

## **WERNER W. SCHWARZHANS & PETER R. MØLLER (2021) Revision of the ‘dragon-head’ cusk eels of the genus *Porogadus* (Teleostei: Ophidiidae), with description of eight new species and one new genus. *Zootaxa*, 5029 (1): 1–96.**

The captioned article was published 3. Sept. 2021 and included the description of a new genus named *Tenuicephalus* Schwarzhans & Møller, 2021. We have recently been made aware that the genus name is preoccupied by *Tenuicephalus* Wunderlich, 2021 (in Wunderlich & Müller 2021), a fossil genus of spider described in an article published in “Beiträge zur Araneologie” in April 2021. We therefore propose here to replace the genus name *Tenuicephalus* Schwarzhans & Møller, 2021 in fishes with *Tenuicephalichthys* Schwarzhans & Møller, 2024.
