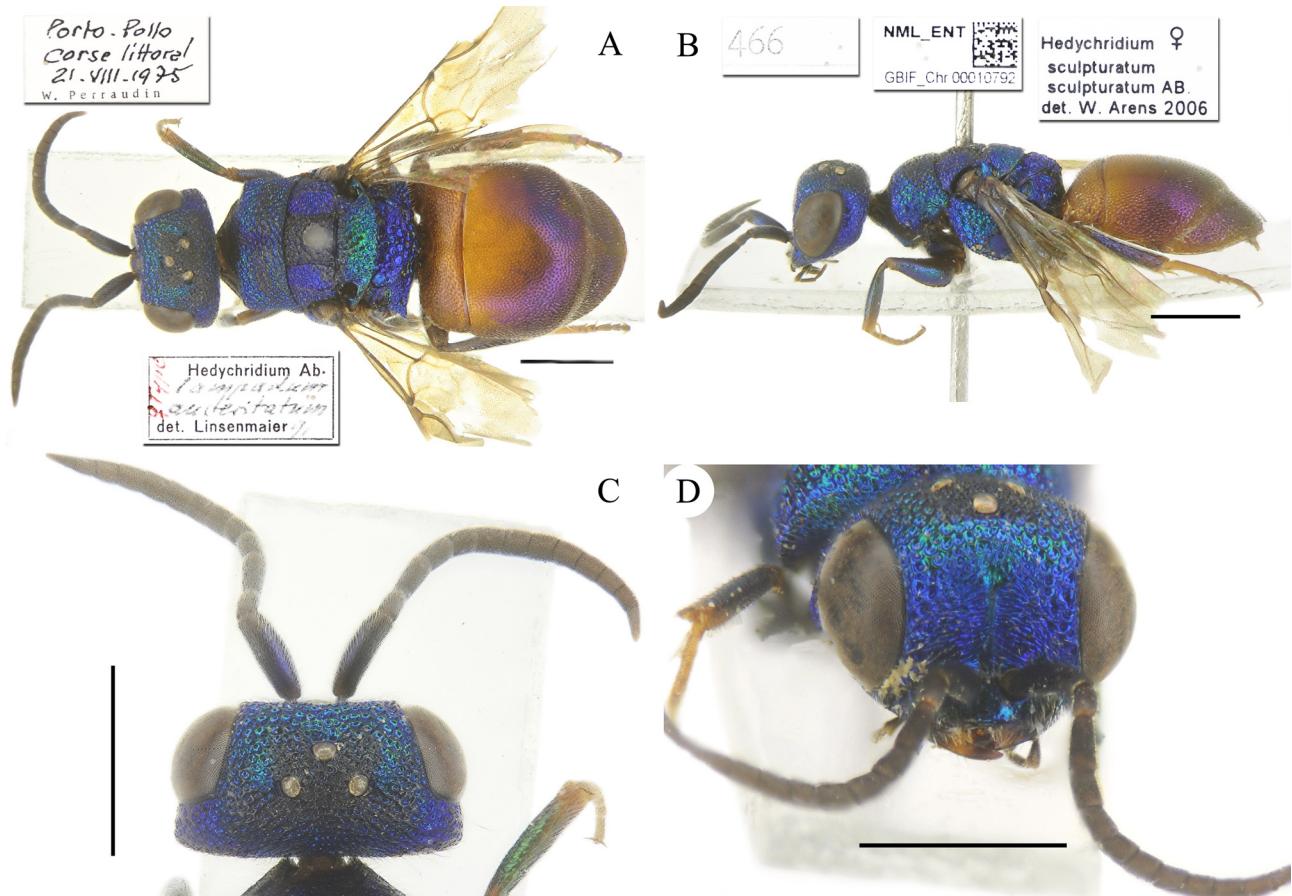

FIGURE 38. *Hedychridium lampadum austerritatum* Linsenmaier, 1997, holotype, female. A) Habitus, dorsal view. B) Habitus, lateral view. C) Head, dorsal view. D) Head, frontal view. Scale bar 1 mm.

Hedychridium maroccense Linsenmaier, 1959a

(Fig. 43A–43F)

Hedychridium (*Hedychridium*) *maroccense* Linsenmaier, 1959a: 64 (key, descr., *sculpturatum* group), 187 (cat.), 198 (figs 130, 131); 1969: 353 (cat.); 1999: 84 (key), 85 (diagn.).

Lisenmaier det. 1959 // NML_ENT GBIF_Chro0011239.

Remarks. We could not locate the holotype and the allotype of *Hedychridium mediocre* Lisenmaier, 1959a. Very likely, Lisenmaier removed the types from the type collection when the species was synonymised, removing also the original type label, as he already did in other cases (Rosa et al. 2015). However, in collection there are the paratype specimens collected by Lisenmaier at Soria during the same collecting event in 1957. If needed, and in case that the holotype is not found, it will be possible to select a paratype as neotype.

Paratypes, 1 ♂: Cagliari 21.VII.1959 H. Wolf / Poetto // ♂ Paratype *Hedychridium Ab. mediocre sardiniense* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chro0011355; 1 ♀: Cagliari 23.VII.1959 H. Wolf / Poetto // ♀ Paratype *Hedychridium Ab. mediocre sardiniense* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chro0011384.

Remarks. Arens (2010) synonymised *H. mediocre sardiniense* with *H. scutellare scutellare* (Tournier, 1878).

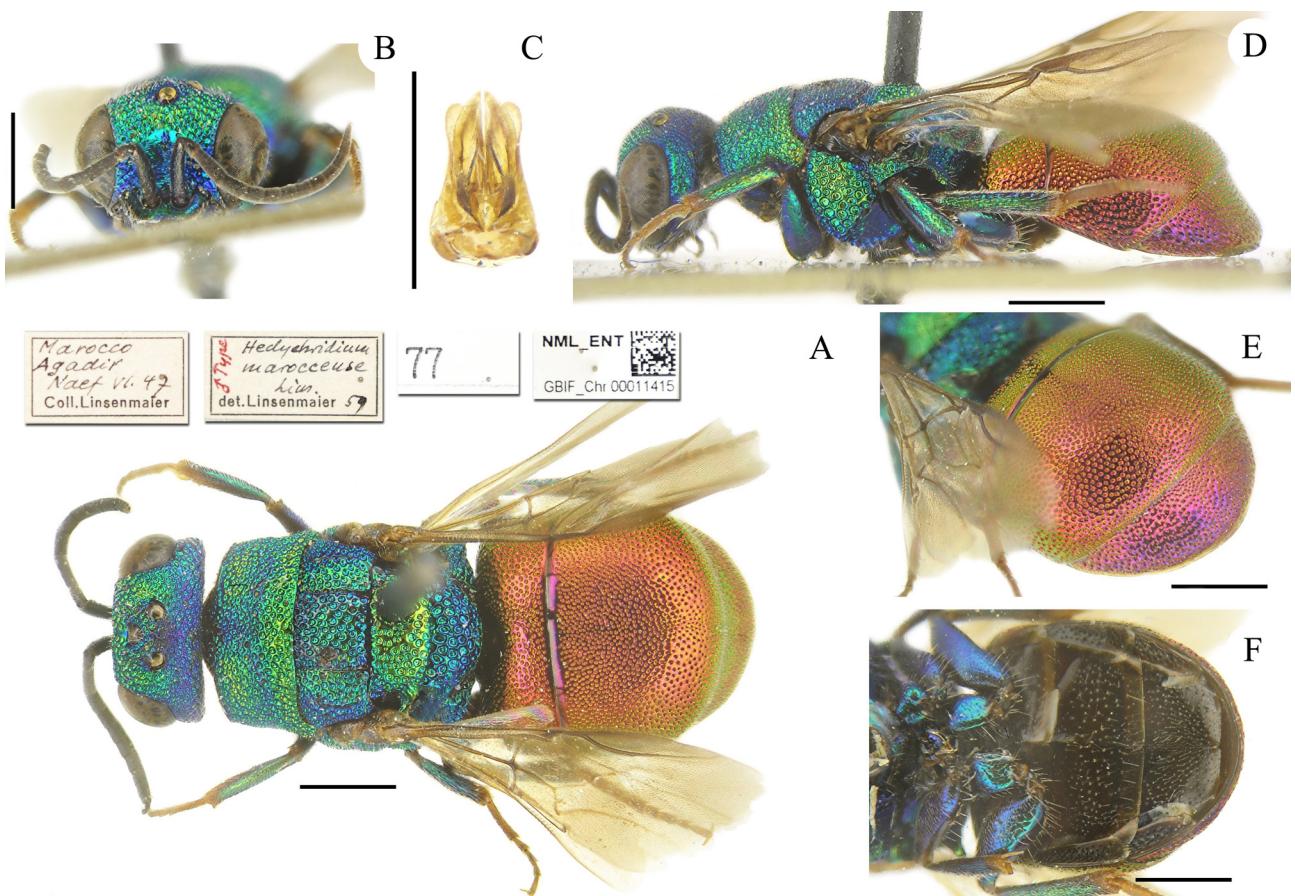

FIGURE 43. *Hedychrnidium maroccense* Linsenmaier, 1959a, holotype, male. A) Habitus, dorsal view. B) Head, frontal view. C) Genital capsule. D) Habitus, lateral view. E) Metasoma, postero-lateral view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychrnidium mediocre tunesiense Linsenmaier, 1959a

(Fig. 46A–46B)

Hedychrnidium (*Hedychrnidium*) *mediocre tunesiense* Linsenmaier, 1959a: 64 (descr., *sculpturatum* group), 187 (cat.); 1969: 353 (cat.).

Hedychrnidium (*Hedychrnidium*) *scutellare tunesiense*: Linsenmaier 1987: 142 (tax.).

Hedychrnidium tunesiense: Linsenmaier 1999: 84 (key, upgraded to species rank), 85 (diagn.), 88 (fig. 141).

Type locality. Tunisia: “Tunesien. ♂ Type Coll. m. (Kairouan, leg. Santschi)”.

Holotype, ♂: Kairouan 15.VI.17 // ♂ Type *Hedychrnidium mediocre* Lins. ssp. *tunesiense* Lins. Linsenmaier 1959 // 78 // ♂ *Hedychrnidium scutellare tunesiense* det. Linsenmaier 1982 // NML_ENT GBIF_Chr0011386 (ex type-collection).

Remarks. Linsenmaier (1999) elevated *Hedychrnidium mediocre tunesiense* to species rank.

Hedychrnidium mediocrum Linsenmaier, 1987

(Fig. 47A–47F)

Hedychrnidium (*Hedychrnidium*) *mediocrum* Linsenmaier, 1987: 142 (descr.).

Hedychrnidium mediocrate Kimsey in Kimsey & Bohart 1991: 199. Unnecessary replacement name for *Hedychrnidium mediocrum* Linsenmaier, 1987.

Hedychrnidium insulare mediocrum: Arens 2010: 407 (roseum group).

Type locality. Switzerland: “♂ Type Wallis, Coll. m. - Verbreitung mehr in Mitteleuropa (auch im Osten) [=more spread in Central Europe (also in the East)], im Süden seltener als *scutellare* T, so in Spanien, S. Frankreich, Bulgarien; aus Italien und Sizilien sah ich kein Stück [=in the south less common than *scutellare* Trautmann, so in Spain, S. France, Bulgaria; I did not see any specimen from Italy or Sicily].”

Holotype, ♂: Wallis B 550m 9.6.56 Linsenmaier // ♂ Type *Hedychridium Ab. mediocrum* Lins. det. Linsenmaier 86 // *Hedychridium ♂ insulare lampadum* Lins. det. W. Arens 2006 // NML_ENT GBIF_Chr0011197.

Remarks. Linsenmaier (1959a) described *Hedychridium mediocre* based on specimens from Spain, southern France, Italy, and Sicily. At the same time, he reported *H. scutellare* from southwestern Switzerland, southern France, Spain and Hungary. Subsequently, Linsenmaier (1987) realised that he inverted the identification of the two species and that *H. mediocre* is the junior synonym of *H. scutellare*. Therefore, he corrected his earlier (1959a) interpretation, and the species previously interpreted as *H. scutellare* turned out to be still undescribed. Linsenmaier (1987), with a choice that is at least questionable, described this species with the name *H. mediocrum*. This name, as it was easy to foresee, proved to be a source of further confusion, as it was mistakenly considered junior homonym of *H. mediocre* by Kimsey & Bohart (1991), who replaced *H. mediocrum* with *H. mediocrate* Kimsey. However, based on the rules of the International Nomenclature Code, the name *H. mediocrum* is valid, as it is evidently not a wrong spelling of *mediocre*, but the explicit intention of providing a new name, a Latin adjective of the first class rather than the second.

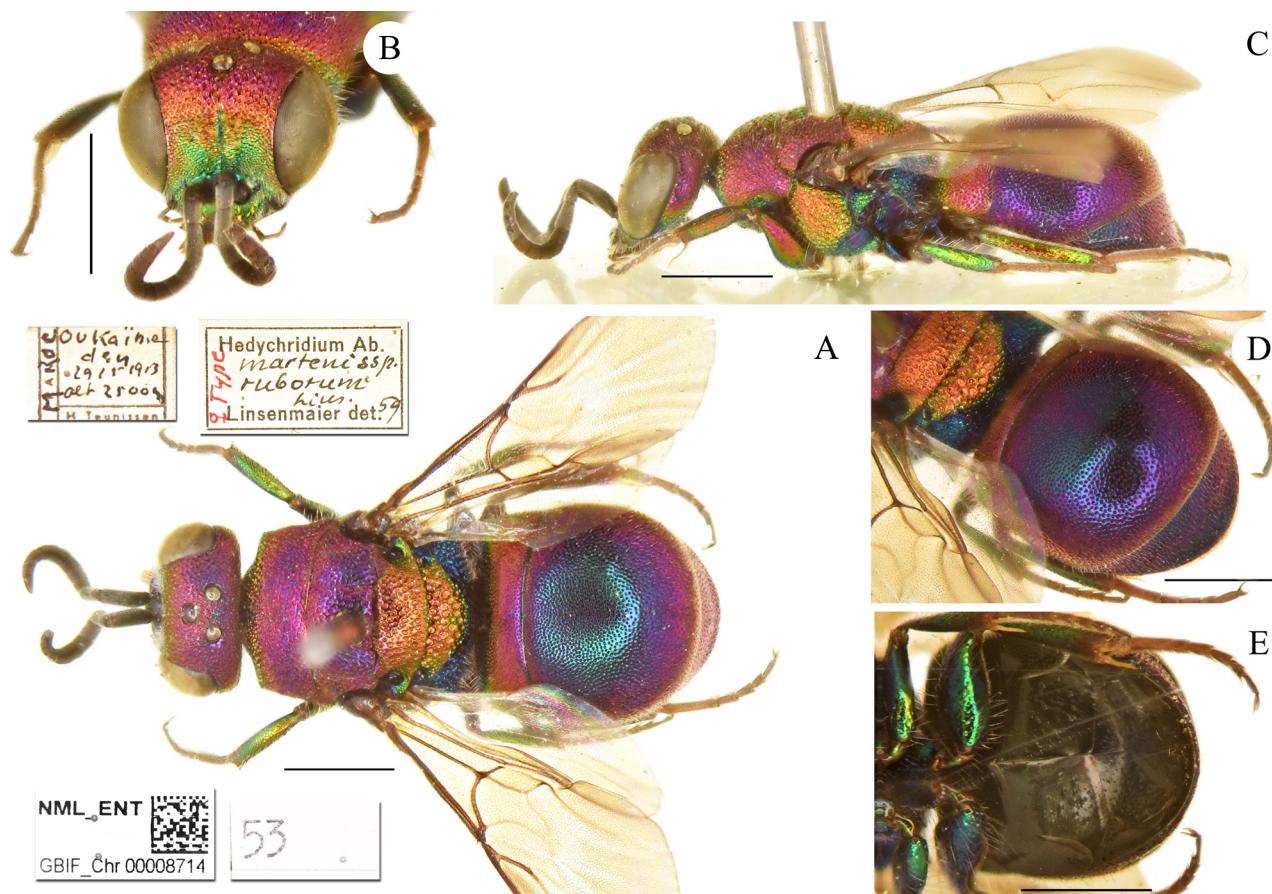

FIGURE 44. *Hedychridium marteni ruborum* Linsenmaier, 1959a, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, postero-lateral view. E) Metasoma, ventral view. Scale bar 1 mm.

