EL-SAYED M. EL-BANHAWY, ABDELRAKY K. NASR & MAHMOUD M. RAMADAN (2025) Description of a new species of *Africoseiulella* Kreiter (Acari: Phytoseiidae) from Egypt. *Zootaxa*, 5633 (2): 244–250.

El-Banhawy *et al.* (2025) recently published a paper describing *Africoseiulella sedishazlensis* El-Banhawy, Nasr & Ramadan (Acari: Phytoseiidae) as a new species. In the same paper the species name was incorrectly spelled several times as *Africoseiulella sedishazlensisensis*. Kazemi *et al.* (2025) added some descriptive information about this species without commenting on the alternative spelling. Acting as First Reviser under *International Code of Zoological Nomenclature* Article 24.2.2, I here state that the correct name of this species is *Africoseiulella sedishazlensis* El-Banhawy, Nasr & Ramadan, 2025.
