

**ARTHUR ANKER (2023) Description of a new genus and new species of deep-water stenopodid shrimp from the western Atlantic, with remarks on *Odontozona* Holthuis, 1946 and *Richardina* A. Milne-Edwards, 1881 (Decapoda: Stenopodidea) *Zootaxa* 5263 (1): 93–106.**

The first sentence of the Abstract is both self-contradictory and incomplete, and should be replaced by the following sentence:

A new genus, *Jogoya*, **gen. nov.**, is established for a new species of stenopodid shrimp, *Jogoya alucia* **sp. nov.**, described based on the holotype collected by a manned submersible at a depth of 917 m in the Bahamas in 2019, and two additional specimens collected during earlier expeditions, one also in the Bahamas and one off Anguilla.