Remarks. Linsenmaier (1968: 29) added some more diagnostic characters to the original short description.

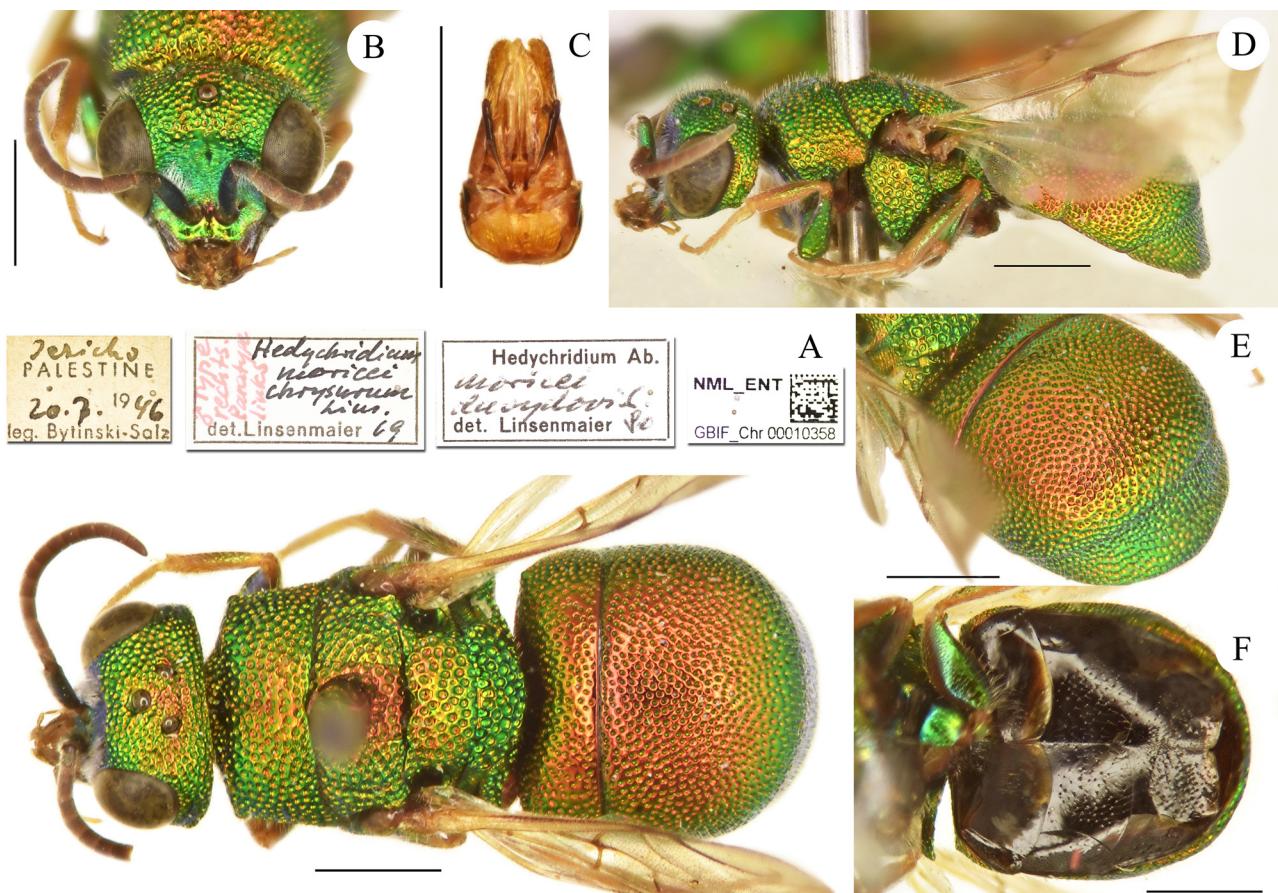

FIGURE 48. *Hedychridium moricei chrysurus* Linsenmaier, 1969, paratype, male. A) Habitus, dorsal view. B) Head, frontal view. C) Genital capsule. D) Habitus, lateral view. E) Metasoma, postero-lateral view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium piligastre Linsenmaier, 1969

(Fig. 53A–53F)

Hedychridium (*Hedychridium*) *piligastre* Linsenmaier, 1969: 352 (cat., *incrassatum* group), 373 (descr.).

Type locality. Palestine: “♂ Type: Tiberias 12.VI.46 leg. Bytinski-Salz in coll. m.”.

Holotype, ♂: Tiberias Israel 12.VI.1946 leg. Bytinski-Salz // ♂ Type *Hedychridium Ab. piligaster* Lins. Linsenmaier det. 1969 // 312 // NML_ENT GBIF_Chro0010470 (ex type-collection).

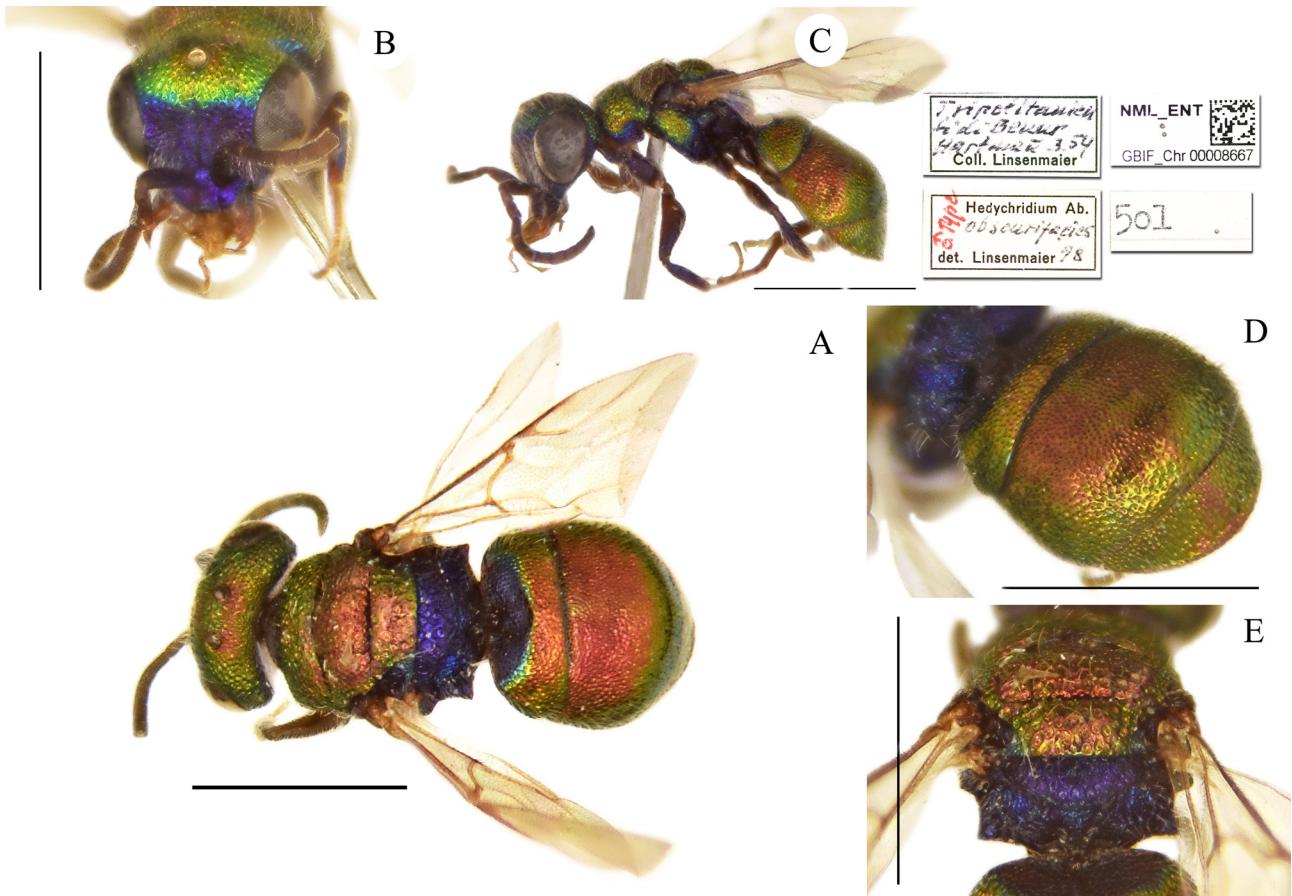

FIGURE 49. *Hedychridium obscurifacies* Linsenmaier, 1999, holotype, male. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, postero-lateral view. E) Scutellum, metanotum, propodeum, posterior view. Scale bar 1 mm.

Hedychridium placare Linsenmaier, 1968

Hedychridium (Hedychridium) placare Linsenmaier, 1968: 37 (descr., *sculpturatum* group).

Hedychridium sculpturatum pseudoroseum Linsenmaier, 1959a: Arens 2010: 407 (synonymised, *roseum* group).

Type locality. Cyprus: “Cypern, ♂ Type Yermasoyia River, leg. Mavromoustakis, in Coll. m.”.

Holotype, ♂: Cypern 30.VIII.61 Yermasoyia River leg. Mavromoustakis Coll. Linsenmaier // ♂ Type *Hedychridium Ab. placare* Lins. Linsenmaier det. // NML_ENT GBIF_Chr0011419 (ex type-collection).

Remarks. Arens (2010: 407) considered *Hedychridium placare* the male of *H. sculpturatum pseudoroseum* Linsenmaier, 1959 and synonymised it with the latter.

Hedychridium projucundum Linsenmaier, 1959a

(Fig. 54A–54F)

Hedychridium (Hedychridium) projucundum Linsenmaier, 1959a: 44 (key), 45 (key), 49 (descr.), 187 (cat.), 200 (fig. 195).
Hedychridium (Hedychridium) bytinskii Linsenmaier, 1959a: Linsenmaier 1968: 25 (synonymised).

Type locality. Morocco, Palestine: “Nord-Afrika, Palästina. ♂ Type (Marocco, Mehdia V.–VI.1950, leg. Verhoeff) Coll. m., ♀ Allotype (Marocco) Coll. de Beaumont, Paratypen in Coll. Naef, Verhoeff und Coll. m.”.

Holotype, ♂: Maroc Mehdia (Pt Lyautey) 31.V.–1.VI.1950 PMF Verhoeff // ♂ Type *Hedychridium projucundum* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chr0008465 (ex type-collection).

Remarks. Linsenmaier (1968) synonymised *Hedychridium projucundum* with *H. bytinskii* Linsenmaier, 1959a. We could not find paratypes of this taxon under the names of *H. projucundum* nor *H. bytinskii* in the Linsenmaier collection (given as “paratypen in Coll. m.”).

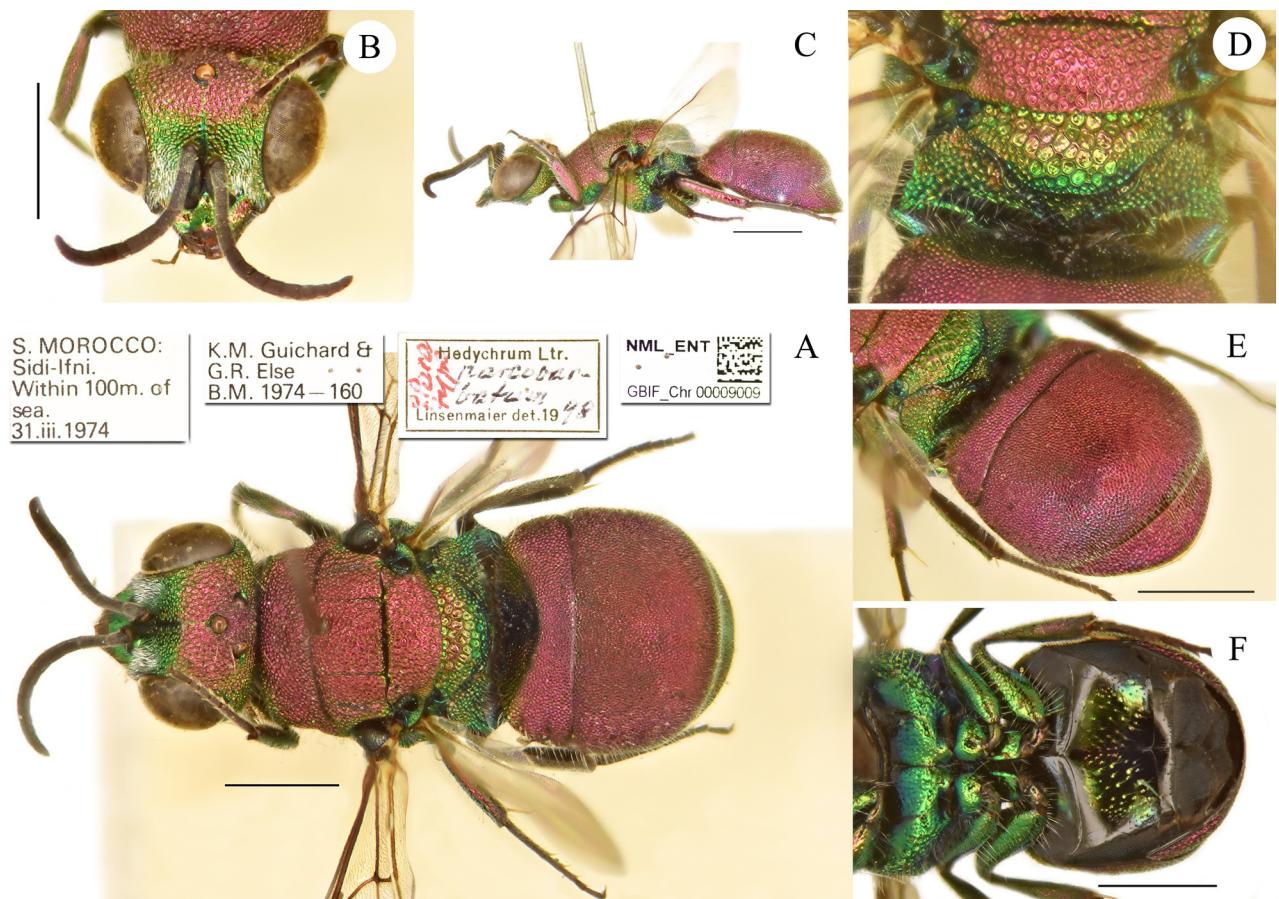

FIGURE 50. *Hedychridium parcobarbatum* Linsenmaier, 1999, paratype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Scutellum, metanotum, propodeum, posterior view. E) Metasoma, postero-lateral view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium proreticulatum Linsenmaier, 1999

(Fig. 55A–55E)

Hedychridium (Hedychridium) proreticulatum Linsenmaier, 1999: 60 (key, *ardens* group), 67 (descr.), 69 (figs 111, 112).

Type locality. Tunisia: “Tunesien, Jendouba 14.V.1973 J. Gusenleitner und J. Schmidt, ♀ Type (Holotypus), ♂ Allotype Coll. m.; Paratypen: Jendouba, Fernana, Kasserine 10.–16.V.1973 Gusenleitner u. Schmidt; Jendouba 11.IV.1981 J. Gusenleitner u. M. Schwarz; Teboursouk 16.V.1992 J. Gusenleitner; Afouz 26.IV.1980 H. Tussac. - Coll. Gusenleitner, Schmidt, Schwarz, Tussac und m.”.

Holotype, ♀: Jendouba, 15 km Süd, Tunesia, 14.5.1973, leg. J. Gusenleitner // ♀ Type *Hedychridium* Ab. *proreticulatum* Lins. Linsenmaier det. 1977 // 505 // NML_ENT GBIF_Chr0009015 (ex type-collection).

Allotype, ♂: Jendouba, 15 km Süd, Tunesia, 14.V.1973, leg. Jos. Schmidt // ♂ Allotype *Hedychridium* Ab. *proreticulatum* Lins. det. Linsenmaier 1977 // NML_ENT GBIF_Chr0009016 (ex type-collection).

Paratypes, 1♂: Fernana Tunesien 13.V.1973 leg. Jos. Schmidt // ♂ Paratype *Hedychridium* Ab. *proreticulatum* Lins. det. Linsenmaier // ♀ Paratype *Hedychridium Ab. pseudoroseum* Lins. Linsenmaier det. 59 // ♀ *Hedychridium sculpturatum pseudoroseum* Lins. det. W. Arens 2005 // NML_ENT GBIF_Chr0011011.

