

BRUNO ZILBERMAN & CARLOS M. PIRES-SILVA (2023) A new species and morphological notes on the remarkable termitophilous genus *Austrospirachtha* Watson from Australia (Coleoptera: Staphylinidae: Aleocharinae). *Zootaxa*, 5336 (3), 424–432.

The depository institution of the holotype was not explicitly mentioned in the previous paper, only the institutional code, herein included for the availability of the name *Austrospirachtha carrijoi* Zilberman & Pires-Silva **sp. nov.** The holotype of *Austraspirachtha carrijoi* Zilberman & Pires-Silva **sp. nov.** is housed in the Museu de Zoologia da Universidade de São Paulo (MZSP) (MZSP 21193), Brazil, as well as the paratype.

Tribe Corotocini

Subtribe Corotocina

Genus *Austrospirachtha* Watson

Austrospirachtha carrijoi Zilberman & Pires-Silva **sp. nov.**

Description in Zilberman & Pires-Silva, 2023.

Type material. Holotype (♀). Australia: Northern Territory: Litchfield, Litchfield National Park, -13.04759S, 130.9106E, 8-10/VII/2014, T. Carrijo col., with *Australitermes* sp. (MZUSP 23728), and *Nasutitermes* sp. (MZUSP 26578). The beetle code is MZSP 21193. Paratype (♀). 1, same data and collected along with the holotype. The holotype of *Austraspirachtha carrijoi* Zilberman & Pires-Silva **sp. nov.** is housed in the Museu de Zoologia da Universidade de São Paulo (MZSP), Brazil, as well as the paratype.