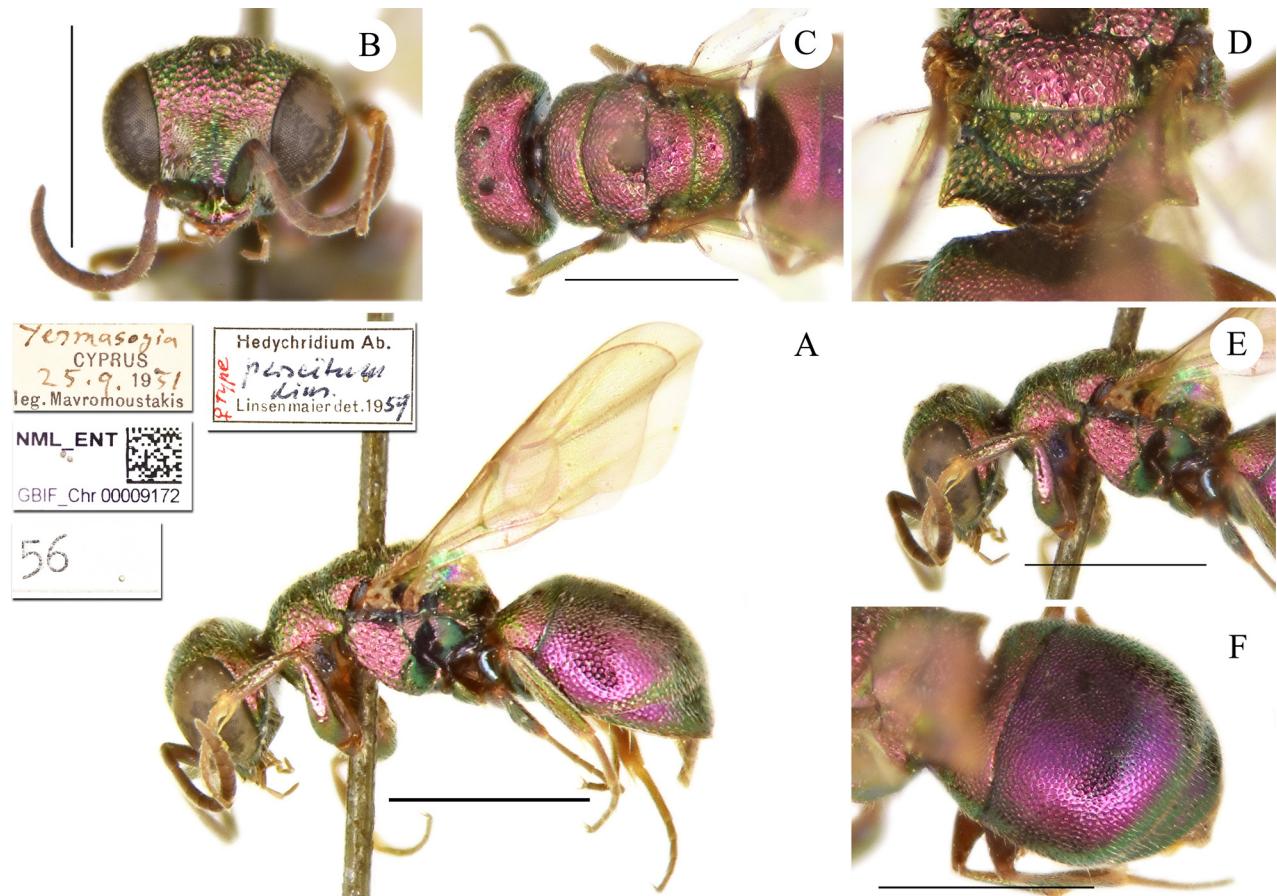

FIGURE 52. *Hedychridium perscitum* Linsenmaier, 1959a, holotype, female. A) Habitus, lateral view. B) Head, frontal view. C) Head and mesosoma, dorsal view. D) Scutellum, metanotum, propodeum, posterior view. E) Head and mesosoma, lateral view. F) Metasoma, postero-lateral view. Scale bar 1 mm.

Hedychridium rectianale Linsenmaier, 1999 (Fig. 58A–58E)

Hedychridium (Hedychridium) rectianale Linsenmaier, 1999: 55 (key, *modestum* group), 56 (descr.), 69 (figs 93–96).

Type locality. Morocco: “Marokko, Atlas S-Sahara, Agdz 1000 m 14.VII.1975, A.W. Ebmer, ♂ Type (Holotypus) Coll. m.”.

Holotype, ♂: Marokko, Agdz Umg., 1000m, (sudl. Sahara Atlas), 14.7.1975, leg. A.W. Ebmer // ♂ Type *Hedychridium Ab. rectianale* Lins. Linsenmaier det. 1998 // 499 // NML_ENT GBIF_Chr0008122 (ex type-collection).

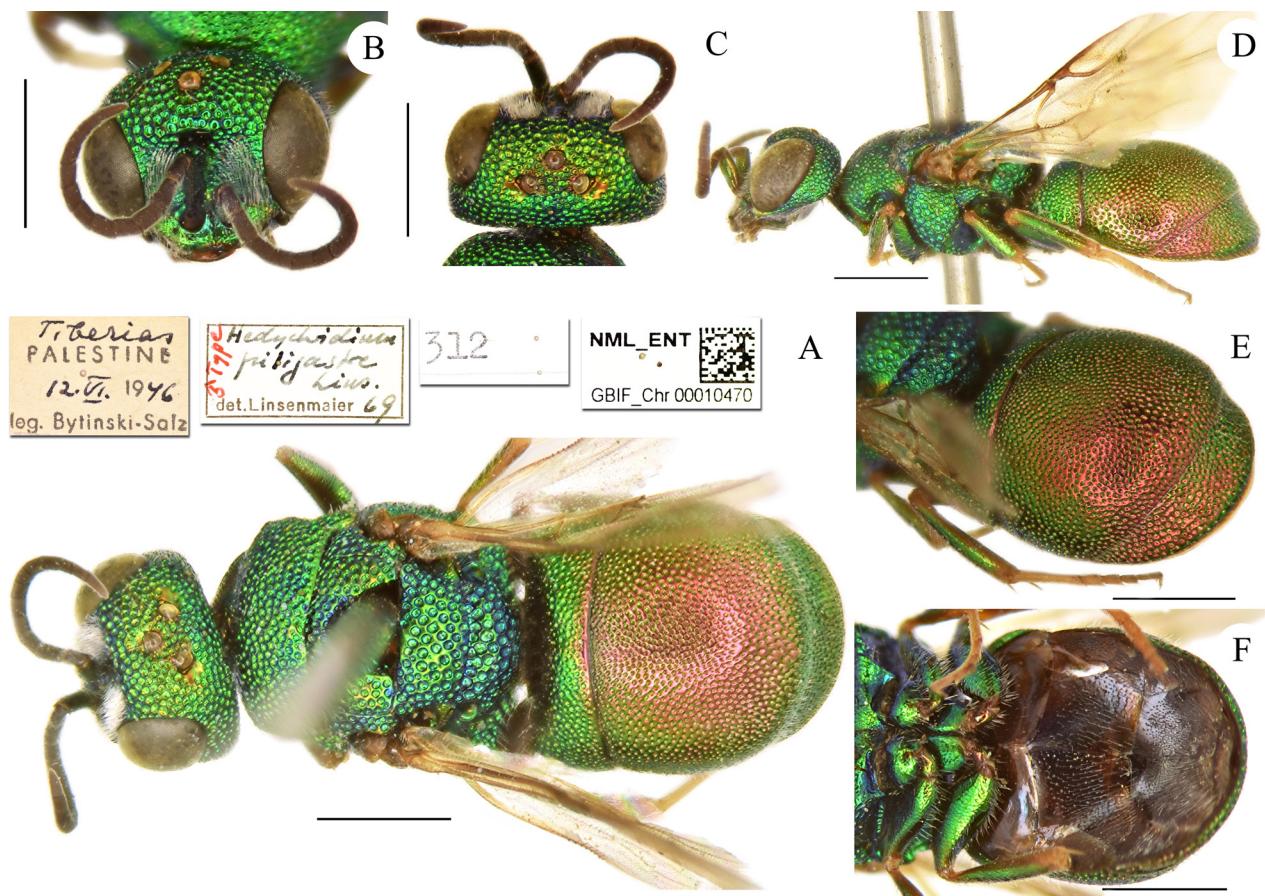

FIGURE 53. *Hedychridium piligaster* Linsenmaier, 1969, holotype, male. A) Habitus, dorsal view. B) Head, frontal view. C) Head, dorsal view. D) Habitus, lateral view. E) Metasoma, postero-lateral view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium reticulatum marteni Linsenmaier, 1951

(Fig. 59A–59E)

Hedychridium reticulatum marteni: Linsenmaier, 1951: 24 (descr.), 98 (cat.).

Hedychridium rhodojanthium marteni; Linsenmaier 1959a: 45 (key), 50 (diagn., upgraded to species rank), 187 (cat.); 1968: 26 (diagn., *ardens* group); 1997: 254 (diag., distr.).

Type locality. Spain: “♀ Type in meiner Sammlung [=in my collection], Spanien (Prov. Soria, leg. Dr. Marten, Juli 1944)”.

Holotype, ♀: Spanien VII.44 Prov. Soria 1100m leg. Dr. W. Marten Coll. Linsenmaier // Type *reticulatum* Ab. var. *marteni* ♀ Linsenmaier // 2 // NML_ENT GBIF_Chr0008693 (ex type-collection).

Remarks. Linsenmaier labelled one male specimen as the allotype, labelled: Spanien Teruel Albarracin 2.7.1994 Linsenmaier. This specimen has no type status because collected after the original description and not included in the original type series. Linsenmaier (1959a: 50) elevated the taxon to species rank.

Hedychridium (Hedychridium) rhodojantinum mutense Linsenmaier, 1968

(Fig. 60A–60F)

Hedychridium (Hedychridium) rhodojantinum mutense Linsenmaier, 1968: 130 (descr., *monochroum* group); 1987: 141 (diagn., distr.).

Type locality. Turkey: “Klein-Asien, Mut, V.65 und 67, leg. Giesenleitner und Schmidt, ♂ Type, ♀ Allotype und Paratypen in Coll. m., Paratypen in Coll. Giesenleitner und Schmidt”.

Holotype, ♂: Mut 9.6.–13.6.1965 Asia minor leg. J. Guseleinleitner // ♂ Type *Hedychridium Ab. rhodojanthinum mutense* Lins. Lisenmaier det. 1965 // 300 // NML_ENT GBIF_Chro0009802 (ex type-collection).

Allotype, ♀: Mut 27.5.1967 Türkei leg. J. Guseleinleitner // ♀ Allotype *Hedychridium Ab. rhodojanthinum mutense* Lins. Lisenmaier det. 1968 // NML_ENT GBIF_Chro0009803 (ex type-collection).

Paratype, 1♂: Mut Asia minor 27.–30.V.1967 leg. Jos. Schmidt // ♂ Paratype *Hedychridium Ab. rhodojanthinum mutense* Lins. Lisenmaier det. 1968 // NML_ENT GBIF_Chro0009804.

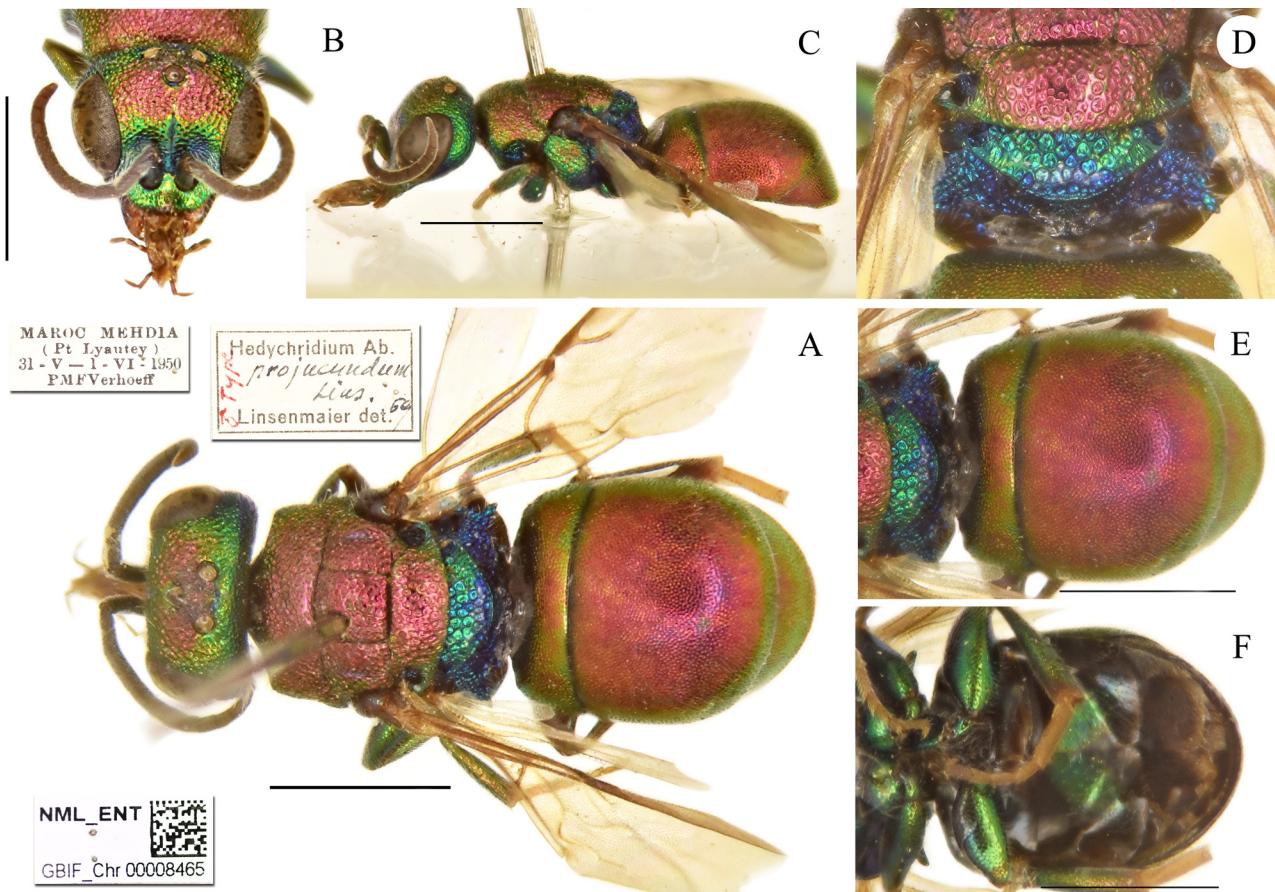

FIGURE 54. *Hedychridium projucundum* Lisenmaier, 1959a, holotype, male. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Scutellum, metanotum, propodeum, posterior view. E) Metasoma, dorsal view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium rubrescens Lisenmaier, 1999

(Fig. 61A–61F)

Hedychridium (Hedychridium) rubrescens Lisenmaier, 1999: 75 (key, *incrassatum* group), 76 (descr.), 88 (fig. 132).

Type locality. Morocco: “Marokko, Casablanca Ain Diab 28.IV.1965, ♂ Type (Holotypus) und ♀ Allotype leg. u. Coll. m.; Fedhala 29.V.1937, R.M. Naef, ♂ Paratype Coll. m.”.

Holotype, ♂: Maroc, 28.IV.65, Casablanca, Ain Diab, leg. Lisenmaier // ♂ Type *Hedychridium Ab. rubrescens* Lins. Lisenmaier det. 1965 // 509 // NML_ENT GBIF_Chro0010205 (ex type-collection).

Allotype, ♀: Maroc, 4.VII.63, Casablanca, Ain Diab, leg. Lisenmaier // ♀ Allotype *Hedychridium Ab. rubrescens* Lins. Lisenmaier det. 1965 // NML_ENT GBIF_Chro0010206 (ex type-collection).

Paratype, 1♂: Fedala (Casab.) Marokko, 29.V.1937 Collect. Naef // ♂ Paratype *Hedychridium Ab. rubrescens* Lins. Lisenmaier det. 1979 // NML_ENT GBIF_Chro0010207 (ex type-collection).

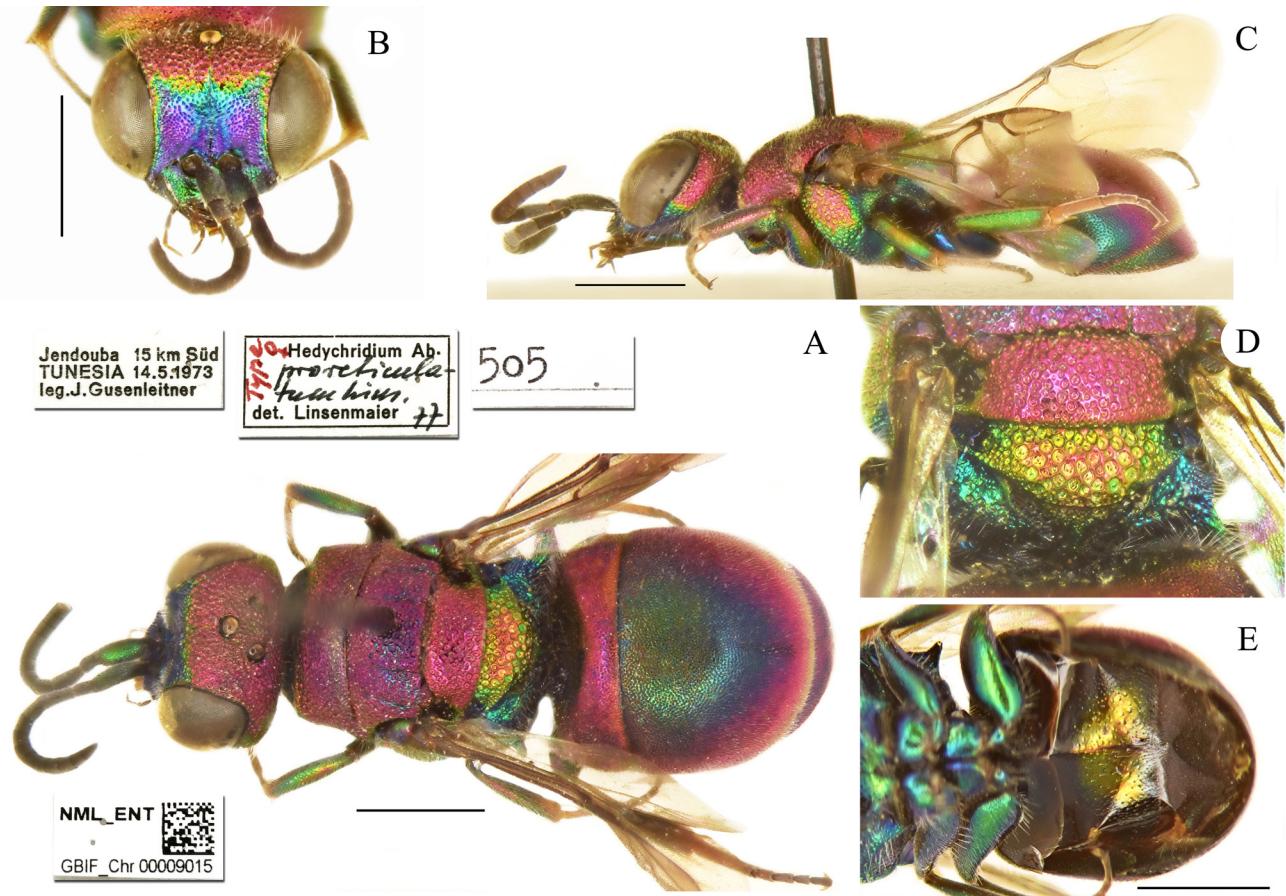

FIGURE 55. *Hedychridium proreticulatum* Linsenmaier, 1999, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Scutellum, metanotum, propodeum, posterior view. E) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium rubrum Linsenmaier, 1968

(Fig. 62A–62E)

Hedychridium (Hedychridium) rubrum Linsenmaier, 1968: 128 (descr., *ardens* group).

Type locality. Turkey: “Klein-Asien, Birecik, V.67, leg. Guseleinleitner, ♀ Type in Coll. m.”.

Holotype, ♀: Birecik 18.5.1967 Türkei leg. J. Guseleinleitner // ♀ Type *Hedychridium Ab. rubrum* Lins. Linsenmaier det. 1968 (ex type-collection) // 298 // NML_ENT GBIF_Chr0008241.

Remarks. Linsenmaier labelled a male specimen in the type-collection as allotype, bearing the following labels: Gürün As. Türk. 6.VI.1970 leg. J. Schmidt // ♂ Type *Hedychridium Ab. rubrum* Lins. Linsenmaier det. 1973. This specimen was collected after the original description and does not belong to type series.

Hedychridium sardinum Linsenmaier, 1997

(Fig. 63A–63F)

Hedychridium (Hedychridium) sardinum Linsenmaier, 1997: 258 (descr., *sculpturatum* group), 289 (fig. 43).
Hedychridium scutellare (Tournier, 1878): Arens 2010: 407 (synonymised, *roseum* group).

Type locality. Italy, Sardinia: “Sardinien, Alghero Porticciolo VII.91, Schlaefle, ♀ Type (Holotypus) Coll. m.”.

Holotype, ♀: Sardinien Algh. Porticciolo 17.7.91, Schlaefle // ♀ Type *Hedychridium Ab. sardinum* Lins.

Linsenmaier det. 1996 // *Hedychridium* ♀ *scutellare sardiniense* W. Arens 2005 (ex type-collection) // 468 // NML_ENT GBIF_Chr0011417.

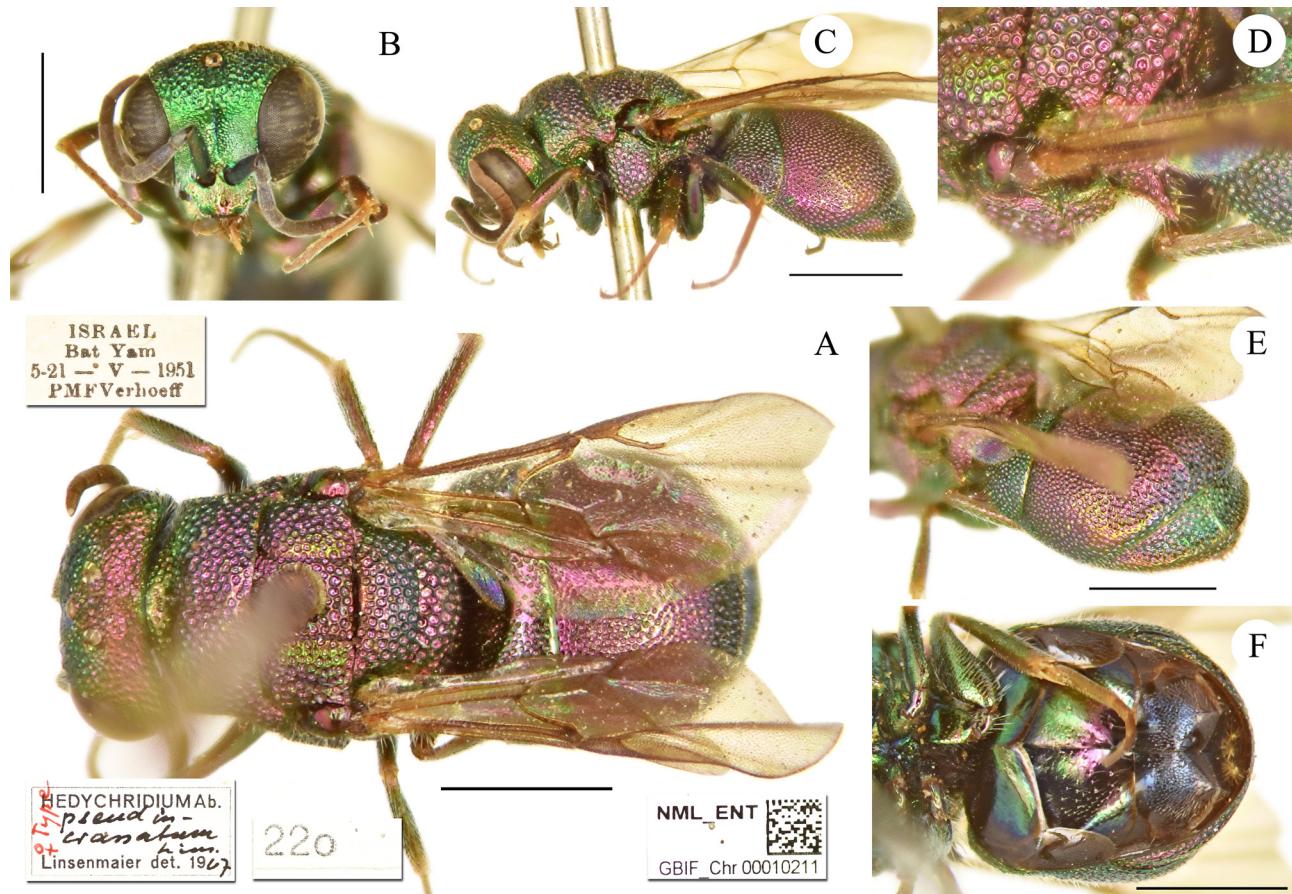

FIGURE 56. *Hedychridium pseudocrassatum* Linsenmaier, 1968, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Posterior propodeal angle, lateral view. E) Metasoma, postero-lateral view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium semiluteum Linsenmaier, 1959a

(Fig. 64A–64E)

Hedychridium (*Hedychridium*) *semiluteum* Linsenmaier, 1959a: 57 (key, *roseum* group), 60 (descr.), 187 (cat.).

Type locality. Cyprus: “Cypern, ♀ Type (Yermasoyia Hills, IX.1951, leg. Mavromoustakis) und Paratype (Zakaki, VII.1955) in Coll. m.”.

Holotype, ♀: Cypern 11.IX.1951 Yermasoyia Hills leg. Mavromoustakis Coll. Linsenmaier // ♀ Type *Hedychridium* Ab. *semiluteum* Lins. Linsenmaier det. 59 // 71 // NML_ENT GBIF_Chr0011569 (ex type-collection).

Paratype, 1♀: Zakaki 29.7.55 [A. Mavromoustakis] // ♀ Paratype *Hedychridium semiluteum* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chr0011567 (ex synoptic collection).

Hedychridium sevillanum Linsenmaier, 1968

(Fig. 65A–65E)

Hedychridium (*Hedychridium*) *sevillanum* Linsenmaier, 1968: 28 (descr., *ardens* group); 1987: 139 (distr.); 1997: 255 (diagn.).

Type locality. Spain: “Spanien, Sevilla, IV.65, ♀ Type, ♀ Paratypen in Coll. m.”.

Holotype, ♀ and paratypes 2♀ [glued on the same label]: Spanien 24.IV.65 Östlich Sevilla leg. Linsenmaier // ♀ Type vorn Paratypen *Hedychridium Ab. sevillanum* Lins. Linsenmaier det. 1966 (ex type-collection) // 216 // NML_ENT GBIF_Chro0009176.

Remarks. Linsenmaier labelled a male specimen in the type-collection as allotype, bearing the following labels: Spanien 26.6.91 Segovia Coca Linsenmaier // ♂ Allotype *Hedychridium Ab. sevillanum* Lins. Linsenmaier det. 1991. This specimen does not belong to the type series because it was collected after the original description.

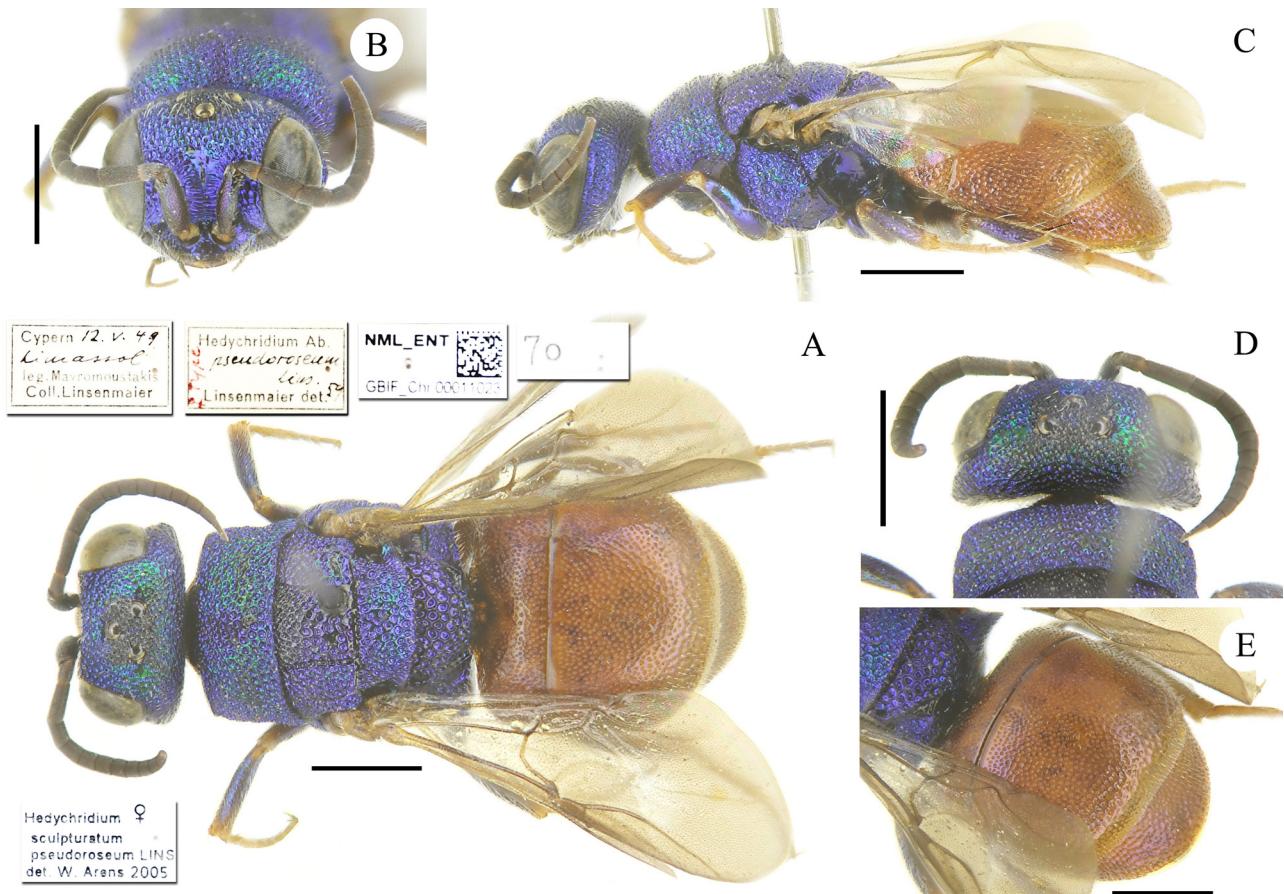

FIGURE 57. *Hedychridium pseudoroseum* Linsenmaier, 1959a, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Head, dorsal view. E) Metasoma, postero-lateral view. Scale bar 1 mm.

Hedychridium stoeckherti Linsenmaier, 1959a

(Fig. 66A–66D)

Hedychridium (Hedychridium) stoeckherti Linsenmaier, 1959a: 44 (key), 53 (descr.), 187 (cat.), 200 (figs 191, 192).
Hedychridium (Hedychridium) krajniki Balthasar, 1946: Linsenmaier 1968: 30 (synonymised).

Type locality. Austria, France, Switzerland: “Schweiz (Wallis), Süd-Deutschland (Stoeckhert), Nieder-Österreich, Süd-Frankreich. Lokal nicht selten [=not uncommon locally]. ♀ Type ♂ Allotype, Paratypen Coll. m. (Wallis, 550–900 m, VI.–VII.)”.

Holotype, ♀: Wallis B 550m 16.VI.50 Linsenmaier // Type ♀ *Hedychridium Ab. stoeckherti* Lins. Linsenmaier det. 59 // ♀ *Hedychridium Ab. krajniki* Balth. det. Linsenmaier 1962 // NML_ENT GBIF_Chro0009457.

Allotype, ♂: Wallis D 510m 17.VI.49 Linsenmaier // Allotype ♂ *Hedychridium Ab. stoeckherti* Lins. Linsenmaier det. 59 // ♀ *Hedychridium Ab. krajniki* Balth. det. Linsenmaier 1962 // NML_ENT GBIF_Chro0009458.

Paratypes, 1♂: Wallis B 550m 26.VI.52 Linsenmaier // Paratype ♂ *Hedychridium Ab. stoeckherti* Lins. Linsenmaier det. 59 // ♂ *Hedychridium Ab. krajniki* Balth. det. Linsenmaier 1962 // NML_ENT GBIF_Chro0009437 (ex synoptic collection); 2exx ♀: Wallis C 900m 5.VII.52 Linsenmaier // Paratype *Hedychridium Ab. stoeckherti*

Lins. Lisenmaier det. 59 // *Hedychridium krajniki* Balth. det. Hedychridium verhoeffi libanense Linsenmaier, 1987

(Fig. 79A–79E)

Hedychridium (*Hedychridium*) *verhoeffi libanense* Linsenmaier, 1987: 139 (descr.).

Type locality. Lebanon: “Libanon, Cedars, ♀ Type Coll. m.”.

Holotype, ♀: Nord Libanon Cedars 6000 ft 4.VII.1960 leg. Mavromoustakis coll. Linsenmaier // ♀ Type *Hedychridium* Ab. *verhoeffi libanense* Lins. Linsenmaier det. 1963 // 414 // NML_ENT GBIF_Chr0008664 (ex type-collection).

Hedychridium verhoeffi yermasoyiense Linsenmaier, 1959a

(Fig. 80A–80F)

Hedychridium (*Hedychridium*) *verhoeffi yermasoyiense* Linsenmaier, 1959a: 50 (descr.), 187 (cat.).

Type locality. Cyprus: “Cypern, ♀ type Coll. m. (Yermasoya-River, 5.VIII.1957, leg. Mavromoustakis)”.

Holotype, ♀: Yermasoya River Cyprus 1.9.1956 leg. Mavromoustakis // ♀ Type *Hedychridium* Ab. *verhoeffi* ssp. *yermasoyiense* Lins. Linsenmaier det. 1959 // NML_ENT GBIF_Chr0008663 (ex type-collection).

Remarks. The specimen labelled as holotype by Linsenmaier was collected by Mavromoustakis on a different day: the 1st of September 1956 instead of the 5th of August 1957, as written in the original description. Since Linsenmaier was not precise in listing the data related to collecting events, we suggest considering this specimen as the true holotype and this discrepancy as *lapsus calami*.

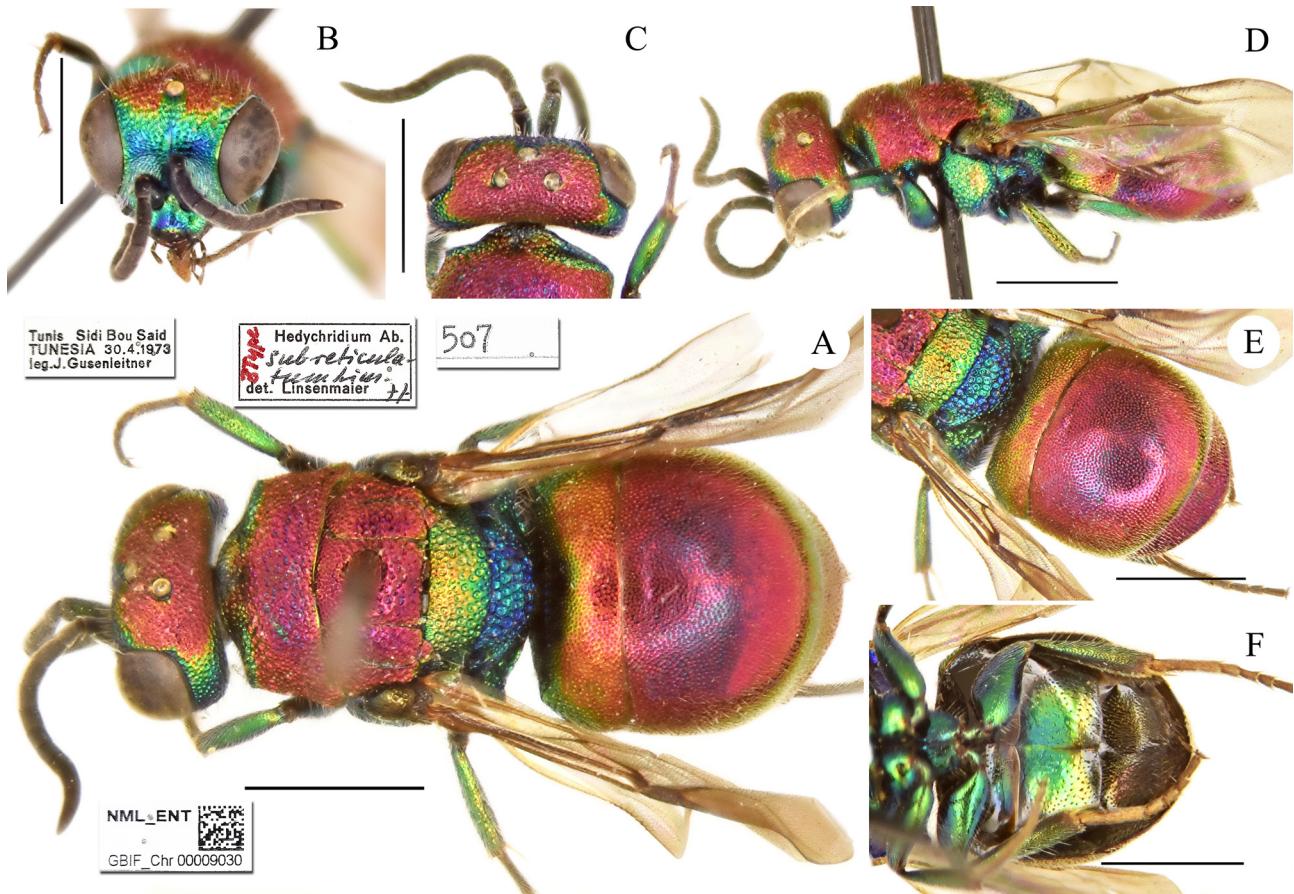

FIGURE 69. *Hedychridium subreticulatum* Linsenmaier, 1999, holotype, male. A) Habitus, dorsal view. B) Head, frontal view. C) Head, dorsal view. D) Habitus, lateral view. E) Metasoma, postero-lateral view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium viridicupreum Linsenmaier, 1993

(Fig. 81A–81F)

Hedychridium (*Hedychridium*) *viridicupreum* Linsenmaier, 1993: 722 (descr.), 731 (fig. 1).

Type locality. Canary Is.: “Gran Canaria: Maspalomas 4.1976 leg. W. Perraudin ♀ Type Coll. Linsenmaier, 2 ♀ Paratypen Coll. Perraudin; San Agustín 8.1986 leg. F. La Roche 1♀ Paratype Coll. La Roche Sta. Cruz de Tenerife”.

Holotype, ♀: Gran Canaria Maspalomas 6–18.IV.1976 leg. Wolf W. P. Perraudin // Gr. Canaria, Dünen Maspalomas, 6.–18.IV.1976 H. Wolf // ♀ Type *Hedychridium* Ab. *viridicupreum* det Linsenmaier 89 // 443 // NML_ENT GBIF_Ch0008790 (ex type-collection).

Paratype, 1♀: Gr. Canaria Dünen Maspalomas 6.–18.IV.1976 H. Wolf // *Hedychridium* Ab. *viridicupreum* det Linsenmaier 89// NML_ENT GBIF_Ch0008789 (ex synoptic collection).

Remarks. Linsenmaier labelled other 2 specimens as “Allotype” and “Paratype” bearing the following label: Maspalomas Gr. Canaria Dünen 14.–18.4.73 H. Wolf, but they cannot be considered as types because they were not listed in the original type series.

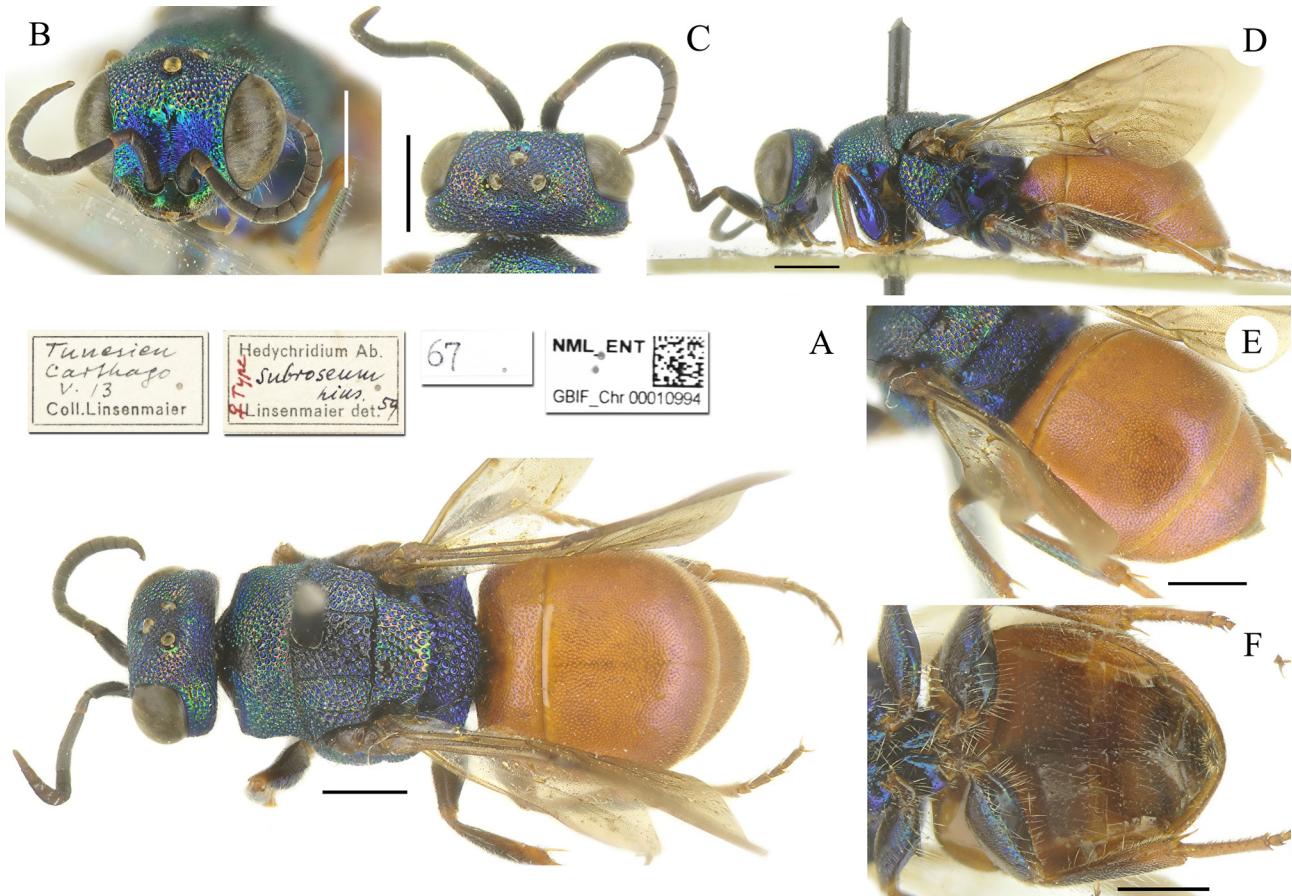

FIGURE 70. *Hedychridium subroseum* Linsenmaier, 1959a, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Head, dorsal view. D) Habitus, lateral view. E) Metasoma, postero-lateral view. F) Metasoma, ventral view. Scale bar 1 mm.

Hedychridium viridisulcatum Linsenmaier, 1968

(Fig. 82A–82E)

Hedychridium (*Hedychridium*) *viridisulcatum* Linsenmaier, 1968: 25 (descr., *ardens* group).
Hedychridium adventicum Zimmermann, 1962: Arens 2014: 587 (synonymised).

Type locality. Greece, Turkey: “Griechenland, ♀ Type, ♂ Allotype, ♀ Paratype, von Pyrgos (Peloponnes), in Coll. m.; Klein-Asien, Konya und Mut, leg. Schmidt, ♂ Paratypen in Coll. Schmidt und m.”.

Holotype, ♀ and paratype, 1♀ [glued on the same label]: Graecia, Pelop. Pyrgos 17.VI.1961 leg. Linsenmaier // ♀ Type ♀ Paratype *Hedychridium* Ab. *viridisulcatum* Lins. Linsenmaier det. 1963 // NML_ENT GBIF_Chr0008626 (ex type-collection).

Allotype, ♂: Graecia, Pelop. Pyrgos 17.VI.1961 leg. Linsenmaier // ♂ Allotype *Hedychridium* Ab. *viridisulcatum* Lins. Linsenmaier det. 1963 // 212 // NML_ENT GBIF_Chr0008627(ex type-collection).

Nomina nuda

Schmidt (1977) published a list of the Chrysidae collected in his journeys in Turkey and identified by Linsenmaier. He listed 25 species not yet described by the Swiss author which are *nomina nuda*. Seven of these *nomina nuda* are *Hedychridium*. Nevertheless, two of them were later described by Linsenmaier (1997) and Arens (2004b): *Hedychridium francescanum heminigrum* Linsenmaier, 1997 and *Hedychridium viridescutellare* Arens, 2004b. The remaining five *nomina nuda* are:

- Hedychridium bilimbatum* Linsenmaier in Schmidt, 1977: 103.
- Hedychridium duplofacialis* Linsenmaier in Schmidt, 1977: 103.
- Hedychridium duplopunctatum* Linsenmaier in Schmidt, 1977: 105.
- Hedychridium heraldifacialis* Linsenmaier in Schmidt, 1977: 103.
- Hedychridium pseudobuyssoni* Linsenmaier in Schmidt, 1977: 103.

Interestingly, Kimsey & Bohart (1991: 184) listed another name never described, *Hedychridium lisenmaieri*, which must be considered as *nomen nudum* too.

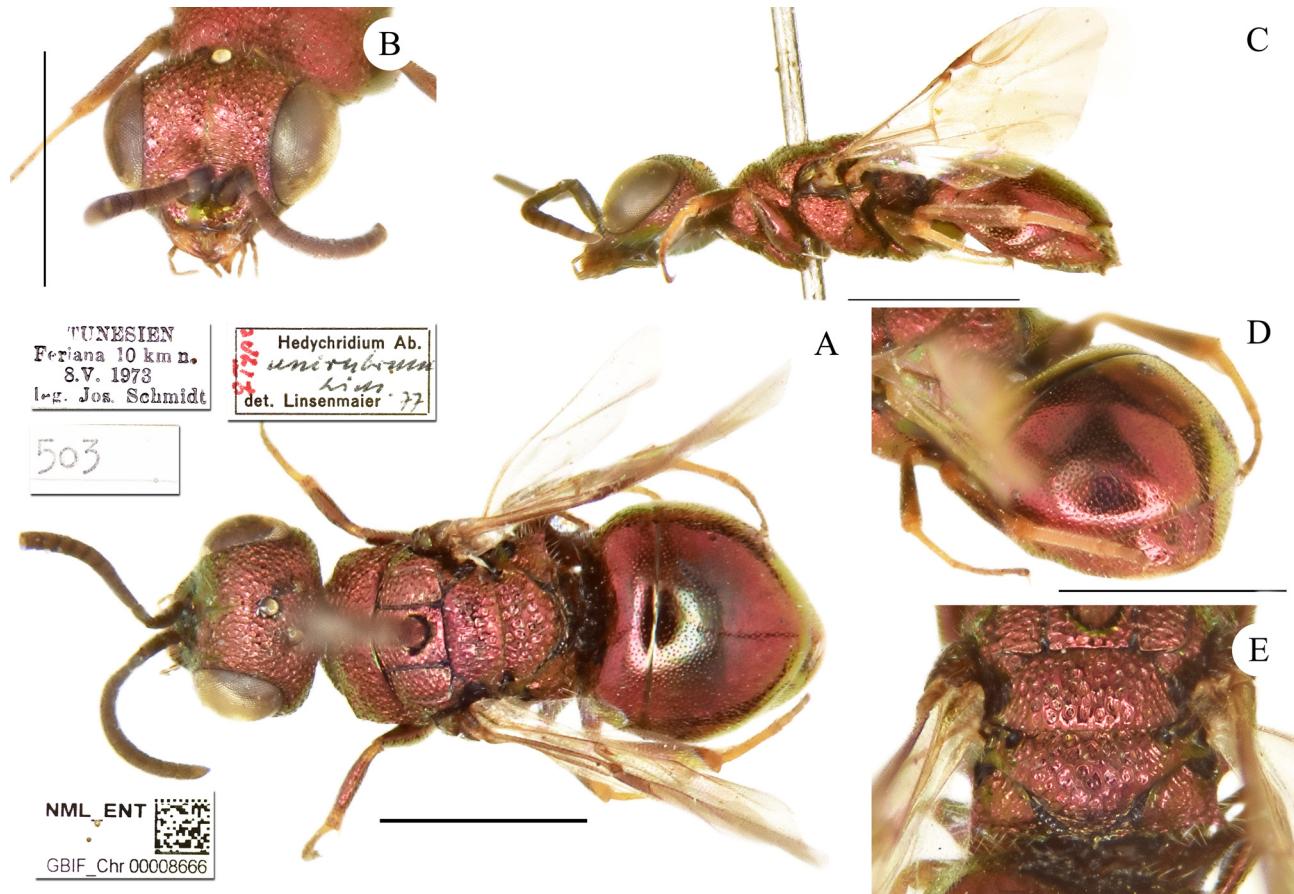

FIGURE 74. *Hedychridium unirubrum* Lisenmaier, 1999, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, postero-lateral view. E) Scutellum, metanotum, propodeum, posterior view. Scale bar 1 mm.

Specimens without type status

Many specimens were labelled as types by Lisenmaier, but for different reasons they cannot be considered as such, according to ICBN rules. Here some cases: Lisenmaier (1959a) published *Hedychridium lampadum* as *nomen novum pro Hedychridium lampas* (Christ, 1791), which is actually an unnecessary replacement name. Some years later, Lisenmaier (1997) wrote that he had mistakenly published the species as a new name ("nom. n.") instead of "new species". He then labelled two specimens in his collection as holotype and allotype of *Hedychridium lampadum*. These specimens [considered as valid types by Arens (2010)] cannot be considered as types for two reasons: 1) the name *lampadum* is a replacement name and the only type bearing name is that described by Christ (currently considered lost); 2) a holotype designation assigned 40 years after the description is not valid. After realizing the mistake, Lisenmaier should have described *H. lampadum* as a new species, with a new name.

In the case of *Hedychridium viridiscutellare* Arens, 2004b we found two holotypes and two allotypes. In fact, Lisenmaier labelled the holotype and the allotype, but never described this species. Arens (2004b), who described this species some years later, was unable to find the holotype and allotype selected by Lisenmaier and designated other two specimens as the holotype and the allotype. The holotype and the allotype selected by Lisenmaier have been later found in his collection but they have no type status because they were not included in the original description by Arens (2004b), even if they still bear the type labels handwritten by Lisenmaier himself.

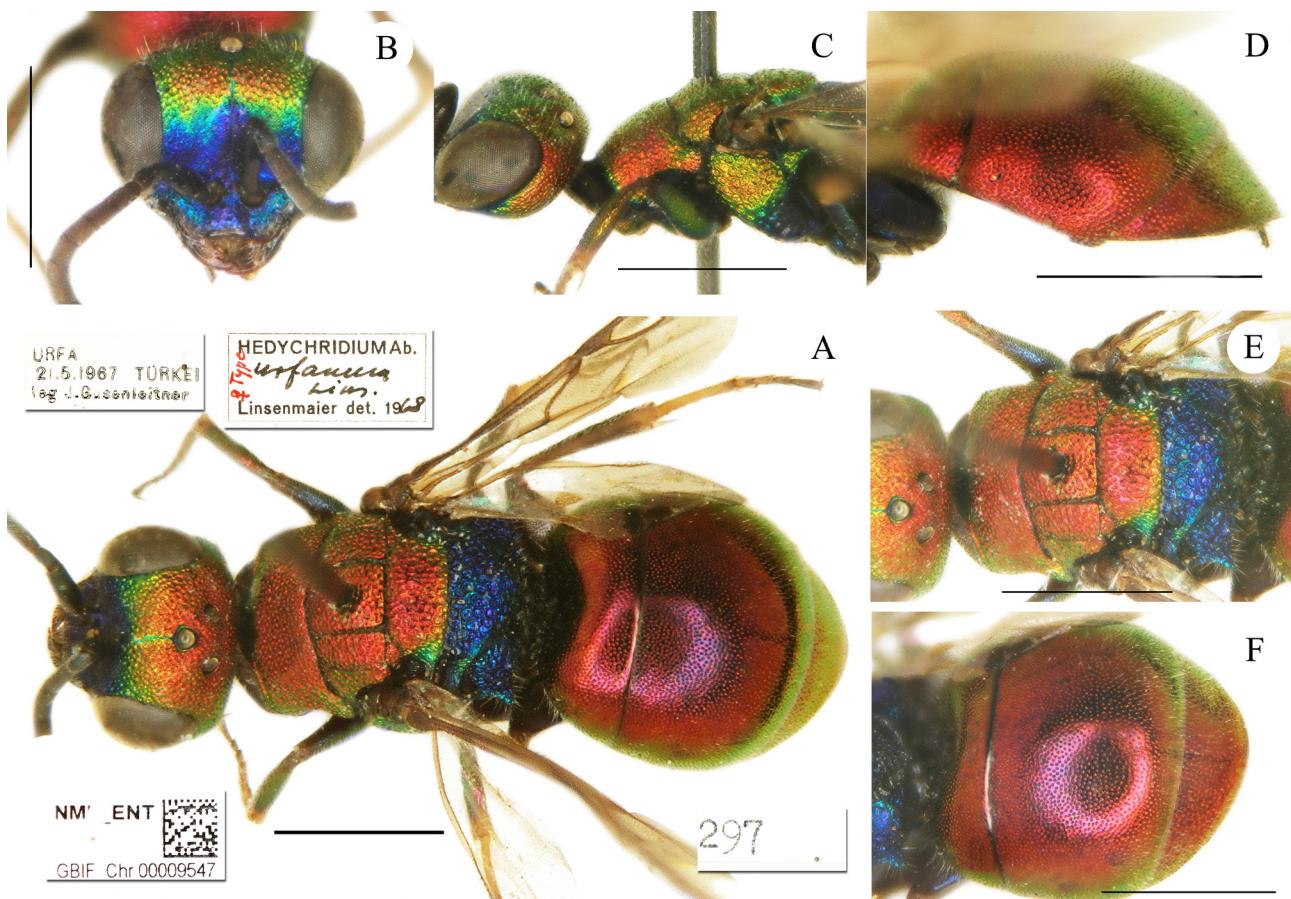

FIGURE 75. *Hedychridium urfanum* Lisenmaier, 1968, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Mesosoma, lateral view. D) Metasoma, lateral view. E) Mesosoma, dorsal view. F) Metasoma, dorsal view. Scale bar 1 mm.

Unnecessary replacement names given by Lisenmaier

Lisenmaier provided some unnecessary replacement names. Here the cases for the genus *Hedychridium*:

- *Hedychridium lampadum* Lisenmaier, 1959a, unnecessary replacement name for *H. lampas* (Christ, 1791) (see above).
- *Hedychridium roseum limassolense* Lisenmaier, 1959a, unnecessary replacement name for *H. roseum cypriacum* Balthasar, 1953. [*H. roseum cypriacum* Balthasar is a valid name].
- *Hedychridium maculiventre* Lisenmaier, 1959a, unnecessary replacement name for *H. sculpturatum palestinense* Balthasar, 1953. [*H. sculpturatum palestinense* Balthasar is a valid name].
- *Hedychridium maculiventre sculpturatissimus* Lisenmaier, 1959b, unnecessary replacement name for *H. sculpturatum palestinense* Balthasar, 1953.
- The case of *Hedychridium maculiventre* Lisenmaier, 1959b. Lisenmaier (1959a: 63) replaced the name *H. palestinense* Balthasar, 1953 with *H. maculiventre* Lisenmaier, 1959a and listed two localities: "Palästina and Jugoslawien". On the same page he described the subspecies *H. maculiventre sculpturatissimum* Lisenmaier, 1959a based on a type series of specimens from Cyprus. Later, Lisenmaier (1959b: 235) wrote that he had confused the two taxa and described *H. maculiventre* as a new species, with a holotype from Jugoslavia (currently Croatia: Dalmatia, Omis, VIII.1952) and proposed *H. sculpturatissimum* as the replacement name for *H. palestinense* Balthasar, 1953. These taxonomic changes were rather confusing and many authors, from Kimsey & Bohart (1991) to Arens (2010), were disorientated by these changes. In synthesis:
 - *Hedychridium maculiventre* Lisenmaier, 1959a is an unnecessary replacement name for *H. palestinense* Balthasar, which is the valid name for the species found in Palestine.
 - *Hedychridium maculiventre sculpturatissimum* Lisenmaier, 1959a was correctly described and it is the valid name for the Cypriot species.

- *Hedychridium maculiventre* Lisenmaier, 1959b (described as a new species, with type series) has to be considered a junior homonym of *H. maculiventre* Lisenmaier, 1959a.
- *Hedychridium maculiventre sculpturatissimum* Lisenmaier, 1959b is both a junior homonym of *H. maculiventre sculpturatissimum* Lisenmaier, 1959a and an unnecessary replacement name for *H. palestinense* Balthasar, 1953.
- According to Lisenmaier (1959b) there are two valid taxa: *H. maculiventre maculiventre* Lisenmaier, 1959b and *H. maculiventre sculpturatissimum* Lisenmaier, 1959b. After the publication of the world catalogue by Kimsey & Bohart (1991), Lisenmaier (1997: 258) recognised that the name *H. palestinense* Balthasar, 1953 is valid. However, he did not realize that if so, the name *H. maculiventre sculpturatissimum* Lisenmaier, 1959b was unnecessary, and in the same page he considered three valid names (*H. palestinense* Balthasar, 1953, *H. maculiventre maculiventre* Lisenmaier, 1959b; *H. maculiventre sculpturatissimum* Lisenmaier, 1959b). If the latter interpretation with three taxa is correct, then the third taxon is incorrectly named.
- Arens (2010: 407) used Lisenmaier's latest interpretation (1997).
- After a written exchange, Arens and Rosa agreed that the third species needed a new name. Arens (2011: 316) renamed the species from Jugoslavia (currently Croatia) as *H. maculisternum* Arens 2011.
- Arens (2011) considered all these taxa as subspecies of *Hedychridium scutellare* (Tournier, 1878). However, despite the specific or subspecific rank, the final synonymic list of these taxa is:
 - 1) *H. palestinense* Balthasar, 1953 (taxon from Palestine) (= *maculiventre* Lisenmaier, 1959a, unnec. repl. name for *H. palestinense* Balthasar, 1953; *sculpturatissimum* Lisenmaier, 1959b, unnec. repl. name for *H. palestinense* Balthasar, 1953 *nec H. sculpturatissimum* Lisenmaier, 1959a).
 - 2) *H. sculpturatissimum* Lisenmaier, 1959a (taxon from Cyprus),
 - 3) *H. maculisternum* Arens, 2011 (taxon from Croatia) (= *maculiventre* Lisenmaier, 1959b, *nec maculiventre* Lisenmaier, 1959a).

Lapsus calami: dates, localities, and identification of sexes

In some cases, we found lapsus calami for both collection dates and localities. For example, in the case of *Hedychridium verhoeffi yermasoyense*, Linsenmaier wrote a different date from that which is pinned to the type specimen (August 5, 1957, rather than September 1, 1957). In other cases, the month of collection (i.e., *Hedychridium inusitatum*) or the year of collection are wrong.

The genus *Hedychridium* in Linsenmaier's systematics

Linsenmaier subdivided the Palaearctic species of the genus *Hedychridium* in four subgenera and fifteen species groups. In the first revision of the West Palaearctic species, Linsenmaier (1959a) proposed three subgenera: *Hedychridium* s.str., *Acrotoma* Mocsáry, 1902b and *Hexachrydium* Bischoff, 1913 (correct spelling: *Hexachridium*). The name *Acrotoma* Mocsáry, 1902b is objectively unavailable because it is a junior homonym of *Acrotoma* Boettger, 1881 (Mollusca, Clausiliidae) (Kimsey & Bohart 1991). However, Linsenmaier (1999) continued to use it as valid subgeneric name. Linsenmaier (1959a) considered *Buyssonia* Mocsáry, 1902b and *Wollmannia* Mocsáry, 1909 as synonyms of *Acrotoma* and *Tetrachrydium* Zimmermann, 1952 synonym of *Hexachridium*. Only later, Linsenmaier (1968) correctly recognised *Wollmannia* as a subgenus of *Hedychrum* Latreille, 1802, after receiving a specimen in exchange from Nikol'skaya.

Linsenmaier (1959a) firstly established two species groups: *H. roseum* group and *H. sculpturatum* group. Afterward, Linsenmaier (1968) provided the first classification of the species groups and established the following

ones: *H. luteipenne* group, *H. planifrons* group, *H. postthoracicum* group, *H. plagiatum* group, *H. ardens* group, *H. monochroum* group (= *Cyrteuchridium* Semenov-Tian-Shanskij, 1954), *H. incrassatum* group (= *Zarudnium* Semenov-Tian-Shanskij, 1954, *Zarudnidium* Semenov-Tian-Shanskij, 1954, *Cyrteuchrum* Semenov-Tian-Shanskij, 1954), *H. margaritaceum* (= *Irenula* Semenov-Tian-Shanskij & Nikol'skaya, 1954), *H. flavipes* group (= *Colpopyga* Semenov-Tian-Shanskij, 1954), *H. roseum* group (= *Euchrum* Semenov-Tian-Shanskij, 1954), *H. sculpturatum* group (= *Euchrum* Semenov-Tian-Shanskij, 1954). In the same publication, Linsenmaier (1968) described the subgenus *Prochridium*. Some years later, Linsenmaier (1994) established the *H. semenovi* group, and then (1997) the *H. analis* and *H. heliophilum* groups. Finally, some changes were proposed by Linsenmaier (1999), namely the description of the *H. luteum* group and *H. modestum* group, and the union of some groups: *H. ardens-monochroum* group and *H. roseum-sculpturatum* group. If the formation of the first group was unnecessary and not supported by any morphological or molecular analyses, the establishment of the *H. roseum-sculpturatum* group was a new step forward a better classification, since members of the *H. roseum* group subsequently proved to be females (with non-metallic abdomen) and males (with metallic abdomen included in the *H. sculpturatum* group) of the same species (Rosa 2003; Arens 2004a).

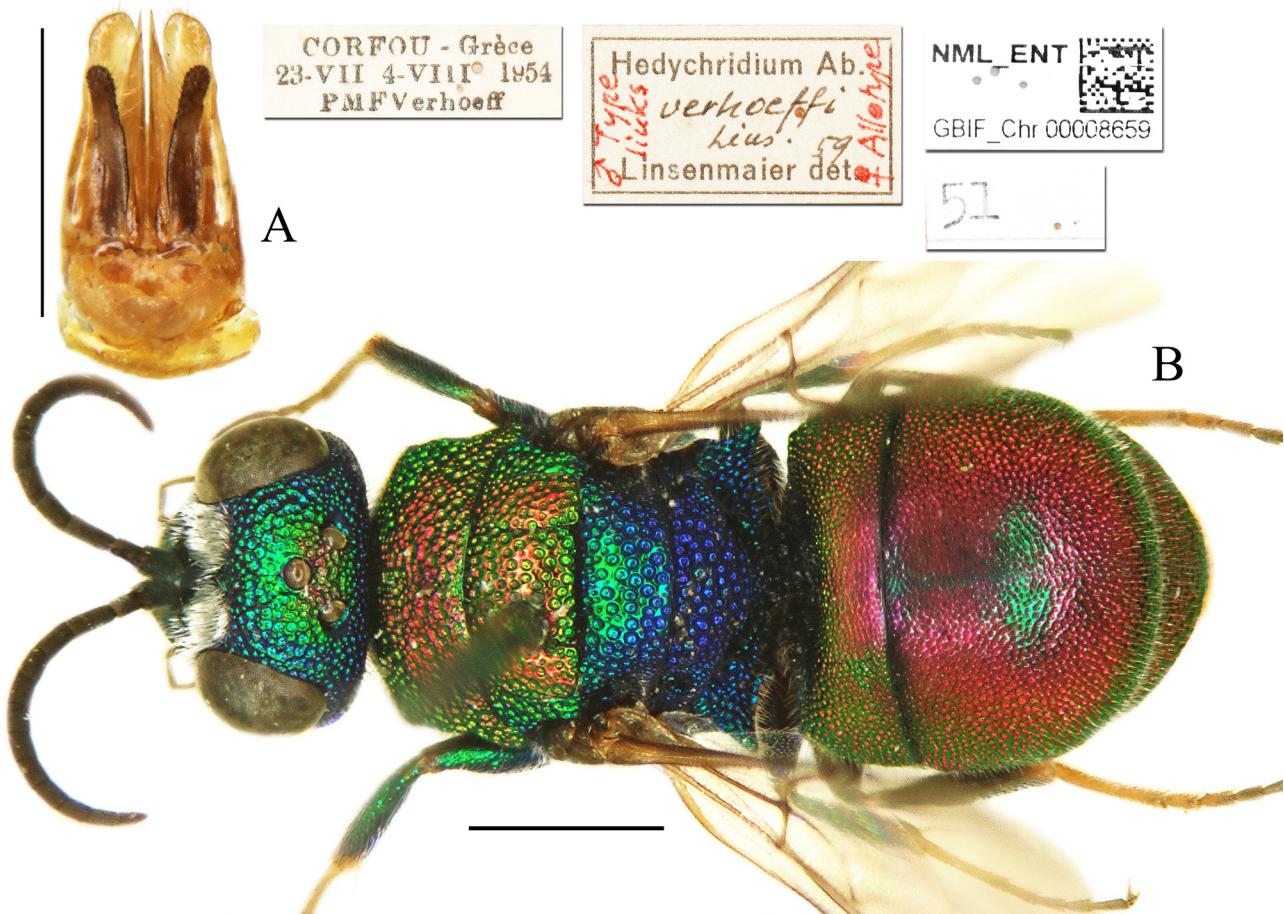

FIGURE 78. *Hedychridium verhoeffi* Linsenmaier, 1959a, holotype, male. A) Genital capsule. B) Habitus, dorsal view. Scale bar 1 mm.

Linsenmaier's classification (1959a, 1959b, 1968, 1969, 1987, 1993, 1994, 1997, 1999) for the Palaearctic species is here synthetised.

Genus *Hedychridium* Abeille de Perrin, 1878

Subgenus *Prochridium* Linsenmaier, 1968

Subgenus *Hedychridium* s. str.

modestum group

planifrons group

plagiatum group

luteum group
ardens-monochroum group
coriaceum group
anale group
heliophilum group
incrassatum group
flavipes group
elongatum group
margaritaceum group
roseum-sculpturatum group
Subgenus *Acrotoma* Mocsáry, 1902b
Subgenus *Hexachridium* Bischoff, 1913

Remarks. The *H. planifrons* group was renamed *attenuatum* group by Kimsey & Bohart (1991) and later *H. wroughtoni* group by Strumia (1999), because *Hedychridium wroughtoni* du Buysson, 1896 is the first species described in the species group.

Systematic groups according to Linsenmaier's classification

The following list includes West Palaearctic *Hedychridium* species according to Linsenmaier's classification. The list is a summary of both bibliographic data and unpublished records as found in his collection.

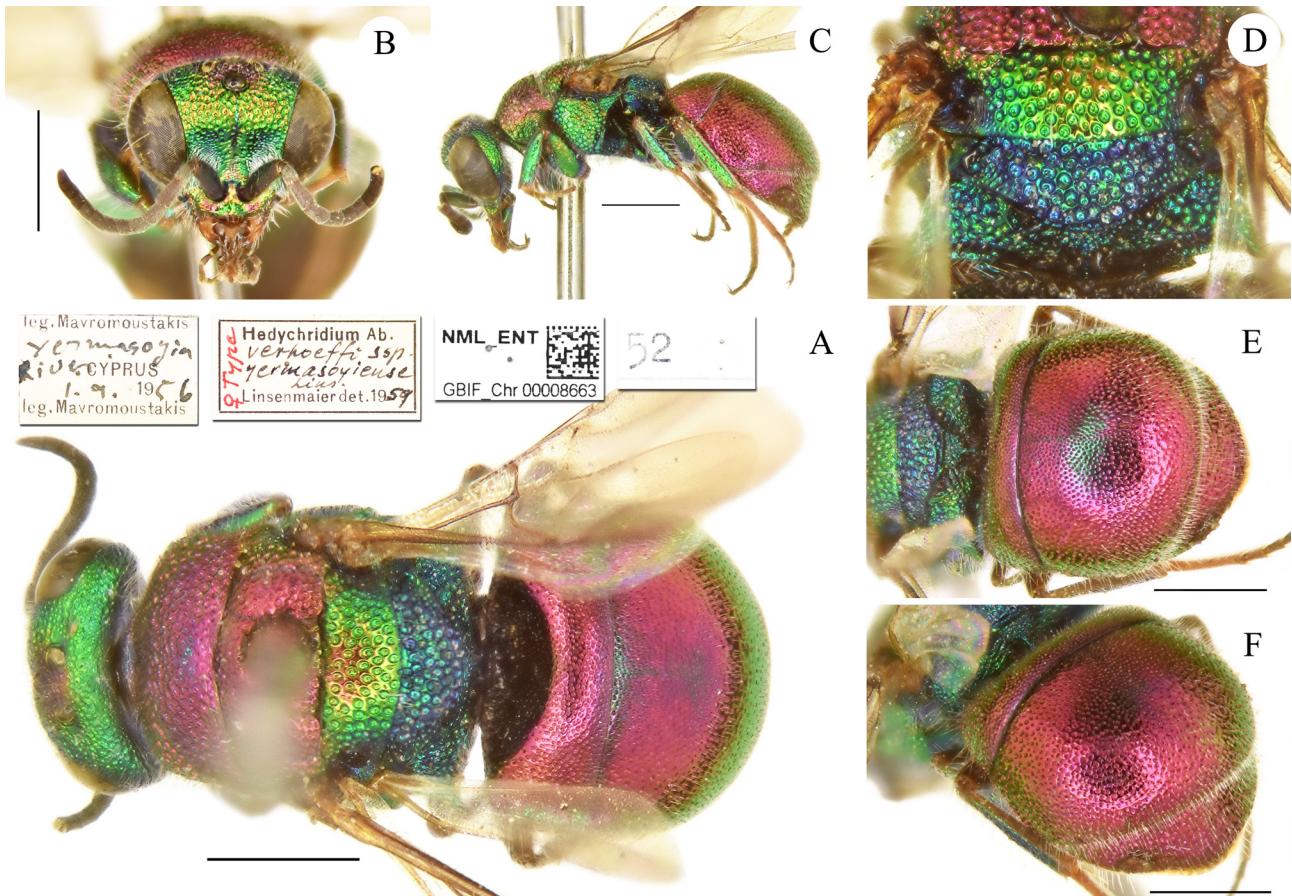

FIGURE 80. *Hedychridium verhoeffi yermasoyense* Lisenmaier, 1959a, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Scutellum, metanotum, propodeum, posterior view. E) Metasoma, dorsal view. F) Metasoma, postero-lateral view. Scale bar 1 mm.

How to read the catalogue

| | |
|----------------|--|
| Taxon name* | taxon present in collection and discussed in literature by Lisenmaier |
| (= Taxon name) | taxon considered a synonym by Lisenmaier |
| Taxon name** | taxon present in collection, but never cited by Lisenmaier |
| Taxon name*** | taxon cited or described by Lisenmaier, but not present in collection. |
| [Taxon name] | In square brackets: correct spelling, current status, or other remarks |

Genus ***Hedychridium*** Abeille de Perrin, 1878

Subgenus ***Prochridium*** Lisenmaier, 1968

*Hedychridium (Prochridium) hirtipes** du Buysson in Mocsáry, 1902a; *H. punctum** Lisenmaier, 1994; *H. sericatum** Lisenmaier, 1994; *H. homalosomus**** Lisenmaier, 1994.

Subgenus ***Hedychridium*** s. str.

modestum group

[established by Lisenmaier (1999) previously named *H. luteipenne* group (1968) and *H. semenovi* group (1994)]

*Hedychridium (Hedychridium) luteipenne** Lisenmaier, 1968; *H. modestum** du Buysson, 1900; *H. semenovi** Kimsey in Kimsey & Bohart, 1991 [repl. name for *semirufum* Semenov-Tian-Shanskij, 1954]; *H. rectianale** Lisenmaier, 1999; *H. caireanum**** Lisenmaier, 1968; *H. flos** (Semenov-Tian-Shanskij, 1954).

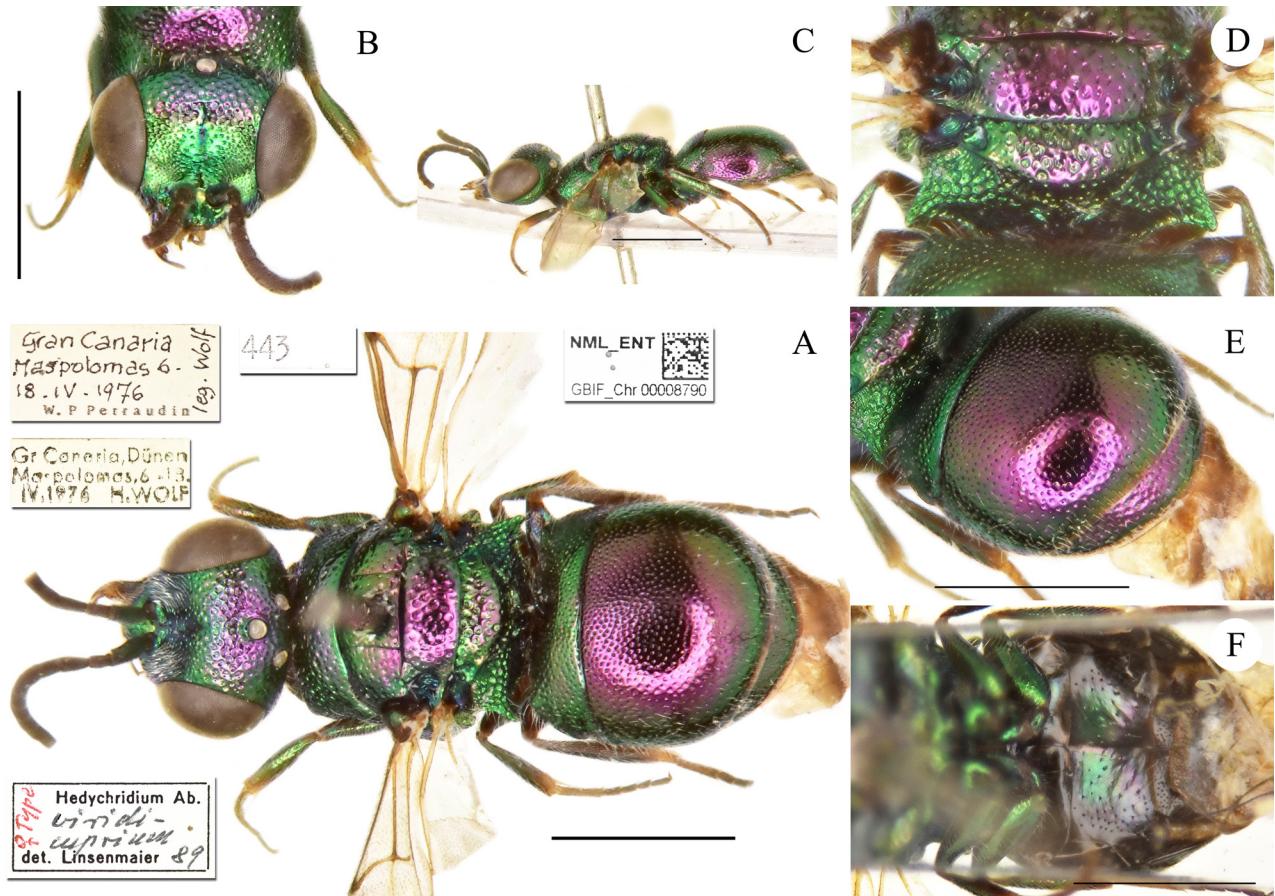

FIGURE 81. *Hedychridium viridicupreum* Linsenmaier, 1993, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Scutellum, metanotum, propodeum, posterior view. E) Metasoma, postero-lateral view. F) Metasoma, ventral view. Scale bar 1 mm.

planifrons group

Hedychridium (*Hedychridium*) *planifrons** du Buysson, 1900; *H. iocosum** Linsenmaier, 1959a [in Linsenmaier (1999) erroneously moved in the *roseum-sculpturatum* group]; *H. aegyptiacum** du Buysson, 1898; *H. aegyptiacum laetificum**** Linsenmaier, 1959a; *H. mysticum**** Semenov-Tian-Shanskij, 1912.

plagiatum group

Hedychridium (*Hedychridium*) *plagiatum** (Mocsáry, 1883) (= *albanicum* Trautmann, 1922); *H. andalusicum**** Trautmann, 1920; *H. wahisi*** Niehuis, 1998.

luteum group

[established by Linsenmaier (1999) based on a species previously included in the *H. roseum* group (Linsenmaier 1999)]

Hedychridium (*Hedychridium*) *luteum** Zimmermann, 1940; *H. planatum**** Bishoff, 1910 [misidentification, *H. planatum* is a member of the genus *Holopyga* Dahlbom, 1845 (Rosa & Pavesi 2020)].

ardens group

Hedychridium (*Hedychridium*) *purpurascens** (Dahlbom, 1854) (= *misdroyensis* Trautmann, 1927; = *maculatum* Trautmann, 1927; = *meyeri* Trautmann, 1916); *H. integrum** (Dahlbom, 1831) (= *aurora* Trautmann &

Trautmann, 1919; = *cupreum* (Dahlbom, 1845)) [currently *H. cupreum* (Dahlbom, 1845)]; *H. integrum asianum** Linsenmaier, 1997 [currently *H. asianum*]; *H. cupratum** (Dahlbom, 1854); *H. hauseri** Linsenmaier, 1999; *H. aereolum** du Buysson, 1892; *H. ardens** (Coquebert, 1801) (= *aeneus* Trautmann & Trautmann, 1919; = *bavaricum* Trautmann & Trautmann, 1919; = *carinulatum* (Schenck, 1861); = *cinctum* du Buysson, 1892; = *homeopathicum* Abeille de Perrin, 1878; = ? *jakovlevi* Semenow, 1892; = *melanogaster* García Mercet, 1904; = *minutum* (Lepeletier, 1806); = *viridimarginale* du Buysson, 1892; = *viridis* Trautmann & Trautmann, 1919); *H. jucundum** (Mocsáry, 1889); *H. bytinskii** Linsenmaier, 1959a (= *projucundum* Linsenmaier, 1959a); *H. viridisulcatum** Linsenmaier, 1968; *H. tricavatum** Linsenmaier, 1993; *H. canariense** García Mercet, 1915; *H. incensa**** [incensum] (Mocsáry, 1914); *H. discordum** Linsenmaier, 1959a; *H. israelicum** Linsenmaier, 1968; *H. hyalitarse** Perraудин, 1978; *H. interrogatum** Linsenmaier, 1959a; *H. verhoefti** Linsenmaier, 1959a; *H. verhoefti yermasoyiense** Linsenmaier, 1959a; *H. verhoefti libanense** Linsenmaier, 1987; *H. pulchellum** (Mocsáry, 1893); *H. marteni** Linsenmaier, 1951; *H. ruborum** Linsenmaier, 1959a; *H. rubrum** Linsenmaier, 1968; *H. buyssoni** Abeille de Perrin in du Buysson, 1887 (= *melanogaster* García Mercet, 1904); *H. etnaense** Linsenmaier, 1968; *H. obscurifacies** Linsenmaier, 1999; *H. parcobarbatum** Linsenmaier, 1999; *H. viridicupreum** Linsenmaier, 1993; *H. reticulatum** Abeille de Perrin, 1878 (= *hispanicum* du Buysson, 1892); *H. cupritibiale** Linsenmaier, 1987; *H. proreticulatum** Linsenmaier, 1999; *H. duplicatum** Linsenmaier, 1999; *H. subreticulatum* Linsenmaier, 1999; *H. tussaci**** Linsenmaier, 1999; *H. scintilla** Semenov-Tian-Shanskij, 1954; *H. algirum** (Mocsáry, 1889) (= *H. sparsapunctulatum* Linsenmaier, 1959); *H. infans** Abeille de Perrin, 1878; *H. infans santschii** Trautmann, 1927; *H. infantum** Linsenmaier, 1997; *H. kenitranum** Linsenmaier, 1999; *H. jordanense* Linsenmaier, 1968; *H. unirubrum** Linsenmaier, 1999; *H. canarianum** Linsenmaier, 1987 (repl. name for *canariense* Linsenmaier, 1968 nec García Mercet 1915); *H. perscitum** Linsenmaier, 1959a; *H. sevillanum** Linsenmaier, 1968; *H. extraneum** Linsenmaier, 1993; *H. aequabilitum**** Linsenmaier, 1994.

coriaceum group

(established by Lisenmaier (1999) based on species previously included in the *ardens* group)

*Hedychridium (Hedychridium) elegantulum** du Buysson, 1887 (= *hybridum* Lisenmaier, 1959a); *H. elegantulum peloponnense** Lisenmaier, 1968; *H. creteense** Lisenmaier, 1959b; *H. coriaceum** (Dahlbom, 1854); *H. coriaceum jendoubense** Lisenmaier, 1987; *H. subcoriaceum** Lisenmaier, 1999; *H. krajniki** Balthasar, 1946 (= *stoeckerti* Lisenmaier, 1959a); *H. krajniki valesianum** Lisenmaier, 1959a [currently *H. valesianum*]; *H. krajniki turceyense** Lisenmaier, 1968 [currently *H. turceyense*]; *H. brevifronte** Lisenmaier, 1968; *H. urfanum** Lisenmaier, 1968; *H. mosadunense* Lefever, 1986; *H. turanicum** Semenov-Tian-Shanski, 1954; *H. wolfi** Lisenmaier, 1959b; *H. perraudini** Lisenmaier 1968 [currently *H. wolfi*]; *H. bispeculiferum**** Lisenmaier, 1997; *H. caspicum**** (Mocsáry, 1890); *H. femoratum** (Dahlbom, 1854); *H. gratiosum** Abeille de Perrin, 1878 (= *elegans* (Mocsáry, 1911); = *miricolor* Morice, 1909); *H. gratiosum uniformis** Lisenmaier, 1959a; *H. flavonigrum**** Lisenmaier, 1999; *H. chlorophyllum** Trautmann, 1926; *H. parkanense** Balthasar, 1946; *H. parkanense dismorphum** Lisenmaier, 1959a; *H. franciscanum** Lisenmaier, 1987; *H. franciscanum heminigrum** Lisenmaier, 1997.

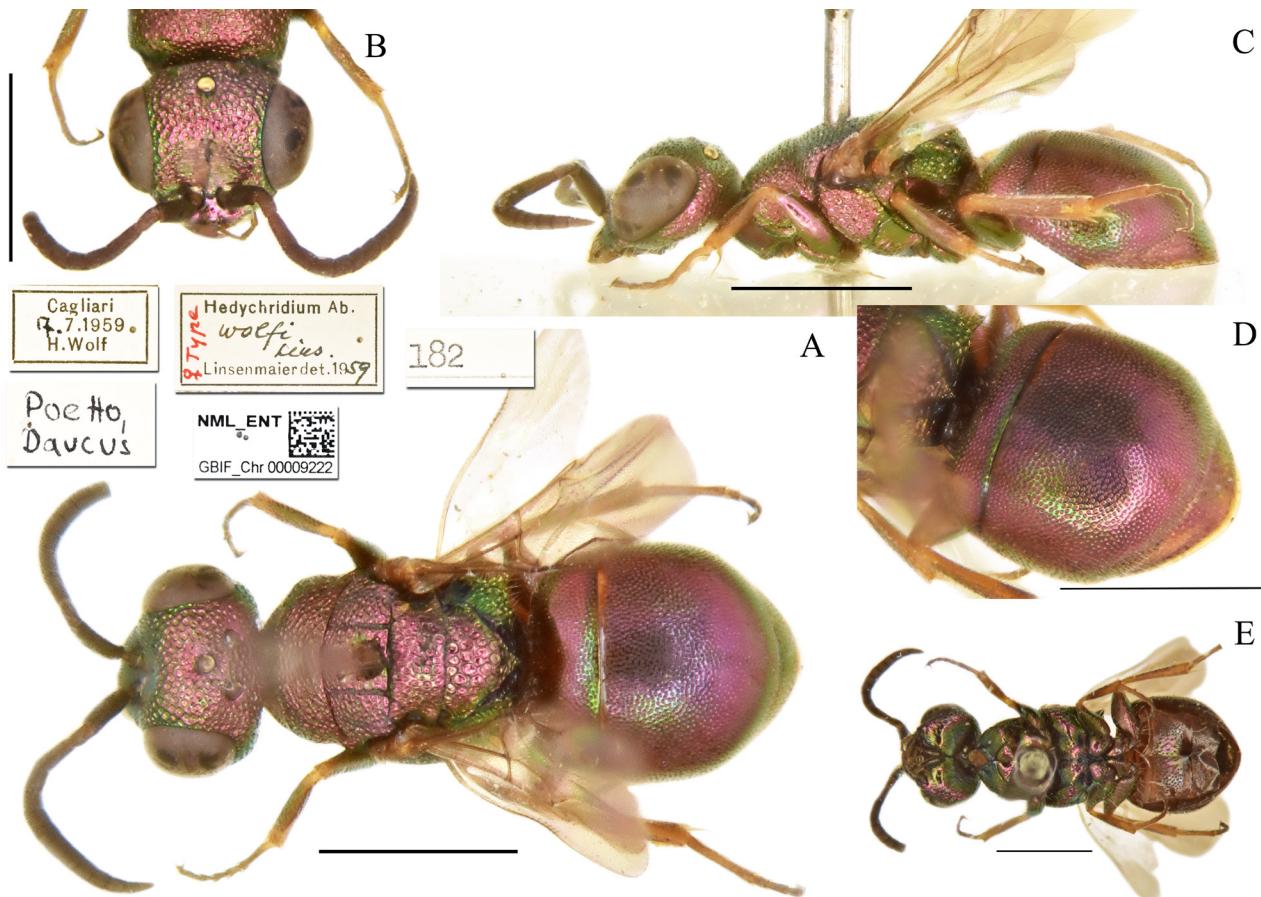

FIGURE 83. *Hedychridium wolfi* Lisenmaier, 1959b, holotype, female. A) Habitus, dorsal view. B) Head, frontal view. C) Habitus, lateral view. D) Metasoma, postero-lateral view. E) Habitus, ventral view. Scale bar 1 mm.

monochroum group

[Lisenmaier (1999) proposed the *ardens-monochroum* group]

*Hedychridium (Hedychridium) monochroum** du Buysson, 1888; *H. adventicum** Zimmerman, 1962; *H. jazygicum**** Móczár, 1964 [currently *H. adventicum* Zimmerman, 1962, *ardens* group]; *H. minutissimum**** García Mercet, 1915; *H. zelleri* (Dahlbom, 1845) (= *preciosa* Trautmann, 1926) [currently *ardens* group]; *H. atratum** Lisenmaier, 1968 [currently *Chamaeholopyga*]; *H. carmelitanum* García Mercet, 1915; *H. rhodojantinum** Enslin, 1939; *H. rhodojantinum mutense** Lisenmaier, 1968; *H. tenerifense** Lisenmaier, 1968; *H. pusio****

(Semenov-Tian-Shanskij & Nikol'skaya, 1954) [currently *H. monochroum*]; *H. cyanellum**** (Semenov-Tian-Shanskij & Nikol'skaya, 1954); *H. obscuratum**** (Semenov-Tian-Shanskij & Nikol'skaya, 1954).

anale group

[established by Lisenmaier (1997) with species previously included in the *H. ardens*, *H. incrassatum* and *H. postthoracicum* groups (Lisenmaier 1968)]

Hedychridium (*Hedychridium*) *ibericum** Lisenmaier, 1959a; *H. analis** (Dahlbom, 1854); *H. dubium** García Mercet, 1904; *H. postthoracicum** Lisenmaier, 1959a; *H. disiunctum** Lisenmaier, 1959a; *H. garianum** Lisenmaier, 1968; *H. holopygum**** Lisenmaier, 1994; *H. stenodactylum**** Lisenmaier, 1994.

heliophilum group

[established by Lisenmaier (1997) with species previously included in the *H. incrassatum* group]

Hedychridium (*Hedychridium*) *heliophilum** du Buysson, 1887; *H. vachali** García Mercet, 1915; *H. vachali decoloratum** Lisenmaier, 1999; *H. inusitatum** Lisenmaier, 1959a; *H. perpunctatum** Balthasar, 1953 (= *insequosum* Lisenmaier, 1959a).

incrassatum group

Hedychridium (*Hedychridium*) *incrassatum** (Dahlbom, 1854) (= *callosum* Radoszkovsky, 1877); *H. incrassatum mavromoustakisi** Enslin, 1950; *H. subaheneum** Lisenmaier, 1959a; *H. rubrescens** Lisenmaier, 1999; *H. laeviclypeatum** Lisenmaier, 1999; *H. pseudincrassatum** Lisenmaier, 1968; *H. aheneum** (Dahlbom, 1854); *H. aheneum feritatum** Lisenmaier, 1959b; *H. virescens** du Buysson, 1908; *H. virescens feroculum**** Lisenmaier, 1959a; *H. tyro** Trautmann, 1926; *H. tyro viridiluteum** Lisenmaier, 1999; *H. amatum** (= *tyro zimmermanni* Balthasar, 1953); *H. guichardi**** Lisenmaier, 1994; *H. piligaster** Lisenmaier, 1969; *H. moricei** du Buysson, 1904 (= *pallipes* (Tournier, 1879); = *sapphirinum* Semenov-Tian-Shanskij, 1954); *H. moricei davydovi** (Semenov-Tian-Shanskij, 1967) (= *moricei chrysurus* Lisenmaier, 1969).

flavipes group

[members of this group are currently included in the genus *Colpopygia* Semenov-Tian-Shanskij, 1954]

Hedychridium (*Hedychridium*) *flavipes** (Eversmann, 1858) (= *bellipes* (Mocsáry, 1879); = *solandii* (Courtiller, 1859)); *H. flavipes rugulosum** Lisenmaier, 1959a; *H. flavipes temperatum** Lisenmaier, 1959a [currently *C. temperata*]; *H. auriventris** García Mercet, 1904.

elongatum group

[established by Lisenmaier (1999), based on a single species previously included in the *flavipes* group]

*Hedychridium elongatum**** Lisenmaier, 1959.

margaritaceum group

[established by Lisenmaier (1968) based on a single species later moved in the *flavipes* group (1997). This species (group) is anyway well distinct from all other species and placed separately in Lisenmaier's collection. We consider valid the interpretation given by Lisenmaier (1968)]

Hedychridium (*Hedychridium*) *margaritaceum** (Semenov-Tian-Shanskij, 1954) (= *Irenula margaritacea* Semenov-Tian-Shanskij, 1954).

roseum group

[Lisenmaier (1999) proposed the *roseum-sculpturatum* group]

*Hedychridium (Hedychridium) roseum** (Rossi, 1790) (= *bohemicum* Spaček, 1935; = *erschowi* (Radoszkowski, 1877); = *nanum* (Chevrier, 1870); = *nitens* Hoffer, 1937; = *rosae* (Dahlbom, 1829); = *rufa* (Panzer, 1801); = *spaceki* Hoffer, 1937; = *suave* (Tournier, 1878); = *sudeticum* Spaček, 1935); *H. roseum caputaureum** Trautmann & Trautmann, 1919 [currently *H. caputaureum*]; *H. roseum turanum** Semenov-Tian-Shanskij, 1954; *H. lampadum** Linsenmaier, 1959a (repl. name for *lampas* Christ, 1791); = *lampadum sorianum* Linsenmaier, 1959a; currently *H. roseum* (Rossi, 1790)]; *H. lampadum limassolense** Linsenmaier, 1959a (repl. name for *roseum cypriacum* Balthasar, 1953) [currently *H. insulare* Balthasar, 1952]; *H. lampadum austerritatum** Linsenmaier, 1997 [currently *Hedychridium sculpturatum* (Abeille de Perrin, 1877)]; *H. chloropygum** du Buysson, 1888; *H. chloropygum densum** Linsenmaier, 1959a [currently *H. caputaureum* Trautmann, 1926]; *H. chloropygum spatium** Linsenmaier, 1959a [currently *H. caputaureum* Trautmann, 1926]; *H. chloropygum berberiacum** Linsenmaier, 1959a; *H. subroseum** Linsenmaier, 1959a; *H. subroseum prochloropygum** Linsenmaier, 1959a; *H. tsunekii** Linsenmaier, 1959a; *H. pseudoroseum** Linsenmaier, 1959a; *H. semiluteum** Linsenmaier, 1959a; *H. houskai** Balthasar, 1953; *H. hofferi**** Balthasar, 1953; *H. susterai** Balthasar, 1953; *H. iridirufum**** Linsenmaier, 1994.

sculpturatum group

[Linsenmaier (1999) proposed the *roseum-sculpturatum* group]

*Hedychridium (Hedychridium) hungaricum**** Móczár, 1964; *H. sculpturatum** Abeille de Perrin, 1877; *H. valesiense** Linsenmaier, 1959a [currently *H. rossicum* Gussakovskij, 1948]; *H. caucasicum** Trautmann, 1926 (= *insulare* Linsenmaier, 1959a); *H. caucasicum irregulare** Linsenmaier, 1959a; *H. mediocrum** Linsenmaier, 1987 (= *scutellare sensu* Linsenmaier 1959a; = *H. mediocrate* Kimsey in Kimsey & Bohart, 1991); *H. scutellare** Tournier, 1878 (= *mediocre* Linsenmaier, 1959a); *H. scutellare sardiniense** Linsenmaier, 1959b (= *corsuense* Perraудин, 1978) [currently *H. scutellare* (Tournier, 1877)]; *H. scutellare tunesiense** Linsenmaier, 1959a; *H. maroccense** Linsenmaier, 1959a; *H. placare** Linsenmaier, 1968 [currently *H. pseudoroseum*]; *H. palestinense** Balthasar, 1953; *H. maculiventre** Linsenmaier, 1959a [unnec. repl. name for *palestinense* Balthasar, 1953] [currently *H. maculisternum* Arens, 2011] (= *sculpturatissimum* Linsenmaier, 1959b: 235); *H. maculiventre raicum** Linsenmaier, 1997 [currently *H. maculisternum* Arens, 2011]; *H. maculiventre** *sculpturatissimum** Linsenmaier, 1959a [= *maculiventre* Linsenmaier, 1959b]; *H. sardinum** Linsenmaier, 1997 [currently *H. scutellare* (Tournier, 1877)]; *H. biskranum** Linsenmaier, 1999.

Conclusions

Linsenmaier's publications (1959a, b, 1968, 1969, 1987, 1993, 1994, 1997, 1999) are the only available tool for the identification of the *Hedychridium* in the West Palaearctic realm. In fact, he was the only author to provide keys to species level at a supra-national scale: Europe and part of western Asia (1959a, 1997), Arabian Peninsula (1994) and northern Africa (1999). Of course, several descriptions and diagnosis are too short, morphological characters may appear sometimes obscure in line drawings (Kimsey & Bohart 1991) and he could not check all type specimens deposited in museums, thus generating new synonymies (Arens 2010). However, although his studies may be hard to understand for beginners, they are useful for advance researchers. Moreover, his descriptions are clear when researchers can examine his collection and personally observe type specimens.

The types described by Linsenmaier, as well as other specimens deposited in this collection still need a revision as explained by Arens (2010, 2011), who studied the *Hedychridium* species of the *roseum* group (*roseum-sculpturatum* group sensu Linsenmaier) deposited at NMLU.

Acknowledgements

We are in debt with the subject Editor Celso O. Azevedo (Vitória, Brazil), Christian Schmid-Egger (Berlin, Germany) and an anonymous reviewer, whose comments contributed to improve the quality of the manuscript.
